Good Business

IT IS AN ESTABLISHED FACT THAT NO CORPORATION OR PLANT OPERATES WITHOUT ADEQUATE POLICE AND FIRE PROTECTION. IT IS GOOD BUSINESS TO HAVE IT.

HOW THEN, CAN A COUNTRY HOPE TO OPERATE WITHOUT AN ADEQUATE ARMY AND NAVY?

Our Policy

It has come to our attention that considerable discussion has taken place regarding the policy of this paper. We should like to make our policy clear to our readers.

The Farmington Enterprise is your paper and you will find the columns open for your comment at any time. Our aim is to serve the entire community — such service can be accomplished only if this paper opens its columns for the expression of its readers. We invite your comments.

We are deeply interested in the growth of Farmington and we will support and promote any issue which might serve to place our city at the head of a list of growing, progressive communities.

From time to time, as questions come up, you may find we will take a definite stand, either for or against a specified proposal. You may be sure this stand is not the result of pressure from an individual, or from an organization. It is a stand at which we arrived only after careful consideration, determining, to our complete satisfaction, the advisability of such a move. We will fight for any issue which we feel will keep Farmington progressive and abreast of the times, making our city more attractive as a place in which to live. That means we must maintain excellent city and township government, present a well kept appearance, have good public facilities which meet the demand and are modern, a good business and shopping district, the best school system possible, and a group of churches, representing several faiths. No community could be considered by newcomers as an ideal place in which to live without any of the above.

Our policy in the past has been to back any move which would mark improvement in these various essentials. It is the policy we intend to maintain.

The Right To Yip!

Another right that we Americans want to keep is the right to howl when we don't like what's going on.

In collectivist or totalitarian governments, there's only one side. You agree, or you get shot or sent to a prison camp.

Our American system is far from perfect. But we have two sides, and we can still yip and yap. Let's improve our own system of individual initiative, enterprise, hustle and healthy competition — instead of copy-cattng any other country's scheme of too much government bossing — and being told to fall in line and shut up, or go to the hoosegow.

Chemicals Kill Weeds
Weed-killing chemicals should be investigated if you have a very small patch of bindweed, Canada thistle or some other noxious weed. If a large field is infested, better plan some kind of clean cultivation or smother crop method. Chemicals are high-priced and scarce.

Make Paperhangers' Paste
Paperhangers' paste is made from a cheap grade of rye or wheat flour, mixed thoroughly with cold water to a thin dough. Stir in a tablespoonful of powdered alum to each quart of flour, then pour in boiling water, stirring till the paste is cooked.

Churches

FIRST METHODIST
Rev. A. Stanley Stone, Minister

10:00 a.m. Sunday School, for fourth grade and above.
11:00 a.m. Sunday School, for nursery through third grade.
11:00 a.m. Morning Worship.

7 p.m. Youth Fellowship Meetings.
Wednesday, 8 p.m. Prayer and Bible Study.
Friday, 8 p.m. B.Y.F. "Fun-Night."

Are Michigan's inland lakes over-fished and over-populated? With the panfish season opening next Monday (June 25), it's going to be pretty hard to control some Michigan sportsmen, especially if they return home with a poor catch, that was the reason. And yet the conservation department's

FIRST BAPTIST CHURCH
Walled Lake, Michigan
Richard Nyburg, Pastor

"Three Confessions" will be the sermon subject of Richard Nyburg, pastor of the First Baptist Church of Walled Lake, Sunday at 10 a.m. The choir will sing "Unrationed Goods" will be his subject at 8 p.m. There will be a Singspiration Song Service with special music.

Vacation Bible School will continue until June 29th with classes each school day from 9:30 to 11:30 a.m.

CHRISTIAN SCIENCE SOCIETY
New High School Auditorium
Farmington

"Is the Universe, including Man, Evolved by Atomic Force?" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, June 24.

The Golden Text (Psalms 24:1) is: "The earth is the Lord's, and the fulness thereof; the world, and they that dwell thereon."
Among the Bible citations in this passage (Psalms 33: 6, 9): "By the word of the Lord were the heavens made; and all the host of them by the breath of his mouth. For he spake, and it stood fast; he commanded, and it was done."

Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (285): "God creates and governs the universe, including man. The universe is filled with spiritual ideas, which He evolves, and they are obedient to the Mind that makes them."

CHRISTIAN SCIENCE SOCIETY
NEW HIGH SCHOOL AUDITORIUM, FARMINGTON

A Branch of The Mother of Churches, The First Church of Christ, Scientist, Boston, Massachusetts
Lesson Subject
"Is the Universe, including Man, Evolved by Atomic Force?"

