

The case of "THE FRANTIC FISH"

HAL I. BUTT vs. CONROY'S MARKET

"Holy Mackerel, there's something fishy going on around here."

"When I was caught, they loaded me to the gills with talk about how lucky I'd be if I landed at Conroy's Market. Some luck! Look what they did to me."

"At least I thought I'd get to lie around in those beautiful, gleaming fish display cases and let the women customers oggle over me awhile."

"Some oggling I got. No sooner do I get in the case, some guy slaps a price tag on me. It's positively insulting."

"I'm no shrimp, you know. I graduated from the finest school in the sea, but I'm hooked."

VERDICT: Poor fish deserves a break.

CONCLUSION: Public deserves break too. Low price remains.

Send Fifty Seedlings To North Africa Field

Fifty of the nearly 5,000,000 seedlings and transplants lifted at conservation department nurseries this spring are destined to represent a "bit of Michigan" in North Africa.

Complying with a request for a typical Michigan tree for inclusion in a reforestation project at a U. S. Army Air Force base, the department's forestry division is sending both red and jack pine stock.

Included are 25 three-year-old red pine transplants and 25 two-year-old jack pine seedlings which will be used with other U. S. stock to help reforest the chapel grounds.

The Air Force spokesman allayed fears of state foresters that Michigan stock would not grow there. He pointed out that the usual concept of North African climate is a little exaggerated. The official assured that at their location the soil is comparable, water plentiful, and that even a cool breeze is available to create the typical upstate sound of sighing pines.

How Hudson's exclusive recessed floor brings you America's Roomiest Car!

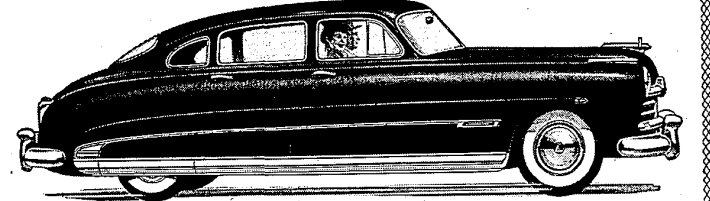

HUDSON Recessed floor "step-down" design brings the space between frame members, which is wasted in other cars, into Hudson's passenger compartment. This results in America's lowest center of gravity (and full road clearance), while providing more head room and seating room than any other car.

OTHER CARS Floor is on top of the frame, so the vital space between frame members is not available for passenger use. The result is a higher center of gravity and either a high roof line or insufficient head room. Seats are narrower passenger space is reduced.

WHAT a wonderful difference Hudson's exclusive recessed floor makes! Among other advantages, it provides more room than in any other car!

Hudson seat cushions are up to 12 inches wider than those in cars of greater outside dimensions. You'll find the most head room in any automobile. Even door and window controls are recessed for more elbow room!

Won't you accept our invitation to see Hudson—to discover how this new way to build automobiles makes a greater share of over-all size available for passenger room and comfort than is possible in any other car.

HUDSON MOST ROOM! BEST RIDE! SAFEST!

The new, lower-priced Pacemaker brings you all of Hudson's great advantages for just a few dollars more than the lowest-priced cars!
