WHEN BILL COMES HOME
ON FURLOUGH . . .

what will he find?

Will he find you and your family backing
him up in every way possible? Conserving and
saving so that vital war materials and commodi-
ties can be used where they'll do the most good?
Will he go back to camp feeling pretty good
about you—about the way you're doing your
utmost at home—to help him wherever he
may go?

There are a lot of little things you can
do at home to help . . . little things, but
mighty important. The way you use gas
for instance. Gas is something you've al-
ways been able to take for granted—in-
stantly available in ample quantities for
essential household uses. But now—gas
has added tasks it must perform.

Your government hasn't asked you to
give up gas in your home—but it does ask
that you use it wisely. For gas has become
a vital war commodity—a necessity in the
manufacture of ships, planes, tanks, guns,
and a host of other parts and products used
by our armed forces.

In the preparation of metals and ma-
terials where controlled, constant, efficient
heat is necessary—gas is being used in

terms of millions of cubic feet. Right here
in the Michigan area, we are supplying
millions of cubic feet of gas daily to war
industry—in addition to supplying normal
domestic needs.

It's a tremendous job—but we're doing
it with our present facilities. Steel and
other critical materials necessary for in-
creasing gas supply, are not available for
additions to natural gas pipe lines, or for
the expansion of manufactured gas plants
and facilities.

We know we can count on you to do
your share—to conserve and be careful.
Even in peace time, it's smart to be thrifty
... in war time thrift becomes a necessity.
So let gas continue to serve you at home—
use it—but use it wisely.
