Local Hudson Dealer Presents New Models.

The new Hudson has been enthusiastically received by the Hudson dealers who have previewed it. Mr. Wm. Shaw of Farmington, Hudson dealer for Farmington and vicinity who returned Thursday from Detroit where he attended a closed showing for Hudson dealers.

"Production of the new Hudsons is steadily increasing at the Hudson Motor Car Company's plants in Detroit," Mr. Shaw said. "The public showing and announcement of this entirely new automobile will take place in Farmington and vicinity as soon as all of Hudson's 3000 distributors and dealers have received their displays." Mr. Shaw said. At that time the full story of the new Hudson will be told.

"The new Hudson was made possible as the result of recognition by Hudson engineers of the fact that, if the American-made car is to give its owner the beauty and stability advantages found in low-built automobiles, and still maintain interior comfort and headroom, a wholly new approach would have to be devised, tested and proved and put into mass-production," Mr. Shaw said.

He listed the following as significant developments: "The new Hudson has a lower center of gravity than any other American automobile."

"It is only five feet from the ground to its top."

"It provides more headroom than any other mass-produced automobile."

"It is a car which upon entering, you step down into, not up on."

"It really cradles the passengers between the axles."

"Passengers in the new Hudson sit down within the foundation frame members cradled between the axles and completely ahead of the rear wheels," Mr. Shaw pointed out. "This, together with the car's low center of gravity, and unusually rigid construction, contributes to an easy gliding ride heretofore never experienced in motoring."

The new Hudson, Mr. Shaw added will be powered by a new Super-Six engine, the most powerful six-cylinder engine built today, and an improved Super-Eight engine.

Square Biscuits, Yet!

I see by a neighboring paper, that the round biscuit is on the way out. Yes, sir, home-management specialists have found that the square biscuit lends itself to assembly-line production and easy storage better than those customary ovals.

Well, we're all for progress, but that's one new idea we just don't cotton to. A round biscuit, spread nicely and decorated with snappy country cheese, looks like a biscuit!

And accompanied by a mellow glass of beer, it's a combination that you can't improve on!
