The Fourth War Loan Is Coming!

The Fourth War Loan Drive starts January 18 1944, with a selling quota of \$14,000,000,000 of which \$5,500,000,000 must be raised from individuals. That means that each one of its must do our utmost lo invest every possible cent in United States Defense Bonds. Do you know how much that means? It means every penny above the actual cost of living.

It is costing more to live these days than it has in previous years, although figures which have just recently been released prove/that prices are being kept down with unusual success. At the same time, most of us are making more today than we ever have before. It is so important that this money be invest-ed in United States Defense Bonds. This is asking so little of us, in return for the sacrifice our young men

You know what they're getting, don't you? Just \$50.00 a month, room and board. And in exchange for that they are asked to give to the utmost of their time, to constantly study and drill in all kinds of weather and under all conditions, to take orders without any question whatsoever and to carry out without any question whatsoever and to carry out those orders, no matter what they may be. And it goes much further than that, too. Some of those boys have given an arm or a leg, some of them are wounded and crippled so badly that it is going to be a struggle to maintain a place in society and some of them won't be back at all—they have paid the greatest price of all. And though they will not be back with us, their memory will live on, as will the cause for which they died. for which they died.

It is up to us, here on the home front, to back these men to the utmost. We can contribute most these men to the utmost. We can controduct most by making regular purchases of United States De-fense Bonds, as most of us do through the payroll deduction plan, and when a War Loan Drive domes along, we must do our best to buy every EXTRA Bond—not those we purchase regularly—that we possibly can

The purchase of Bonds represents the finest plan of saving that you could possibly have. You only lend your money to the government—not give it to them—and in ten years time you get it back at a handsome rate of interest. If some emergency should arise and you find that you need the money was the true had connected two news of the worked. sooner than you had expected, you can get your mon-ey back before the maturity date.

Here in Farmington there will be ample oppor-tunity to purchase bonds, for the ladies who have sold bonds in the past will again be on hand at a booth in the Farmington State Bank, and at the Civic The-atre. The Theatre will again cooperate in the drive by turning on the house lights each evening, and the ledies will pass through the audience, taking applications for Bonds and selling Stamps.

So come on folks, figure your budget out and see just how many Bonds you will be able to buy during the Fourth War Loan Drive. Make your pledges early and put Farmington away out ahead. Let's show our boys that this is one town that is behind them one hundred per cent—that mean's every one f us, all the way!

Fertile Acres

The utilization of commercial fertilizers in New England last year
amounted to about 4 per cent of the
total used in the United States. We
England consumption amounted to
\$50,327 tons with that in the whole
stouchty amounted 81,378 tons, or a
tilter more than half as much as
Maine, where 133,442 tons were
used.

at present the only source of rotenome for the United States.

Chemical Hot-Water Bag Beause of today's advanced tech-nique in fabric coating, medical corps doctors now have a "chemical hot-water bag" which can save a wounded man from succurbing to shock. A little cloth bag coated shock. A little cloth bag coated shock. A little cloth bag coated rain and charged with chimical generates heat when a couple of teaspoons of water are added.

Hogging Off

"Hogging-dff" form will save labor and make buskier bogs. Feeding trials on farms and a texperiment stations, show that pork was produced with less grain by hogging earn than by feeding day or anapped form in yards. Shoats averaging from 75 to youngs are the most desirable weights to be turned out into the cornfield.

The fighters on this Michigan front are the operators of 188,000 farms of which 107,000 are regarded as being commercial farms. Michigan's farm population totals 855,000 men, women and children—quite a streable host.

quite a sixeable host. Visualize this home frost army said the dean. You have \$\frac{1}{5}\$ court, ye agricultural agents 'thoughout the state as key commanders. Niho of those men, all of whom are members of the college extension teaching staff, have full-lime assistants. Cost of the service is financed cooperatively by federal, state and county governments.

state and county governments.
"The county agricultural agent has come into his own in public recognition and esteem, especially during the past year, as an indispensible man and service in this war battle for foods," said Dean Antitony. "I am happy to patchem this tribute in behalf of the farmers of the state."

The farm prospects of 1944 are, both good and bad, as the dean analyses them. The manpower shortness still continues critical with little relief in prospect until Germany collapses and military demobilization begins in the United States. However, the college extension service did a "master-fill" job in mobilizing energency

Plans Made For New Bank

Plans Made For New Bank
Progress is reported this week in the receipt of subscriptions pursuant to the plan for a new bank in Farmington, in the days that have singsed since announcement of the program has week. a number of denositors have signed agreements to purchase shress in the new institution. A fair amount of subscriptions is reported thus far, and it is believed that the capital quota, \$37,500, can be reached and the \$50 per cent dividend distributed, if all do their part and do not delay in brings in their agreements.

Liquo-By-Glass Fails To Pass in Township.
Sale of withisky by the class is unlikely in Farmington Township, and will not be permitted unless there is within the next few weeks a reversal of sentiment expressed by members of the Township Board at lihely meeting Tuesday night. Two members indicated that they might oppose a molon if it was offered one indicating definite opposition to sales by the glass at all, and another stating very positively that he would consent to the sales oully under conditions which would provide the strictest supervision and regulation.

Exchangeites Will Fete Grid Feam
Twenty-eight members of the Farmington High School football
team will be bonored at a banquet Tuesday night which will be given
them by the Exchange Club. The banquet will take the place of the
regular meeting of the club on Wednesday moon, and will be held in
the basement of the Methodist Church. Letters will be awarded to 21
playors of the team that was rumber-up for the Southwestern Osland
County League Championship.

County League Championship.

Cut-Off Drivers Still Go Wrong Direction

Misunderstanding still prevails concerning the direction one is supposed to drive on the cut-Off. Two motorists were fined this week for soing against the traffic. The average for the past two months has been one arrest a week for this mistake. Almost invariably the offender is a Detroiter, or someone why does not live around here. He usually pleads guilt, but complains to Justice John J. Schulte, Jr., that the signs were not conspicuous enough.

Stop Light is installed

One of the most dangerous intersections in this area is now equipped with a stop light. It is the junction of Farmington Road and Bight Mile Road. The light was installed by the Wayne County Road Commission, which also painted lanes on the pavement and erected traffic signs at the Piezon School.

intestion, which also painted lanes on the pavement and erected traffic signs at the Pierzon School.

Weeds a Breeder Words a director.

Though few people realize what a burden weeds add to human existence, farmers have an accurate idea. So do the railroads. These two groups use 40 million pounds of weed-killing chemicals in a normal year.

Fuel Reserves
Authorities have stated that the
known petroleum reserves of the
United States are sufficient for only
15 years; natural gas reserves are
good only for 22 years; and bituminous coal reserves are sufficient for
3,000 years.
