Pecilia improves Peaches
Time spent in peeling peaches for
dehydrating of home-drying pays dividends in lattacetive color, tenderness and fine flavor. In tests, varietics of peaches that rated excellent
when peciled, rated no better than
good when junipeeled and those that
rated good to fair when peeled
proved poor or very poor when unpeeled. Tests showed also that the
stage of ripeness which is best for
canning is best for drying.

Cage Even Fails to Curb Thieving Crow

CLEVELAND.—They put Sammy, the incorrigible thieving crow, in solitary confinement at Brookside zoo after he stole a set of automo-