Wednesday Evening, 9 to 9:30
Friday Evening, 6:30 to 8 p.m.
Saturday, 2 to 5 p.m.
Current Christian Science Literature on sale Wednesday evenings

ALL ARE WELCOME

Looking Back Through The Enterprise Files

TEN YEARS AGO (July 4, 1935)
Plans Made To Curb Speeding

That definite and possibly drastic steps should be taken in the near future to bring to the attention of motorists the danger and seriousness of reckless driving and excessive speeds particularly within the Farmington city limits, was the subject of much discussion at the City Commission meeting Monday evening.

Bids Taken On Town Hall Repair Work

Confronted with the problem of the rapidly deteriorating Farmington Town Hall, the City will repair the roof and the gutters sometime during the summer it was tentatively decided at the City Commission meeting Monday evening.

City Applies For Work Relief

Of the \$1,000,000 which is to be spent by the Federal Government in Oakland County in the near future on work relief projects, the City of Farmington has applied for approximately \$12,000, which figure represents sewer and water main work that should be done within the next year. Present plans are that the Federal Government will pay all of the labor expense and 20 per cent of the material expense, leaving 80 per cent of the cost of materials to be furnished by the City.

FIVE YEARS AGO (June 20, 1940)
Work Progresses On New Theater

Work on the new theater building is progressing and at present interior work is being done by carpenters and electricians. Some work is also being done by the plumbers. The electricians have not yet begun work on wiring the building but it is expected that this will be gotten under way shortly.

Approve Township Water Plan

First steps were taken Tuesday night by members of the Farmington Township Board to provide a long-desired water system for persons living in the southeastern portion of the Township. Petitions prepared to the Board signed by 150 persons who agreed to subscribe for the service if it was obtained. Harry Christman, who has been canvassing the area for subscribers stated that there would probably be more persons who would want the service after it had been started.

Prepare New City Building

Work is under way to prepare the building formerly occupied by the Peoples State Bank for occupation by the Farmington municipal offices. Contracts have been let for the reconstruction of the interior of the building and also for minor repairs which are to be made. The front of the building will also undergo repairs according to Mayor Leo Gildemeister.

partment's Institute of fisheries re- to grow up. Actually the opposite search at Ann Arbor suspects it is true at Grousehaven. But since last October, many of the experiments will be conducted by Dr. Albert Hazzard and are confined to one lake. If fish, other scientists tend to prove that the natural limit of food in lakes, while it continues to be poor in others, controls fish population. Since the food supply is limited, if fish are not removed all fish become stunted. Too small for legal catch. Result: too small for poor! Bear lake in Hillsdale county is the first inland lake in southern Michigan to be designated by the state for a similar control. Tests show this lake to be overpopulated with fish that are stunted and underfed.

This whole idea, radical and unorthodox, caused many legislators to wag their heads in doubt and outright incredulity in 1945 when a bill, adopted by the state senate, arrived in the house of representatives for committee deliberation. The measure would have given the conservation department discretionary power to remove size and creel limits, if and when lake and stream conditions indicated over-population of fish.

Fearful that local sportsmen would rebel against such topsyturvy business, representatives cautiously amended the bill to permit the department to try it out on twenty lakes and ten streams but not more than one lake to any county. Then if results should be gathered to sustain the new beliefs, the legislature might consider extension to other lakes, and perhaps to the entire state. So went the reasoning, and it was good common sense.

Lending support to the research conclusion is the fact that fishing in nine Ogemaw county lakes at Grousehaven, newly acquired by the state, has been exceptionally poor. The condition was a surprise to sportsmen, for the lakes had been closed to the public for more than a decade. According to old-fashioned concepts, fishing should be better the longer fish were left undisturbed and exposed to light and air.

German Wood Bullets

Wooden bullets, which the Germans are said to have used at Chemnitz when hard pressed for ammunition, and which they presumably might use again, are practically invisible in X-ray pictures of the wounds they make. Dr. Norman P. Henderson reports in the British Medical Journal. The wooden bullets, said to be effective up to about 100 yards, break on solid structures such as bone, and the scattered fragments are not likely to be located by X-rays.

Use Mothproofing Liquid

Watch the danger spots for moths. They tuck away in corners, under radiators and heavy furniture, on stair risers and near baseboards. It's important to generously spray these areas twice a year with a mothproofing liquid. To combat moths keep rugs thoroughly clean and exposed to light and air.

BITS OF THIS AND THAT

By ELMER T. POCKLINGTON

MY FRIEND

He is my friend who golfs with me
Or sits beside me as I dine;
He is my friend who shares with me
The joys and sorrows that are mine.
He is my friend who comes to me
When troubles settle like a cloud,—
When sorrows have encompassed me
And seem to clothe me as a shroud.
But he who'd really be my friend
In all the ways the name implies
Must also share his griefs with me,
No matter what their kind or size.
If you have had a friend like that,
Right now he's foremost in your mind;
Acquaintances are made with ease
But FRIENDS, real friends, are hard to find
