Women Schemists  
The first woman member of the  
Academy of Natural Sciences of  
Philadelphia, the oldest organization  
of its kind, was admitted in 1841,  
although the academy was founded  
in 1812. The first woman member  
was Lucy Sistrup, wife of Thomas  
Say, the entomologist, who was one  
of the seven founders. Today sev-  
eral hundred of the academy's  
members are women.

**WEST POINT PARK**  
Mrs. William Zwahlen

Anne Marie, a 5½ pound daughter,  
was born New Year's Day in  
Mt. Carmel Hospital to Mr. and  
Mrs. Edwin Johnson of Mayfield  
Avenue.

Sgt. Robert Hunter, who is in  
the Air Service, arrived home last  
week Wednesday for the first  
leave of absence he has had in  
many months. He has been over-  
seas and has many interesting  
things to tell of the habits and  
customs of people with whom he  
has sojourned. He is at the home of  
his mother, Mrs. Emerson Ault,  
Mayfield Avenue, and will return  
to his comrades about the 20th.

The young Jimmy Murt is ill with  
flu.

Mrs. Margaret Martin was the  
New Year's dinner guest of her  
daughter and family, Mr. and Mrs.  
Edward Stromski, near Wayne.

Shirley Ault, who has been ill  
with scarlet fever, is doing nicely  
and will soon be out of quaran-  
tine.

At the Neighborhood Bible  
School Sunday morning a large  
number of boys and girls received  
special recognition for faithful at-  
tendance. Among the were  
Clare and Audrey Roberts, Shir-  
ley and Karen Grundy, Jerry Pet-  
erson, Lora Anne Ault and Dicky  
Varvel.

Rev. Axel Edwards will again  
preach one of his fine sermons  
during the Vesper Hour next Sun-  
day evening at 5 p.m. in the Neigh-  
borhood Church. At the last ser-  
vice Rev. Edwards used his violin  
very advantageously, much to the  
enjoyment of the modest congrega-  
tion.

Pvt. Shirley J. Zwahlen of Camp  
Campbell, Kentucky, arrived home  
last Friday morning on furlough.  
She was accompanied by Pvt. Joseph  
Wilcox who is her guest, but  
who was on a three day pass and  
had to return Sunday back to  
camp.

The Girl Scout Troop Livonia  
No. 1 Christmas Party has been  
postponed on account of illness of  
some of the girls.

Mrs. Emerson Ault, Mrs. J. W.  
Ault, Mrs. Robert Wilcox and  
Lora Anne Ault were callers at  
the Russell Portland home in Red-  
ford last week Tuesday afternoon.  
They had an interesting visit with  
Robert Portland, who is home for  
recuperation after performing 40  
missions as a tail-gunner in Africa  
and Italy.

Mrs. Arthur Murt was a hospital  
patient for a few days the early  
part of the week.

Mr. and Mrs. Herman Keyser of  
Huntington Woods were callers on  
relatives in the Folker Subdivi-  
sion Sunday.

Clyde Buckingham and family  
spent Sunday evening with rela-  
tives in Detroit.

The Girl Scouts of Livonia Troop  
No. 7 went skating at the North-  
ville Mill Pond Thursday, Decem-  
ber 30th. There were twelve  
girls accompanied by their lead-  
ers, Mrs. William Barnum and son,  
Eddie.

Mr. and Mrs. William D. Zwahlen  
and two daughters, Janet Mae and  
Gail Anne of Detroit, were New  
Year's dinner guests of Mr. and  
Mrs. William H. Zwahlen, also  
Shirley and Miss Josephine Wil-  
cox.

Mr. and Mrs. Stuart Shaffer  
and family spent the New Year's  
weekend with relatives in Wind-  
sor.

Seven of the Boy Scouts of  
Troop LV-2, with their Scoutmas-  
ter, William Barnum, enjoyed a  
coconut hike Friday afternoon at  
Waterford. They skated and then  
cooked their supper out of doors.

**TELEPHONE  
RAISES PAY  
OF EMPLOYEES**

Nearly 3,000 operating and clerical  
women employees of the Mich-  
igan Bell Telephone Company  
have been granted a wage increase  
of \$2 a week by the War Labor  
Board, the company announced  
today.

