**ICE CREAM IS WELCOME AT ANY DINNER**

For people who worry about "waist lines" and "figures" ice cream is a delightful answer. As compared with most foods which it commonly replaces in the diet, it is not high in calorie value, states Mrs. Ethel Austin Martin, Director of Nutrition, National Dairy Council.

A serving of one-sixth of a quart of vanilla ice cream contains about 200 calories, or the same as a large baked apple. An average piece of apple pie furnishes 300 calories, while an ordinary serving of Brown Betty, angel food cake or raspberry sherbet supplies from 300 to 400 calories, and a serving of lemon pie contains 450 calories.

On the other hand, ice cream does contain all of the nutritive elements of milk. It is rich in the very best of proteins and contains liberal quantities of vitamins as well as calcium. Vanilla ice cream is made of about 80 per cent cream and milk products and 15 per cent sweeteners.

Another surprise to many people is the fact that ice cream and fish or seafoods can well be eaten at the same meal. Fish is often combined with milk in tasty seafood dishes. Ice cream, which is a milk product, can be served in the same meal with equal success.

The "Star Spangled Banner" was composed by Francis Scott Key while imprisoned on a ship during the bombardment of Fort Mifflin in 1814, but it did not become our official national anthem until March 4, 1931, when an congress passed an enabling act.

**Easy to Use**

Potatoes are one of our easiest-to-use leftovers and yet are frequently wasted. They fit nicely into soup, stew or salad. They are good hash-browned, creamed or fried and browned with a bit of minced onion, diced bacon or ham. Washed potatoes can be made into baked and browned quickly, and they make a fine lining or topping for a vegetable or meat pie.

**We Met the Challenge...**

"We are the food army of Michigan. There are nearly 200,000 of us—each with our family, our bit of soil, our hopes, our ambitions. Ours is a never-ending battle—sometimes against drought or rain, against flood or heat, against pests and disease, against shortages or surpluses, and always against time.

"No state in the union grows a greater variety of products. Proud as you must be of Michigan's industrial contribution to ever-approaching Victory, proud, too, you should be of her agricultural greatness. For Michigan, last year, was asked to produce a record-breaking tonnage of food—food to feed our own people, food for our fighting men around the world, food for our allies, food for the starving in China, in Africa, in Italy.

"It was a challenge to the farmers of our state. And we accepted it, though there were many who said it couldn't be done.

"We won the battle of food. We won it in spite of the help we didn't have, the equipment we couldn't obtain. We won it in spite of a jesting Nature that washed out our early plantings, bogged down our tractors, destroyed precious days and weeks. We harvested nearly 500 millions of dollars' worth of vitally-needed food, an all-time record.

"We met the challenge as you have met the challenge in your work—as your food retailer and wholesaler from the smallest independent to the largest chain store operator met it without complaint. They were beset with problems, too—ration stamps, ceiling prices, countless Government reports, increased operating costs, inadequate help and often shortages of merchandise.

"They made it possible for the food we produced to provide you with the energy to do a fighting job on the home front.

"They brought you our luscious berries, cherries, melons, peaches, pears, plums and apples from our fruit areas . . . sugar from our beets, millions of gallons of health-building milk, cream and other dairy products for your children and war workers, golden honey, top-grade potatoes in abundance, poultry, eggs and meats from our farms . . . fresh vegetables in never-ending streams and much more packed in our canneries . . . peas and beans and tomatoes and body-building, vitamin-enriched root vegetables . . . carrots, turnips, beets . . . all from Michigan farms and orchards and processing plants.

"The cooperation of your food merchants made our victory possible. Michigan working together has overcome almost impossible odds. That is the bright hope of the future as we enter upon a new season . . . we who till the soil of Michigan and distribute its food."
