High Altitude Effects
Among early experiments on the physiological and psychological effects of high altitude, ascent produced reactions typical of those from its first to its ultimate stage, as confirmed by subsequent experiences of scientists in the Alps, Andes and Himalayas, of subjects tested in low pressure chambers. Among them were loss of judgment, loss of memory, of mental and emotional control, of visual acuity.

MOSCOW U.S.S.R.—The Wheat fields of the Russian Ukraine again are the great prize for which mighty armies fight. The Red Army is now pressing its great offensive into the Ukraine and the Germans are fleeing, taking what they can with them. THIS AND THAT . . .

From all I've heard, Boy Eight is well on his way to being a sound effects man when he grows up. How's about it at your house?

September has certainly been a month with a bumper crop of babies.

And how do we enjoy those things that once were so familiar after not having them so often.

The shelves are certainly groaning with the extra canning this year and are calling for supports.

Wonder if it's too much to hope for a nice stretch of Indian Summer like we had about three years ago?

Non-Transplants
Flowers which do not like to be transplanted include annual poppies, salpiglossis nigropunctata, and annual phlox. If necessary to transplant them, the seedlings should be grown in small pots so they can be removed without disturbing the roots.
