Keep Our Teamwork

Throughout the war our papers and newspapers repeated over and over again the extreme importance of teamwork — on the home front and on the fighting front. During that time, whatever the reason may have been that prompted it, we did work as a team. There were differences of opinion, but be sure, in business and in military matters, but at least we worked out these differences and preserved a close harmony and singleness of purpose in almost all instances. Perhaps it was because we realized that if once we broke our unity we would be lost, and it was that fear, greater than anything else, which kept us all in line.

What can be accomplished by united effort is apparent, for did not the Allies win the war, and in a much shorter length of time than many of our military analysts thought possible, thus saving American lives?

Now that the fighting has ceased, we seem to have forgotten all about teamwork. It will be just as easy to lose the peace as it would have been to lose the war if we hadn't worked together, and yet there are those who appear willing to jeopardize the future of the entire world by allowing selfish interests to take precedence over cooperation and united effort.

This is no time to let down on our determination to "win the peace," and it seems to us a little understanding will go a long ways in preserving our unity of purpose.

Some people, of unsavory memory, made money out of the war which our boys won with their blood — and some other people helped the conscienceless black marketeers every time they paid even a few cents above ceiling for cigarettes or steaks or whatever.

But the truth should be made known that established manufacturers, both large and small, who produced such a miraculous quantity of war materials to arm and equip our troops, actually made much less money in peacetime — which was as they wanted it.

It is a known fact that one of our largest corporations voluntarily limited its profits and averaged only 4.7 cents per sales dollar, half the amount it earned in 1941, although its sales and employment doubled.

So it went all down the line. And as to individuals — one of our highest industrialists got a net of \$4,000 a year salary after taxes!

It is needful that these facts come out now in official reports, in view of some labor dictators' unrealistic demands.

It's high time we protest at being led around by the nose, and recognize the fact that we must continue teamwork or we'll find that we have lost everything we fought to preserve.

Sugar Savers
As sugar savers, use dried fruits, rich in natural sugar, to add sweetness to desserts. Fill layer cake with chopped dried fruit, mixed with nuts, and moistened with honey or corn syrup. Make steamed dried fruit into fruit chips, or fillings for pies, turnovers and tarts. Toss dried fruit in the center of baked apples or pears, fill with raisins and corn syrup or honey, or with mince meat.

Opened Mesabi
It was in 1892 that Henry W. Oliver, a Pennsylvania delegate to the Republican National Convention at Minneapolis, heard of a new iron range at Mesabi, Minn. He hurried to Duluth, spent his first night sleeping on a billiard table because the town was filled with prospectors and every hotel room was occupied. Oliver bought a horse next morning and set out through the wilderness to Merritt's camp. Impressed by the possibility of feeding the then infant steel mills of Pittsburgh from this vast new source of ore, he leased a mine and returned to the East. That move "rubbed the lamp of Aladdin." It brought together the expanding needs of the blast furnaces with mountains of newly developed ore.

Fire Every 15 Minutes
A farm home or farm building catches fire every 15 minutes during the day in the United States, and the cost of these farm fires totals around a quarter of a million dollars each day, reports the U. S. department of agriculture.

Churches

FIRST METHODIST
Rev. A. Stanley Stone, Minister
10:00 a.m. Sunday School, for fourth grade and above.
11:00 a.m. Sunday School, for nursery through third grade.
11:00 a.m. Morning Worship.
Youth Fellowship, 7:00 p.m. Sunday.
Thursday, 7:30 p.m., Choir rehearsal at the church.

Evening Prayer Circle at 7:00 p.m.
The Pastor will bring the second in a series of messages on the theme, "At Night in the Bible."

CHRISTIAN SCIENCE SOCIETY
New High School Auditorium
Farmington

"Doctrine of Atonement" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world, on Sunday, October 21.

The Golden Text, (Mark 10:15) is: "The Son of man came not to be ministered unto, but to minister, and to give his life a ransom for many."

Among the Bible citations in this passage (John 1:18): "No man hath seen God at any time; the only begotten Son, which is in the bosom of the Father, he hath declared him."

Correlative passages to be read from the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, include the following (19): "Jesus aided in reconciling man to God by giving man a true sense of Love, the divine Principle of Jesus' teachings, and this true sense of Love, the divine Principle of Jesus' teachings, and this true sense of Love redeems man from the law of matter, sin, and death by the law of Spirit, — the law of divine Love."

CHRISTIAN SCIENCE SOCIETY
NEW HIGH SCHOOL AUDITORIUM, FARMINGTON
A Branch of The Mother Church, The First Church of Christ, Scientist, Boston, Massachusetts
Lecture Subject
"DOCTRINE OF ATONEMENT"

Looking Back Through The Enterprise Files

TWENTY FIVE YEARS AGO (October 29, 1920)
President Of B. Of C. Favors Co-Operation
Mr. Thomas H. McGe, president of the Board of Commerce of Farmington, stands ready to co-operate and assist in solving the problems arising common to the communities adjacent to Farmington. President McGe feels that the communities will have a planning program in the few years and that many vital questions pertaining to the economic and social life of the community will have to be solved in order to make these northwestern suburbs of Detroit, the fourth in the United States, a desirable place to live both for the old settlers and the newer residents. He states that many problems arise which can be solved only by the co-operation of the citizens and the Board of Commerce.

