MSC STUDY TELLS STORY OF RURAL HEALTH NEEDS

Health needs and health services of rural Michigan families have formed the basis of a new bulletin written by Dr. Charles R. Hotter, Michigan State college research sociologist.

Purposes of the study were to measure the extent of needs for medical attention among farm families, whether adequate attention was given to these needs or if they were neglected, and to find the opinions of the families regarding their medical services.

Approximately 48 per cent of the 1,200 persons in the survey reported one or more symptoms within 12 months preceding the interview. Of this number, nearly one-third had used home remedies only, or had neglected the symptom entirely.

Further facts shown by the study were that 61 per cent of the families thought medical service in their community was good. The average expenditure per family during the year before the survey was \$50.46 for doctor's fees.

A copy of the complete 54 page publication, Special Bulletin 352, "Health and Health Service for Michigan Farm Families" may be obtained from your county Extension office or by writing to the Public Health, Department of Public Relations, Michigan State College, East Lansing, Michigan.

Four Farmington Boys Training At Great Lakes

Four Farmington men, John Oliver Riddell, seaman recruit, son of Mr. and Mrs. W. K. Riddell of 21131 Oxford Street, Elmer F. Brandenburg, seaman recruit, USN, son of Fred I. Brandenburg of 18620 Brentwood Street, Norman J. Bowman, seaman recruit, son of Mr. and Mrs. R. P. Bowman of 22300 Inster Road, are undergoing recruit training at the world's largest Naval Training Center, Great Lakes, Illinois.

Recruit training is the sharp break between civilian and Naval life in which the new Navy man learns the fundamental principles of the Naval service.

In the course of his training the

recruit is taught seamanship, Navy customs, terms, basic ordnance, gunnery, signalling and navigation. Upon completion of his training the recruit is assigned either to units of the Fleet or to a service school for specialized training.

New Cutting Device
William Manning, New Jersey, in 1931 was granted a patent for a mowing machine. Its cutting device marked an important step in development of the modern mowers.

From where I sit... by Joe Marsh

I'm Glad
We're "Different!"

There's a lot of difference of opinion in our county on the best kind of pasture. Some say alfalfa mixed with brome grass—others say mixed with oats or barley. But all agree that a mixture is better than a single crop.

I sometimes think people are the same way—and the strength of America is its mixture of so many different strains—some from one country, some from another—right down to little differences: like folks who have a taste for beer and those who prefer cider.

From where I sit, so long as we never become intolerant of one another's different tastes—so long as we live together with our differences, and even supplement them the way brome grass does alfalfa, then we're a mighty good crop!

So neighbor—enjoy your cider while I enjoy my beer! Vote for your candidate—I'll stand by mine! But never let our differences divide us!

Joe Marsh