The increase was granted to  
some 5,000 women in the com-  
pany's traffic department on or-  
der of the Board several weeks  
ago. The Board has just approved  
a joint petition by the com-  
pany and unions to extend the in-  
crease to nearly 3,000 other union  
and non-union women in clerical  
groups in the company.

Terms of the wage raise make  
it retroactive to March 28, or the  
date of employment after that  
time, for women employees on  
the payroll at the time the in-  
creases were granted. Due to the  
accounting and clerical work nec-  
essary to make the change, some  
period of time will elapse before  
all retroactive payments can be  
made, the company pointed out.

**Increase Heat**  
In many houses, particularly un-  
insulated ones, there is a great heat  
loss directly behind radiators. A  
piece of aluminum foil placed be-  
hind the radiator will reflect the  
heat into the room and increase the  
radiator's efficiency.

**U. S. Comics Take on  
New Names in S. America**

So firmly have our comic strips  
entrenched themselves in the south-  
ern republics that they now appear  
as regular weekly supplements to  
most of the large newspapers pub-  
lished in Latin America. Except  
for occasional changes in the names  
of characters and Spanish, Portu-  
guese or French texts instead of  
English, they are identical with  
those distributed in this  
country.

In this way, the Brazilian planter  
spending his morning coffee and the  
Argentine gaucho sipping his mate  
are as familiar with Mandrake's  
Magical Moments as the average  
reader of the New York Herald  
Examiner. In this way, the Argen-  
tine gaucho sipping his mate are  
as familiar with Mandrake's  
Magical Moments as the average  
reader of the New York Herald  
Examiner.

And in that Central American re-  
public, the Katzenjammer Kids are  
the capers under the title of Mi-  
lites de los Filibusteros, while the  
incurable Jiggs, plain Pancho to his  
addicts, suffers his interminable  
bringing-up in a strip called Educa-  
do a Papa. The formidable Mag-  
dalen, known as Ramona, does the honors.

Cocacola is Mecanografa revo-  
lucionaria in the beautiful Tiltle  
Toller, sharing honors in several  
comic supplements with Tapon Lo-  
pez. Tapon Lopez, on closer inspec-  
tion, reveals himself to be none other  
than Smooty Smith, peerless yard-  
bird. Pedro Harapos is, unmarked  
as Hooey Pete. Chiquito Abner as the  
unmistakable Bully and Pepsy vi-  
lenza as Blondie and Dagwood, re-  
spectively.

**RED-CROSS  
SETS GOAL OF  
WAR FUND DRIVE**

\$200,000,000 is the goal set for  
the 1944 war fund of the American  
Red Cross to finance its global  
activities for victory program ac-  
cording to Byron B. Webb, chair-  
man of the Oakland County Red  
Cross chapter. Announcement of the  
amount was received by the  
chapter from Norman H. Davis,  
national chairman of the Ameri-  
can National Red Cross.

The greater part of this sum,  
\$140,000,000 will be required by  
the national organization to fi-  
nance Red Cross national and in-  
ternational services to America's  
fighting forces. Mr. Webb said.  
The remaining \$60,000,000 will go  
to the 3,750 local chapters for  
community work most of which is  
related to service men and their  
families.

C. E. Rudderham of Pontiac and  
Bloomfield Hills is war fund  
chairman in Oakland County and  
met with members of his planning  
committee this week to discuss  
ways and means to conduct the  
fund drive and personnel appoint-  
ments in the various townships of  
the county. The planning com-  
mittee chairman is: Marshall E.  
Smith, Waterford township, other  
members are: E. B. Cuddey, Mrs.  
Hugh Little, Pontiac, Mrs.  
Sheldon Noble, Bloomfield Hills,  
R. J. Emmert, Birmingham, Clar-  
ence Kimball, Royal Oak and Mrs.  
Dorset E. Wilson, Milford.

Leon Fraser, president of the  
First National Bank of the City  
of New York, is national chairman  
of the Red Cross 1944 War Fund  
campaign. Walter S. Gifford,  
president of the American Tele-  
phone and Telegraph company and  
chairman of last year's War Fund  
campaign, will head a special com-  
mittee to solicit corporate gifts.