Important Topics Discussed At Meeting
Definite action was taken by the Board of Commerce when a committee of four was appointed to wait on the D. U. R. in order to try and secure better service. Members thought that possibly the D. U. R. could extend the schedule of the Grand Lawn cars. Another question which received consideration was the ways and means of caring for those men who were out of jobs either on account of sickness or of slack work. It was brought out that there would be many valuable work for the school committees to perform in the way of service to the people of Clarenceville.

Martha G. Murphy To Investigate Health of School Pupils
The local committee of the Red Cross has arranged to have Miss Martha G. Murphy come to Farmington for the purpose of investigating the general health of the pupils of the public schools in order that the parents may take the steps necessary to remedy any condition which may be a detriment to the welfare of the children. The local committee is composed of prominent citizens, the majority being doctors who have cheerfully offered their services for the good of the general health of the children.

TEN YEARS AGO (October 31, 1935)
First WPA Work To Begin On Monday
Farmington's first participation in the Federal Administration's gigantic works program will get under way Monday when 25 men will start in the city on improvements involving \$4,820.25. Also approved by Washington, and scheduled to be undertaken during the winter, is a Township project which was the largest, submitted in this area, that of a drainage system covering a large area in the vicinity of North Farmington, Twelve and Thirteen Mile roads. This project, originally planned to cost about \$17,000, will employ a large number of men, although its extent and cost has been reduced by WPA officials by \$4,000. It is still the largest single job in the township of city.

Water Waste Reduced By New Cooling System
A milk cooling system designed to reduce the waste of water in being installed at the Farmington Dairy. It will be in operation by the end of the week according to the announcement of Joseph Himmelman, manager of the building, and scheduled to be undertaken during the winter. Mounted on the building, the tank will provide the means whereby 3500 gallons of water will be cooled each hour. The water will then circulate in the refrigeration system which in turn will cool the milk in the past the water has been drained after being used once. The new system permits the continual use of the water.

FIVE YEARS AGO TODAY (October 17, 1940)
Judge Moore Reports On Juvenile Court Activities
Judge Moore this week released his semi-annual report concerning the Juvenile Court. The report stated that during the period between March 1, 1940 through September 1, 1940 delinquency petitions were filed as to 136 delinquent cases in this county, 120 boys and 16 girls. The county has had in boarding homes during this period between fifty and sixty children who are dependent or neglected children. In addition the County has constantly maintained something in excess of sixty dependent children in the Oakland County Juvenile Home as well as a varying number of delinquent children who have been kept in the Juvenile Home for training.
\$39 Sign Up In Township And City
Registration of 839 young men of Farmington Township and the City of Farmington between the ages of 21 and 35 inclusive was completed Wednesday without undue rush or confusion. The registration went off smoothly in both of the Township registration places and the City Hall where Farmington eligibles registered, largely because there were plenty of volunteer registrars. A total of 637 young men from Farmington and 202 from the City registered at Precinct One, and 371 at Precinct Two, in the City registration totalled 202.

Lakes, a benefit to the tourist industry.
Revision of the state juvenile institute commission and possible reforms and improvements at the Boys' Vocational School, Lansing.
The veterans' multiple problems are not easy to solve. In the first place, there are five times more Michigan veterans today than 25 years ago, after World War I.
To divide \$31,000,000 equally among the 629,000 veterans — a number likely to grow larger before the sum is expended — would put less than \$50 in the hands of each veteran. The average bonus for World War I veterans was \$210, computed individually at the rate of \$16 per month of service. The federal mustering-out pay varies from \$100 to \$300, well eclipsing an \$80 Michigan payment.

Michigan Mirror
INTERPRETING THE NEWS

How Michigan should spend its \$50,000,000 veterans' reserve fund, already \$100,000 richer because of accumulated interest, is one of several issues which will confront the state legislature in special session early in 1946.
Michigan's 629,000 veterans, of whom approximately 500,000 are still in the service, are interested chiefly in the decision.
Other legislative problems include these:
Revision of the state's \$20,000,000 building program. Rising labor and material costs have already exceeded the appropriation.
Veterans' education and housing.
State educational institutions such as the University of Michigan and Michigan State College. No housing is available for veterans and their wives (plus children for some) at college dormitories.
Construction of 15 harbors of refuge for small boats on the Great Lakes.

To equal the state bonus of the last war, the legislature would have to appropriate \$350,000,000 more for the veterans' reserve fund. This isn't likely to happen. Other needs being what they are.
The first state bonus cost taxpayers \$33,451,633.49, of which the veterans received \$1,395,005 and (Continued on Page Eleven)

BITS OF THIS AND THAT

By ELMER T. POCKINGTON

LIFE, THE TEACHER
And so another Summer's gone
As Time unceasingly moves on.
Has it but added to our years,
Has it increased our doubts and fears?
If so, it has been worse than lost,
Been worth far less than what it cost.

But if, through days of joy or pain,
Of Summer sun or dismal rain,
We've learned to better walk life's road,
We've learned to better bear life's load,
Then we may feel the time that went
Has been invested, — not just spent.

From books and teachers we may learn
The good to choose, — the bad to spurn;
Though friends may counsel and advise,
However good, however wise,
One teacher always is the best, —
We learn from LIFE more than the rest.
