HIGHLIGHTS IN PACIFIC AREA

NEW YORK — As the occupation of the Tokyo area got well under way, other events cast their shadows on many sections of the Far East. The above map provides highlights on several important developments. As indicated, the Russians have occupied all of Sakhalin and virtually all of the Kuriles. Gen. Stilwell has cracked down on the Japanese in the Ryukyus and their settlement areas all of the tin and coal surrender business in the Carolines and Marianas.

Egg Protein Efficient For Building Body

By L. A. Ault

Every soiled, sanitary egg contains a yolk and a white filled with nourishing foodstuffs. The protein of both the yolk and the white are equally for building and mending body tissues. The yolk contains 13 minerals needed by the human body are found in the edible portion of the egg, largely in the yolk. The iron content of the yolk is high in comparison with other foods and the fact that this iron is associated with copper in both the white and yolk, makes the iron most available for blood formation. Miss Hazel Brasley, extension nutritionist. Eggs are important sources of most of the essential vitamins. And as with the minerals the yolk is richer in health-giving vitamins. These vitamins include riboflavin, which is essential for health and vigor; thiamin, also called B1, which steadies nerves; niacin, which helps in preventing and curing pellagra; vitamin K, an anti-hemorrhagic factor; vitamin A for healthy body tissue and vitamin D for promoting the best use of calcium and phosphorus. The egg is a bargain in food value at almost any price.

WEST POINT PARK

By L. A. Ault

The Wilsons, with their young twin daughters, who formerly resided in the Broquet property on Norfolk Ave., but now live in Detroit, were calling on old friends in West Point Park Thursday evening. Miss Helen Ruth Ault has returned from a few weeks visit with friends in northern Ohio. Harold McVicar is spending the Labor Day holidays fishing near Alpena. Mrs. J. W. Ault visited with her granddaughter, Mrs. Edwin L. Johnson, over on Clirita Drive. Mrs. Johnson has been ill the last ten days. Charles Hoff, Mayfield Ave., is on a fishing excursion at Lake St. Clair. Miss Lora Anne Ault has entered the employ of the J. L. Hudson Co. Little Miss Mary Ann Hoff, of Mayfield Ave., is having a week's visit with her grandmother Hoff in Detroit. Mr. and Mrs. Herman Keyser of Huntington Wood spent Sunday evening with their cousins, the Emersons, Aults. Mr. and Mrs. Joe Roberts, Mayfield Ave., have gone to Canada for a two weeks visit with relatives. Mrs. Margaret Martin and Mrs. M. E. Ault picnicked at Walled Lake Thursday with a group of relatives from Detroit. Mr. and Mrs. Norman Kauranen and daughter have returned home after attending funeral services of Mr. Kauranen's mother in northern Michigan. Mr. and Mrs. Edward Stromoski from near Eloise, were calling on relatives in West Point Park Friday evening. Mrs. Stromoski has just returned from a trip to Denver, where she visited a married daughter. Mr. and Mrs. Carl Berland of East Side Detroit were Thursday evening dinner guests of Mrs. E. Ault. Jerry Bolyard has been vacationing with friends near West Brauch. Mr. and Mrs. Oman from Toledo were visiting friends and their son, Jack Oman and family of this section the first of the week. Mr. and Mrs. Russell Ault and daughters, Dolores and Shirley, have returned from a week's vacation trip during which they visited Niagara Falls and points near Pittsburg, Pa. and Akron, O. Young Wesley Grundy, Hubbard Ave., was reported on the sick list this week-end. Miss Norma Juid, from near Grosse Point, is again the guest of relatives here, but shortly re-

Powerful New Sunlamp Tans Skin Rapidly

Capable of converting any room into a "beach at home," an electric lamp being manufactured is so rich in ultraviolet energy that it tans human skin three times faster than Old Sol in midsummer. Only five minutes exposure is required to mildly redden the untanned skin of a person of average complexion who basks 24 inches from the lamp. To get the equivalent color, one would have to sit under the sun at the Jersey seashore for 15 minutes. Because its base is the same type and size as bases for regular household incandescent bulbs, the sunlamp can be screwed into any regular light socket operating on standard alternating current electricity. But for convenience in aiming and in handling, a simple adjustable portable holder for the lamp is recommended.

Safety Nevada Although railroads are handling a greater amount of high explosives on account of the war than ever before, not a single railroad employee lost his life in 1944 as a result of accidents in connection with the transportation of explosives. Seven accidents due to the transportation of explosives took place in 1944. These resulted in only one person being injured and a total property loss of \$75,440. One accident took place in connection with the transportation of fire works, which six accidents resulted from the transportation of military explosives. In the past 11 years, there has been only one fatality resulting from accidents in connection with the transportation of explosives and that one took place in 1939.