Quoting Mr. Davis, Mr. Byron  
Webb said: "While the 1944 ob-  
jective is the largest campaign  
goal in Red Cross history, it repre-  
sents the minimum amount re-  
quired to meet constantly increas-  
ing demands from our army and  
navy for the Red Cross services."

In Oakland County we are con-  
fident that our portion of this  
fund will be raised in the same  
spirit of generosity which has  
always characterized this com-  
munity."

Say U. S. Wastes Food  
More than 91 per cent of a repre-  
sentative group of American house-  
wives believe that America, as a  
nation, wastes its food. The meal  
that causes most waste, in the opinion  
of this group, is dinner. And, in an  
analysis of the waste itself, 35.8  
per cent of the housewives attribute  
it to spoilage before the total amount  
of food purchased can be used; the  
second largest spoilage item—23.5  
per cent—being the non-use of left-  
overs.

Pes Aphid Control  
University of Wisconsin field ex-  
periments have developed several  
combination dusts for pes aphid con-  
trol. First in the report comes 27  
per cent rotenone, 1½ per cent nicot-  
ine alkaloid, 10 per cent dusting  
sulfur. 7 to 2 per cent of a hygro-  
scopic agent, and talc or other dilu-  
ent.

**New Plastic Window Aids  
U. S. Deep Sea Divers**

Seventy of the government's deep  
sea divers, including 23 working on  
the gutted S. S. Lafayette (Norman-  
die) in New York harbor, are wear-  
ing a new type helmet with a window  
of crystal-clear plastic.

A light, virtually unbreakable win-  
dow of "Lucite" methyl methacrylate  
resin eliminates the heavy metal  
protective grille needed in old type  
helmet. It increases the diver's  
field of vision, reduces the weight  
of the headgear, and makes it easier  
for the diver to maneuver.

These helmets have been used at  
depths down to 320 feet in various  
parts of the world, and much greater  
depths are predicted by the min-  
ister. A helmet made entirely of  
"Lucite" is being tested.

The streamlined helmet's curved  
window is made from the same  
plastic which is now used in record  
quantities for the noses, gun tur-  
rets, navigation "bladders" and  
other transparent enclosures on mil-  
itary airplanes.

**Soybeans Nutritious**  
Green (edible) soybeans can be a  
valuable addition to the diet, espe-  
cially in these days of meat short-  
ages.

Soybeans are far richer in pro-  
tein and fat than other legumes and  
are good sources of calcium, iron,  
vitamin A, thiamin and riboflavin.  
All of the eight varieties tested con-  
tained approximately the same  
amount of vitamin C, or ascorbic  
acid, as the green peas tested and  
slightly more than the freshly har-  
vested snap beans.

Green soybeans are ready to be  
prepared for eating as soon as the  
pods are well filled and while they  
are still green in color. They have  
a better flavor if prepared promptly  
after picking, since their sugar  
content decreases rapidly if held at  
room temperature for any length of  
time. In order to make hardening  
easier, pour boiling water over the  
tough, fibrous pods and let them  
stand for five minutes. Then drain  
and hull the soybeans by breaking  
the pods crosswise and squeezing  
out the beans.

**Port Curing**  
The secret of curing pork is to  
use good sound meat, the correct  
curing ingredients, and clean con-  
tainers. Of course, it is necessary  
that there be cool weather for curing.

Salt is the agent primarily respon-  
sible for curing. Excessive amounts  
of salt injure the flavor of the meat  
and cause a too great hardening of  
muscles. (Too small an amount al-  
lows bacterial action to set in, caus-  
ing subsequent spoilage of the meat.)

Sugar is used in the curing process  
to counteract the hardening effect of  
the salt and to improve the flavor  
and texture of the meat. While  
brown sugar, or even molasses, may  
be used.

**Reprocessing Peas**  
If the boiling-water-bath method  
of canning was originally used,  
housewives do not need to reprocess  
peas that were put up without acid,  
or bring the total contents of each  
jar to a boil and boil for 15 minutes  
before tasting or using. If the open  
kettle method was used, however,  
the peas should be processed in a  
boiling-water-bath or the entire con-  
tents emptied into a pan and boiled  
for 15 minutes before being tasted or  
used regardless of whether or not  
lemon juice was added to the fruit.

To reprocess, proceed as for can-  
ning fresh raw peas in the boiling-  
water-bath, reusing only fruit that  
is in good condition.
