

Tape Spools
Empty adhesive tape spools make excellent containers for odd pieces of lace insertion and edging, elastic and braid. Replace the metal band over the rim to keep material clean.

Increases Cost
Corrosion and lack of care of unboxed farm machinery cuts its life in half and adds to the upkeep cost, according to the agricultural engineers of the University of Missouri.

ANYTHING CAN HAPPEN — George and Helen Wate Papashy. George Papashy is a Georgian, that is, a Russian from the Province of Georgia, and, as he makes it indubitably clear, he is not of noble but of peasant stock. His wife, Helen, is an American who runs a bookshop in Allentown, Pa. Together they have written "Anything Can Happen," an account of George's adventures in America. Aptly told in the vernacular of George, it covers the major incidents of his assimilation in the American scene. And George being what he is, it is a charming, unpretentious, naive and joyous little narrative.

George came to America twenty years ago. From the time he sold his Astrakhan hat for a cheap cup, George has been an American. He has learned the hard way but always with laughter. There are twenty sketches in the book each dealing with some crisis or deeply emotional moment in his life. All are good but some stand out for special flavor and pungency.

What gives this book its special appeal is the piquancy of George's approach to life, his individual translation of human events and relationships. His definition of a nervous breakdown is one to be cherished. "It's American sickness," he explained to a friend, "When your brain ain't interested

RAY J. BONINI APPOINTED TO LANSING DISTRICT

The Michigan Bell Telephone Company today announced the appointment of Ray J. Bonini as district commercial superintendent of the Lansing District and that of Wayne K. Pryor of Detroit, to succeed Bonini as district commercial superintendent of the Ann Arbor District which embraces the company's local exchange.

Bonini at Lansing succeeds Theodore H. Dawson, who is heading up the Michigan Bell's farm-line extension and improvement program.

A graduate of Notre Dame University, Bonini has been with the Michigan Bell nearly 18 years, including the last 5 years as district commercial superintendent in the Ann Arbor District.

Pryor attended Olivet College. All of his telephone experience has been at Detroit where he started in 1926. He has been supervising manager of the company's Downtown Detroit District.

Elizabethan Sugar
Queen Elizabeth of England first introduced sugar into her domestic household as an article of diet in the middle of the 16th century. Prior to that time the limited amount produced was mainly used for medicinal purposes.

in you any more." And the cure, it should be added, is garlic sauce.

IMMORTAL WIFE — Irving Stone. This is the dynamic story of Jessie Benton Fremont, one of the most exciting women in American history. Jessie was beloved, hated, feared, and faked across a continent, but her supreme achievement was the marriage she created with John Charles Fremont, which left its mark on every major event in the nineteenth century America.

Jessie was the favorite daughter of Missouri's fire-eating senator, Thomas Hart Benton, and though she never weighed much over a hundred pounds, she had mind and will of polished steel. Accustomed to help her father through his many political battles, she determined to marry a man whose career she could share and sustain; a man she would adore, work with, and be proud of. At sixteen she fell in love with Fremont, daring, young, topographer of the unexplored West. Jessie never got over that love. She used it to make a marriage that was for them an indestructible third entity, helping them build from every defeat to victory.

The spectacular rise and fall of the Fremont fortunes was linked to the historical highlights of their era — western expansion, California's break from Mexico, the Gold Rush, the Civil War. He won fame as a fearless adventurer, was nominated for President by both Republicans and Democrats, faced two court-martials, amassed and lost a huge fortune. And through it all, Jessie worked with unflinching devotion to preserve what was dearest to them both — their marriage.

Pryor attended Olivet College. All of his telephone experience has been at Detroit where he started in 1926. He has been supervising manager of the company's Downtown Detroit District.

PLAN NOW FOR GARDEN NEEDS OF THE YEAR

Garden planting time is here. Most important feature of the garden plan is provision for an adequate supply of fresh vegetables until the first frosts come. O. I. Gregg, extension specialist in horticulture, Michigan State college, says that a garden 25 by 50 feet in size or larger, if properly planned, is sufficient to supply a year's fresh, canned, and stored vegetable needs for a family of three. However, fresh vegetables must take up just enough room to provide the amount needed.

Succession planting makes it possible to grow certain vegetable crops without providing additional space. For example, peas for canning should be planted as early as the ground can be worked, with tomatoes following in the same location. Peas stand freezing without ill effect, and are harvested before the tomatoes are planted.

Short season crops, like lettuce and radishes, take up little room and can be planted far enough apart to permit growing long season crops between the rows.

Late cabbage, brussels sprouts, and broccoli are important crops that can be used direct from the garden until late in the fall.

For canning, the vegetables that are economical of space in the

garden are snap beans, tomatoes, peas, chard, beets, broccoli, carrots, cabbage, sweet corn, cucumbers.

Announcing New Headquarters for GMC TRUCKS

Earl Vivier

33205 Grand River Farm. 0184

Here's "welcome news" for truck owners and operators in this territory. As local sales and service representative for GMC Truck & Coach, this new firm will feature large stocks of genuine GMC parts, experienced truck-trained mechanics, approved truck servicing methods and equipment, as well as GMC's original Preventive Maintenance. Stop by at your earliest convenience and get acquainted with an organization that is unusually well qualified to handle your war-time trucking needs.

GMC SERVICE Keeps Your Trucks on the Job

Victory Maintenance is GMC's answer to wartime needs for peak performance, lower operating costs and longer truck and life. It applies the principles of preventive maintenance procedures in America's most successful fleet operations. It features time-saving, money-saving repairs, adjustments and recommendations much as 30 to 50% on Road Cost up to the time pullets are ready to lay. See us today for more information about this economical rearing plan.

ARMY GMCs Serve Every Branch of the Service

GMC Truck & Coach is one of the largest producers of military trucks, thousands. These "War" trucks are loaded with the best of GMC's commercial GMC trucks. The new GMCs which will be available in the future will benefit by the same engineering and manufacturing skill that have gone into the production of Army's leading transport vehicle.

THE TRUCK OF VALUE GMC TRUCKS GASOLINE DIESEL

A TELEPHONE CAN'T WORK BY ITSELF

Like others, the Bell System will have to convert its telephone factories to civilian production after the war. But when post-war automobiles, refrigerators and washing machines leave the manufacturers, they'll be ready to use. With telephones, it's different.

After we get new instruments and equipment, there is the long, painstaking job of installing and joining them to the present system.

Many new buildings must be erected; others enlarged. Billions of hand-soldered switchboard connections will have to be made. It's time-consuming — even a small section of central office equipment contains thousands of those connections, and space allows only a few men to work on it at one time. Then, too, thousands of miles of wire and cable must be constructed to connect telephones to central offices.

So that we can provide service for the 100,000 orders on our growing waiting list and again install telephones promptly wherever wanted, Michigan Bell plans a five-year post-war construction program costing \$120,000,000. But even working at that rapid rate, it will take at least two years before telephones generally can be installed without delay.

If you are waiting, we appreciate your patience and understanding. We will supply you with service just as quickly as we possibly can.
