Mystery of the Missing Farms

Yep, the number of farms in America is shrinking (by a quarter-million in the last five years!). What's happened to the missing farms? The land has been taken in by other farms, increasing the average size by twenty acres!

Does this growth mean farming's no longer a family enterprise? Just the opposite! More families own farms today than ever—only with labor-saving equipment they can handle more land, more work.

That's as it should be. The family farm is a fortress of democracy—
