

THE WEATHER CORNER. is in utter contusion this week. One day the red stuff in the thermo-meter takes a nose dive and the next day it bounces right back up sgain. Right now there is spring in the air, tamorraw — who knows? It was new while it lasted anyway. Even the kids got the lever, heavy conts came off Tweady and there was a terrifu curge to get out the roller skates. Although we will undoubledly get some winter yet, spring is definitely on the way and it will be a mighty welcome visitor. Red Cross Drive

ALTHOUGH IT PROBABLY ... indicates a misspent youth of some sort, we can't help thinking of a plin-ball machine when we make a telephone call into our neighboring size-able subtrb. The variety of sounds produced as our call is guided and bounced through the maze of switchboards, contacts, tubes, conden-sers, etc., makes us think of the way a ball in a plinball machine trickles down to its resulting place. Maybe now we know what that ball goes through.

IN THE SPRING ...

IN THE SPRING... several things happen. Take engagement announcements. The seasonal runb on the altar has begun again — we're allghtly deluged with the beginning of the engagement sa nanouncements this week. Which is a sure sign of June weddings and spring. Don't want to miss a single on of those engagements, so keep 'en coming. But we can't help considering the announcement of a forthcoming marriage as a positive indication of spring. It's that old saying about a young man's fancy that makes it that way.
