STATE OF MICHIGAN  
IN SENATE  
FOR THE COUNTY OF OAKLAND  
At a session of said Court, held at the Probate Office in the City of Pontiac, in said County, on the 25th day of April, A.D. 1948.  
Present, Honorable ARTHUR E. MOORE, Judge of Probate.  
In the matter of the estate of John M. Grace, deceased.  
Byron L. Lashier, Executor of said estate having filed in said Court a petition, praying for license to sell at private sale the interest of said estate in certain real estate therein described.  
It is ordered, that the 3rd day of May, 1948, at nine o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said Court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.  
It is further ordered, that public notice thereof be given by publication of a copy of this order, once in each week for three weeks consecutively, previous to said day of hearing, in the Farmington Enterprise, a newspaper printed and circulated in said County.

**WASHINGTON DIGEST . . .**  
(Continued from Page Two)  
an authoritatively informed, are descended from the two types, large and small, known in prehistoric times in Europe. However, in recent times (and now we are getting down to what started me rummaging), something new has been added. We now have developed what might be laughingly called "hot cows" and "cold cows."  
The "hot" are the Brahmas which have been introduced into our own American strains to insure them for our southern latitudes and for other purposes. As for the "cold" cows, cattle are known by their bumps. A Brahman has a large hump just about the shoulders, and the others of lesser rank have smaller humps getting down to something not much larger than a fever blister.  
The "cold" cow is quite a different thing. As might be expected, it comes from Russia where they invented the cold war, the cold shoulder and the common der Siberian cold, which is used to correct false ideologies, longevity and monopolistic capitalism.  
We stop to look to cows instead of capitalists, the cold has the opposite effect on longevity. According to a recent article in Food Industries, a McGraw-Hill publication, the Russians have produced, by a method of artificial insemination, a breed of early calf-hood, cows which live with a high output to 15 years, yield up to 100,000 liters of milk and give birth to 15 calves.  
The process is simple. One selects a calf from selected parents. It is put in an unheated barn where the temperature is kept at five degrees Fahrenheit. The barn, I take it, are much like the ordinary Soviet citizen's dwelling except that there is plenty of bedding and the calves are provided with earmuffs. A citizen of the U.S.S.R. doesn't need the earmuffs because he is only allowed to listen when the government thinks is good for him, and if his ears freeze it's all right with the censor.  
The results of the chilling process of calves appear remarkable, but for a moment would I doubt the veracity of the writer—despite my early experience with erroneous information concerning cows.  
**THE OLD ORDER**  
After the grey winter days New Hampshire avenue almost sparkles these spring mornings.  
The elm buds are spreading, and are checked of trim and limb make sharp patterns on the wide expanse of the huge Belmont house. This house now is occupied by the Eastern Star—no family ever could have done more than rattles about in that palatial mansion. I suppose there will be few such palaces built in Washington any more—one after another, they are being torn down.  
The Letter house on Dupont Circle is gone and a family hotel is rising in its place. Many other mansions, too big for embassies even, served as boarding houses for war workers and now they are empty and for sale.  
One huge house which I pass occasionally is opened when the third generation, which still retains some of the original fortune, comes to Washington for a wedding or a party. After that the house is sealed up again, the burglar alarms are attached and the old residence goes back to dreaming of the past.  
A part of this section of Washington—Dupont Circle—is being sealed off for a year while the roadbuilders burrow under the grass park to make an underpass for trolley cars and automobiles. This will be the final blow of disfiguration to Connecticut avenue, which has yielded gradually over the years since I first knew it, to the vulgar invasion.  
A block below Dupont Circle that once was gay with the chatter of nursemaids and children of the foreign diplomats sotto the British embassy. On the site today is a filling station. . . .  
Americans have eaten bananas since the 19th century but still many misconceptions concerning them exist, says Middle America Information. Not, we hope, that they should be kept in a refrigerator. . . .  
Two-thirds of all divorces are granted to women. Is that because of male chivalry—or the lack of it?

**VETERANS**  
From the  
**OFFICE OF VETERANS' AFFAIRS**  
LANSING

**OVA SERVES VETERANS IN TD HOSPITALS**  
The Office of Veterans Affairs was instrumental in establishing a standard order of procedure for sanatorium superintendents for use when admitting veterans to tuberculosis and the state. It was accomplished by enlisting the aid of the federal Veterans Administration, the State Department of Health and the Executive Office.  
The procedure protects both the veteran and the state. It protects the veteran by causing the execution and filing of Veterans Administration Form 10-P-10, which is an application for hospital treatment of a chronic disease. In the absence of the federal government, within 72 hours of admittance. It also requires the preparation and filing of a tuberculosis medical certificate within the 72 hour period.  
If the application is adjudicated to be service connected, the veteran becomes a patient of the federal government. This adjudication forms the basis for a pension in the amount of \$138 per month during the time the veteran is hospitalized, thereby providing care for veteran's family. The OVA follows up the application if adjudication is made.  
The total revenue collected by state and local governments was \$93 millions. Local governments got 7.5 per cent of this; state government had 22.5 per cent.  
The inflated dollar is putting everyone in the hole — citizen, local government and state government.  
Deficit financing looms for several county governments. Disbursements of all county governments in Michigan rose from \$64 millions in 1944 to \$80 millions in 1946. Such was the case. The dollar in 1946 was worth 71 cents. Today it is worth 60 cents.  
Deficit financing looms for the State of Michigan. Except for the year 1947 surplus, the deficit next year would be \$51 million.  
The state legislature is wrestling with the effects of inflation. Can the state cut its own expenditures to make up the gap caused by diversion of more revenue to local governments? Should the state cut out other state aids such as money to public libraries, welfare work to the poor, and so on? Should hospital beds be provided for the mentally ill? Should college buildings be finished?  
We can't lick dollar inflation by levying more taxes.  
We can check inflation by spending fewer dollars, deferring some expenditures, and putting this money aside for use later on when a dollar will be worth more than 60 cents.  
The Security Bond campaign, opening this week, offers each citizen an opportunity to act.  
Inflation is our Public Enemy No. 1.
