**Killing Ants**

Ants can be controlled in yards or gardens by deep cultivation several times in fall, winter and spring to break up the ant colonies and to partially destroy them. For those that remain, mix one ounce of Paris green with one pound of brown sugar and scatter at the rate of one pound to 10,000 square feet. Colonies still remaining can be killed by putting small amounts of carbondiatide in the openings and then closing the entrance to the nests.

**Comments Call**

The only bird with a monument to it is the gull, which is commemorated by a statue in Salt Lake City for the services in destroying croaking grasshoppers.

**Dwelling Units**

There were over 57 million dwelling units in the nation, of which about 40 per cent were occupied by their owners in 1940.

Cash Increase  
"Cash in hand" for Americans increased over three and a half times during the period of World War II.
