IT'S PATRIOTIC THESE DAYS TO Conserve GAS

. . . So that War Plants who are Cooking with Gas will have All of this Vital Fuel they need!

Today Gas is on the front production line helping to make guns, tanks, planes and ammunition. Shells alone require a number of heat processing operations in their manufacture and they are "cooked" with the same fuel you use in your home for cooking.

GAS IS AN IMPORTANT WAR FUEL. DO NOT WASTE IT IN YOUR HOME! Remember, when you save gas you keep war plants humming for Victory.

Many of the improvements in design and efficiency of tomorrow's Gas home appliances will be the direct results of the research and develop-ment which have taken place during these trying times.

Modern Gas service after the war will make work easier, your home more cheerful, and life more enjoyable.

Can You Picture
MICHIGAN
without Transportation?

Public transportation—by highway and akyway, by railway and waterway—is one of the most vital industries of this State of ours, it represents far more than a vast array of terminals, equipment, repair shops and cold statistics about moving manpower—it's the link that joins Michigan's cities and towns and rural communities to each other and to the rest of the Nation. In these tense times, it is the means of bringing boys home on furlough—of getting workers to the war plants—of keeping on the move all those people whose travel is essential to Victory.

An estimated 75,000 of our fellow-

An estimated 75,000 of our fellow-citizens of Michigan are hard at work on the 34 railroads and the 3 airlines on the 34 rangeds and the 3 airlines serving Michigan, on boats, barges, huge fleets of trucks, and on the 104 intercity bus lines which operate 860 buses along 12,201 miles of routes within our State borders. No small share of the credit for the efficiency of this excellent transportation system belongs to the

Michigan Public Service Commission and the O.D.T.

and the O.D.T.

We who keep Greyhound buses rolling across our State are conscibus of the importance of our particular job—to the whole system of wartims transportation. Without the buses doing their share of the job other transportation would be burdened beyond capacity.

Const. of up excelle bridge are spring.

Many of our people today are serving in the Armed Forces—the rest of us are doing our level best to keep essen-tial highway travel safe and efficient.

bal ingnway travel sate and emcent.

But we're also thinking about and planning for the post-war days, when pleasure travel will return and when such travel in new and finer Super-Coaches will be a greater pleasure than ever.

Back the Attack! **BUY MORE** THAN BEFORE!
