## YES, YOU CAN! Painting Just Gets Easier And Easier

Once thought of as an exclusively male task, painting is now being done by more and more women.

Many of the customers of Albert Margolin of Livonia Hardware are women whose husbands, often working two jobs, simply don't have the time for painting chores.

But today's paints, being what they are, make it possible for even the greenest novice to accomplish a paint job with ease, speed and a minimum of mess.

**LATEX PAINTS**, which are becoming more widespread than ever before, have greatly helped to simplify the painter's life.

More easily applied than oil based paint, latex will dry in as short a time as 20 minutes. If often requires no thinning, and -- wonder of wonders -- can be cleaned up with soap and water.

Available in flat tones and semi-gloss, the newest latex paints also come in the currently fashionable deep toned colors.

Spray paints, which stop rust, can be used over metal, wood and wicker surfaces. While not for indoor applica-

tion, they are popular for such things as bicycles and garage doors.

Small pieces of furniture, once moved into the garage or basement, can be spray painted as well for push button decorating.

If you have a problem with excessive paint build-up, look to the various paint removers now on the market. Spread on surfaces with a spatula, these products reduce old paint to a gummy substance which can easily be removed with a rag.

**CREATE YOUR OWN** instant antiques through use of the many antiquing kits now on the market. A glaze, applied after the paint, can give any piece of furniture a rich, mellowed look as though it had aged gracefully through many seasons. A coat of varnish will nicely preserve your antiquing work as well as lending to it a pleasing gloss and depth.

Probably the most difficult thing about painting these days lies in the getting ready--the moving of furniture, the removal of pictures from walls, the laying of drop cloths.

The actual painting has never been easier!