Dangerous Cargo

In connection with the transportation of great quantities of dangerous articles, other than explosives, handled by the railroads in 1944, two persons were killed and 40 injured. These two fatalities resulted from accidents in connection with the handling of gasoline. Accidents in connection with the movement of various dangerous articles other than explosives totaled 990 in 1944. Of this number, gasoline accounted for 170, electrical storage batteries, 170; crude oil, 153; sulphuric acid, 72; nitric acid, 46; and naphtha, 30. Property damage in connection with fires and explosions resulting from such accidents totaled \$568,283 compared with \$1,132,120 in 1943, when there were 956 accidents and six fatalities.

Safe in Feed

Well over 700,000 tons (14,000,000 bags) of commercially mixed feed containing urea as an ingredient were fed to ruminants in the United States during the past year with satisfactory results, according to a statement compiled by a special committee selected to review technical and practical backgrounds of urea feeding. Extensive studies at leading agricultural colleges and experiment stations in the United States demonstrate without exception that urea, in scientifically safe amounts, is properly assimilated, the committee said. It can efficiently replace a limited portion of the normal protein in the diet of such ruminants as dairy cows, growing heifers, steers and range cattle.

Sandpapering Shine

Where clothes' shine results from wear, sandpaper's abrasive action may raise a garment's nap again. However, the remedial effect will be only temporary and the fabric will be permanently weakened. Light scorch effects may be removed by sandpaper, whereas deeper ones will be impossible to remove. And an undesirable weakening of the fabric which may develop into a hole simply cannot be avoided when sandpaper has been used. Removal of heavy scorch is generally attempted even by professional cleaners. They can, however, often successfully treat the shine caused by faulty pressing at home. Often, too, light scorches can be removed by means of an oxidizing agent.

Interesting way to the testing place of the atomic bomb.

Mrs. Carter received a large number of useful and lovely gifts. "Homecoming Day" is announced for the Neighborhood Bible School next Sunday morning, Sept. 9th at 14 a.m. Those who have spent most of the summer on vacation trips are urged to return ready to begin another year of whole-hearted Christian endeavor. Rev. Axel Edwards will preach a special sermon at the 6:30 evening service in the Neighborhood Church and all the neighbors are invited to step in for the hour of good music and preaching. Leonard Broquet, from Northville, visited with his father, F. Broquet, Labor Day. Friends heard this last week from WAC Shirley Zwaalen, who formerly lived on Farmington Road. She has never been in Japan but is very busy at a military hospital in Virginia and expects to get a discharge before many months. Staff Sgt. Robert M. Hunter of Mayfield Ave., who spends most of his time at the Clovis, New Mexico air base, writes that he came close to being near in an

Get Most From Spinach

Here's how to make the most of spinach when you cook it: Use as little water as possible, have it boiling and salted when you put the spinach in. As a matter of fact, you can cook it without water, if enough cling to the leaves after washing. Cook as short a time as possible, and cover, so the greens will cook more quickly. Serve all the juice with the vegetable or if that makes the vegetable watery, serve the juice in your "vitamin bottle." The juice is a good base for soups or gravies, and adds a new tang to a tomato juice cocktail. It's full of vitamins and minerals, you know.

Slum Housing

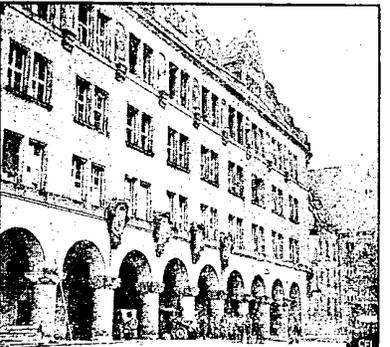

In America we have 8,000,000 slum or sub-standard houses, and are demolishing them at the slow rate of 40,000 a year.

FIRST MEETING OF NEW COUNCIL

LONDON, ENGLAND — A history-making occasion, the first meeting of the Executive Committee of the Preparatory Commission of the United Nations is pictured here. Sir Alan Church, Honorary Secretary, the committee heard Mr. Noel Baker, Minister of State, who presided, deliver the opening address. Mr. Wellington Koo, Chinese Ambassador in London, replied to the opening speech. This British official photograph shows Mr. Noel Baker delivering his address.

WHERE WAR CRIMINALS WILL ANSWER

NUREMBERG, GERMANY — An exterior view of the Palace of Justice in Nuremberg, where big-wigs of the Nazi hierarchy will go on trial for their war crimes. The courtroom is on the third floor of the building. A group of American soldiers and a Jeep stand outside the building here. Trials will start probably by October 15th.

USO ASSISTS OVERSEAS MAILING

Asked by the War Department to participate for the third successive year in a campaign to promote early mailing of Christmas gifts to men and women overseas, USO officials are pictured above as they met with Brigadier General William E. Chickering, chief, Army Postal Service. With Gen. Chickering are Miss Roxana Jackson, director, USO Volunteer Services, and USO President Dr. Lindsay F. Kimball. Christmas gifts to men overseas should be sent between Sept. 15 and Oct. 16.
