Betters Paint Job
While modern enamels and paints
have high hiding power, good undercoatings, especially in the case of
enamels, will improve the job.
Manufacturers of enamels usually
also make undercoatings which are
carried in stock by the dealers who
sell the enamels.

Spare Eyes
Don't overwork your eyes. Young
eyes in children should not read for
too long a time. Many adults should
not drive automobiles for protracted
periods.

Color schemes of the American Indian have so advanced in popularity, that one of the country's garding department stores recently sent representatives to Santa Fe. New Mexico, to arrange for a store-wide promotion of the Southwestern Indian color theme.

Disguise Eggs
Hollandaise sauce, mayonnaise
tressing cooked dressing for meats
and vogetable salads and fon fruit
salads also can be served to distime eggs.

Helps to Insulate Grain
The United States department of agriculture. In a recent release included this statement:
"Cold works in two ways. One is that most of the insect pest of stored corn and wheat cannot endure freezing temperatures, so that in spring there are few living eggs or other forms of insect life in grain that has been thoroughly childed. The second is the result of the excellent insulating effect of grain. When wheat or shelled corn is stored in bias or tanks holding a thousand bushels or more, it takes a long time that the second is the result of the make its way into the mability of the second in the second state of the grain will be comfortably warm for them, and in a large quantity of wheat or shelled corn most of the grain will remain too coof for insect breeding all through the summer. It is a further safeguard to cover the outer surface of a granary or grain (tank with white paint so that it will reflect sunlight and absorb less heat." Some of the government's lown storage structures for grain have been painted white as a measure of Some of the government's own storage structures for grain have been painted white as a measure of protection for the contents. The degree of necessity for protecting grain from heat varies with the regional climates. LEGAL NOTICES
