

Obsolete Valves
Don't neglect to have worn out or obsolete air valves replaced on radiators of steam heating plants. Poor air valves are one of the most common causes of complaints about poor heating. It is a complaint that can be avoided if air valves are checked by a heating contractor once a year.

Larger Cows
The present tendency is to keep larger cows. Production records of the larger cows return the greater profit. It may be desirable to have the length of the stall platform greater at one end of the stable than at the other, to comfortably accommodate cows of different sizes.
