NEW 1949 FORD TO BE UNVEILED HERE THURSDAY NIGHT

The new 1949 Ford will be shown to the public in a preview tonight, Thursday, June 17, at 8:30 in the showroom of the Smith-Berling Co., Farmington Ford Dealers, it was announced Tuesday. Beginning Friday, the new Fords will be on

display from 8 a.m. until 10 p.m. and during the regular hours of business. The models for display will be the Tudor sedan, Fordor sedan, and the sedan-coupe. Prices have not yet been quoted.

THERMOMETER IS GOOD CHECK FOR HAY TEMPERATURE

The danger of a barn fire from spontaneous ignition of hay can be reduced through the construction of a simple hay prod thermometer to check hay temperatures, advises Fred Roth, farm safety specialist at Michigan State College.

When hay is stored with much over 20 per cent moisture content, danger of heating in the mow is present unless a mow drier is being used. Even small amounts of damp hay, if all in one spot, may cause heating in a limited area.

Heating of the hay takes time and checking should be done continually for two months after hay is put in the mow. A hay prod thermometer can be made inexpensively to give a good check of the temperature of the hay. The outfit consists of ten feet of one-half inch electrical conduit with an oak or ash point on one end to permit driving into the hay. Six one-quarter inch holes should be punched in the conduit at the point. A rubber pad at the bottom of the tube will keep the thermometer from breaking.

To use, the prod with the thermometer inside is inserted in the hay and left 10 to 15 minutes. The thermometer is then pulled up with the string and read immediately. Detailed instructions for making may be obtained from county agricultural agents.

If the thermometer reads 110 degrees F., the hay should be checked several times a day. At 100 degrees F., check every hour. Get higher than 130 degrees F. Don't work in the mow alone if the temperature is excessively high. Adequate fire fighting facilities should be at hand if heated hay is to be removed and someone who understands the correct removal of heated hay should supervise.

Dorothy Knowlton To Be Married June 19

Miss Dorothy Knowlton, daughter of Mr. and Mrs. William Knowlton of Grand River Avenue, will become the bride of Mr. Lawrence Syrett of Novi, on Saturday, June 19, at eight o'clock in the evening. The wedding will take place at the Novi Methodist Church, followed by a reception at Veterans Hall in Northville.

The ceremony will be in charge of the Intermediate Youth Fellowship, Miss Laurel Anderson, president.

CLARENCEVILLE SUNDAY SCHOOL TO HAVE PICNIC

The Clarenceville Methodist Sunday School will be held on Saturday, June 19. Games will begin at four o'clock, with supper served at six o'clock. All those going to the picnic will meet at the church at 2:45 p.m. The picnic will be held in the grove surrounding the Stanley A. Grace residence at 22000 Osamu Avenue. Games, stunts, races, a ball game, and prizes are all planned for the afternoon program. Free pop and ice cream will be served to all members of the Sunday School.

The Clarenceville Methodist Church will have a special Father's Day Service in the morning service at 11:15 a.m. next Sunday morning, June 20. The pastor, Rev. Elsie A. Johns, will preach and "Faith Of Our Fathers" will be the theme of the sermon. Special music will be provided by the Senior Choir. All fathers will be the guests of honor and will sit in a body. The oldest and youngest father will be honored, as well as the father having the most children at the service.

The evening service will be in charge of the Intermediate Youth Fellowship, Miss Laurel Anderson, president.

CULTIVATION MUST BE DONE RIGHT FOR BEST RESULTS

Cultivation is an important part of producing row crops, but A. G. Weidemann, soil science research specialist at Michigan State College, warns that it must be done correctly to be effective.

Control of weeds is the one main reason for cultivating row crops, he points out. Cultivating allows water to enter the soil. If soils have a tendency to crack when they dry out, cultivating will aid in preventing cracking which may otherwise sever plant roots and permit water to escape by evaporation between the cracks.

Weidemann advises that cultivation should be only deep enough and often enough to control weeds. Excessive cultivation is wasteful of time and energy and may even cause damage by cutting off the feeding roots if done too deeply. Experimental work in Illinois has shown about a 16 per cent reduction in corn yield from pruning the roots of corn at four inches with a knife. Cultivating too deep could have the same effect.

Weeds can be controlled, to some extent, more economically by working the soil before crops are planted, the specialist points out. After planting, when plants are still small or just coming up, most of the weeds in the rows as well as between the rows can be destroyed by use of a cutline, spike harrow or weeder. On soil that is not too badly crusted, the weeder will probably be more serviceable and economical. These implements will kill weeds without much damage to most crops but will not kill grass. For killing weeds in the row this is a good substitute for expensive hoeing.

Later when the cultivator is used, the ground should be well covered, but the cultivator run only deep enough to kill weeds without disturbing plant roots.

High Interest Rates Babyloaners served as the loan brokers or bankers of their day. Their rate of interest was 20 per cent annually.

ALWAYS PLenty OF CONVENIENT PARKING SPACE

Pierson Students Give "Cinderella Musicales"

The parents and friends of the children of Pierson School in Livonia Township were pleasantly entertained on a recent Thursday afternoon and Friday evening at the Livonia Methodist Church on West Seven Mile Road when they were taken to fairland in the production of "Cinderella Musicales".

Invitations and programs, shaped like Cinderella's glass slippers, announced the four acts, fireplace scenes, coach scene and the ballroom scene. A chorus of fifty voices did the singing. About three quarters of the school's children participated in creative work in music, art, dancing and dramas.

Much credit and appreciation is due to the committees of mothers, who contributed so much of their time and materials, and who worked so faithfully with the children and teachers in making the musicale such a great success. Committees on script, stage scenery and properties, costumes and music cooperated nicely. Special recognition is given to Brian Hotchkiss and his father who built Cinderella's coach.
