EXPERIMENTS INTRIGUE EIGHTH GRADERS

Recently Junior High boys have onducted science enperiments those done in high school laboratories.

similar td those done in high school laboratories.

Bob Erickson showed how pressive from steam could be used by placing a glass, jar of water over a burner. When the water byled, steam caube out the curved glass tubes at the top of the jar and turned a small wheel at the end of the tuber. Another experiment showing what happens when a mixture of ice and water is heated was, conducted by Raiph Heron. The result was the water cooled to approximately 32 degrees P, and then the temperature remained stationary until the fee was nearly additional heat to melt the remaining in the proximation of the proximately and the proxi

biographies

Virginia Erickson

If yoh happen to watch a Farmington football or basketball game, look for the girl who does the most cheering, and it's amost certain Viginia will be that girl. She most cleering, and it's amost certain Viginia will be that girl. She most cleering, and it's amost certain Viginia will be that girl. She list of the Christian service. Ideal date: Blond, blue eyes, 6 ft. and weighs in at 1/6 pounds. Amy sports activity would make their date ideal. However, the company of the service of the service

Dolly Tipu

This senlor has seen 17 years of life, and so have her brown oyes and light brown hair. Ambition:
College and them maybe dentistry.
Ideal date: 5 ft. 8 or 9, dack wavy hair; a sense of humor is a must.
She would like to visit a nightclub-Pavoitte Song: "Til The End of Time" (Say, that Chopia sure must be popular.) —M.H.W. Dolly Tipu

FORECASTINGS

Be on the look out to a mage pair of black handled scissors! For the first time in five years, these scissors, which belong to the li-brary, are missing. Miss Abbott, the librarian, has searched in vain the intrarian has searched in valit for the present owner. Probably uses them to trim his mustaches

With a water gun in one hand and a sly grin on his face, the so-cial living teacher walked down the hall.

EXAM BONERS

OWNERS MAY CLAIM

New things are learned every day. Here are some of the state-ments made on recent examina-tions that the faculty swallowed with a grain of salt:

with a grain of sait:

Biology — The three bones of the ear are "the knife, the Jork and the spoon"; the three bones of the ear are "the knife, the Jork and the spoon"; the three bones of the ear are "the bow, arrow and dart". Chemistry — The odor from a rotten egg is due to "breaking; the shell". English — The Odys.

Sy is "the tail of a man coming, home from the war"; the principal parts of the verb choosel are "choose, goose, geese"; the phrain of the word sheep is "many sheep"; the meaning of the word definitely is "when you positive"; the definition of the word campeted is "hidden or under cover, when something is hid so other people then the temperature remained stationary until the few was nearly all melted. After the water cooled to about freeding temperature, additions heat to melt the remaining ice hame from surrounding HLS. BAND
