LET US CLEAN HOUSE!

Every person who cares for the welfare of our public School system in Farmington should rise up in indignation at the action taken last week by the School Board; and take immediate steps to oust the present "Power Politics" from the Board.

Against the wishes of the majority of parents and taxpayers of this community, the School Board voted not to renew the contract of Supt. Ayres for the coming school year. In spite of petitions signed by hundreds of taxpayers and parents of this community asking that Supt. Ayres be retained for the coming year; this School Board has voted to ignore the voice of the people. If allowed to proceed unchallenged this action will permanently injure our school system.

Mr. Ayres has done his work efficiently, and well, and is a credit to this community. He is very well thought of by all but a few who, for personal motives wish to deprive us of his fine services and talents.

As a parent, and taxpayer in the Farmington School District, I appeal to other such persons in this community to take immediate, and ACTIVE steps to register a protest against this action taken by the School Board. It is high time that the people of Farmington did some real housecleaning on this School Board.

Are we going to stand by and see this Board deprive our community of the services of one of the best men that the Farmington School System has had the privilege of enjoying? I for one demand action to retain Mr. Ayres for the coming year!

It is time that we not some punks on the school board that will render service, comply with the desires of the taxpayers, and consider the welfare of our school system above their personal bias and dislikes.

Are we to continually lose the best men in our school system through "Power Politics" on our sliced Oranges?

According to recent research, only one-third of an orange of the vitamin C in an orange is used. Even less is obtained if the juice is strained. An economical and healthful way to serve oranges is in segments or slices.

American Red Cross Aids Wounded and Able-bodied

Not long ago a Red Cross field director with an outfit on maneuvers flashed a message that the mother of a man in his unit was critically ill, and the man was needed at home immediately.

With this message from the soldier's Red Cross letter verifying the illness, the field director called on the commanding officer who arranged an emergency furlough.

While a courier sped up the line to fetch the soldier, the Red Cross man was busy arranging transportation.

Within a few hours the boy was at the Red Cross field office where furlough papers and a ticket awaited him. The field director drove him to the airport, and the boy arrived home in time to see his mother die, but to save her life with a blood transfusion.

Today, almost seven months after V-J Day, some 17,000 Red Cross workers are still with the GIs at home and abroad. Hundreds of clubs and rest homes overseas are in operation where men meet on leave, get home-cooked food, and that prime American favorite—doughnuts and coffee. Music and entertainment, books, magazines, and home town newspapers, lounge and writing room are all popular. For momentary respite, there are comfortable beds, clean sheets, and hot showers.

More important than Red Cross services to the obedient and those for the wounded and ill. In army and navy hospitals, the country over, professional and volunteer Red Cross workers serve in many ways.

To the hospitalized a financial or family problem may prey upon the mind and dull the will to recovery. Under guidance of Red Cross medical social workers many a problem is dissolved, and obstacle overcome. Programs directed by recreation workers help patients forget their troubles. Red Cross volunteers supplement these workers with every conceivable service.

The American Red Cross needs \$100,000,000 to carry on during the next fiscal year.

Because farm families have a big stake in the Red Cross they enthusiastically support the organization. The Red Cross is confident that families in agricultural areas, the backbone of the nation, will generously support the 1946 Fund Campaign.

School Board? Now is the time to make an issue of this injustice. Let us do something about it, what do you say?

In the interest of all concerned, I hereby appeal to you to voice your complete disapproval of the action taken by the School Board; and add your name to the petitions in circulation demanding that Mr. Ayres be retained for the coming school year.

Francis N. Langthorne

Uncle Sam Says

This lad in the coal mines near Wilkes Barre, Pa., buys a Savings Bond every month because he is going to be married. "I've seen plenty of sickness and layoffs in my time," says Joe. "I've \$375.00 in War and Victory Bonds now. Ten years from now \$5 bucks a month coming in. Imagine what that will mean to Irma and me, and maybe a couple of kids, specially if their diggings should be shut up for a while."

U. S. Treasury Dept.

Pacific Salmon
Pacific salmon are the most valuable fishery resource belonging to the United States.

Crockery Welcome to Brides
Wedding presents of crockery rank almost as high as silverware in South Africa, which has no potteries. Moreover, war has stopped crockery imports and many brides are happy to receive ordinary plates.

Hardware Heart
More than 5,000 beef carcasses have been condemned in a single year because of a condition known as "hardware heart" caused by cattle swallowing pieces of wire, nails or other sharp objects.

Hold Back Locks
Crochet a wide wooden band to hold back unruly locks, and it'll keep your ears warm, too.

The Early Way Method
Penmanship

Is comparable to football or basketball training in many ways. In order to write well one must continually think ahead of the action of the hand so that the hand will at all times be definitely controlled by the thought. Such procedure is required in all athletic activities. In fact, the greatest value of athletics to the student is to build the ability to think and act at the same time. Just as the best football players have been trained to think in advance of the action they are doing, plan the next move and the next, so the rightly trained penman must at all times have the hand under conscious control while planning the slant, spacing and direction of the coming letters. The training thus attained is one of the greatest values of learning a smooth, rapid and graceful hand writing. The ability to do this very thing is an accomplishment that is used in nearly every activity of our lives. One is unconsciously taught to rapidly plan a definite course of action and carry it out with dispatch and accuracy. Just another reason for learning the EARLY-WAY method of penmanship.
