SUNSHINE LADY THANKS V. F. W. FOR CARDS

I wish Nora Moore, Mildred Fairley, Florence Spies, Elizabeth Taylor and the other members of the Farmington Auxiliary of Post 4033, Veterans of Foreign Wars, could know of the happiness they brought such as Mrs. Mary Donnell, 2565 Crane, Detroit 14.

Mrs. Donnell, who is in her 70th year, has not left her bed in three and a half years. She could use a wheel chair if anyone could in use.

Their beautiful cards were sent to Mrs. George Little, 15538 Wakened, Detroit 25. Mrs. Little has just returned from Mt. Carmel Hospital. She is badly in need of cheer.

Mr. E. Wright, 1040 Howard, Detroit 50, Michigan, knows very little cheer, so to him a card is being sent each day until he can once more find faith that this is a good world in which to live, and that folks do care about him.

The aunt of Mr. Kuback, 11 Mile Road, Mrs. Mary Avery, 2532 W. 56 Place, Los Angeles 3, California, in her 80th year, recently fell and broke both her arms. Cards are being sent her way.

Mrs. Fred Crawford, 312 Union Street, Milford, Michigan, will be 101 years old on July 21.

Mrs. H. Hanson, 5150 Witherby, Detroit 4, has been ill for some time due to a heart condition.

Looking back through the years, I'm wondering how many remember those old-time Farmington dealers for boots and shoes. E. C. Grace, J. W. Cullins, E. W. Edmund, the druggist, in April 1950 on the 4th and 6th, the millinery sale by Miss E. Blanchard?

Life need not be dull. I enjoyed myself last week just finding out the above bits of information which were found in an old scrapbook, dated before 1900.

Why don't you make a scrapbook today, to be sent to cheer a friend or "shut-in"?

Special thanks to Rev. and Mrs. Elton Clark of Holly, Michigan, for taking care of my boys while I'm in Arizona. And to the C.A.W. - C.I.O. at Exell Corporation for sending Eddie to camp for a while.

It is this sort of kindness one never forgets.

Rocks. Thence west to Marquette for a few of the huge ore loading docks. Iron deposits were discovered in 1844 near Negaunee by William R. Burt. North of Marquette are the Huron Mountains, undeveloped as a future scenic center, similar to the Porcupine Mountains.

Continuing west you arrive at L'Anse and Houghton, entrance to the picturesque Copper Country. This is the land of the beautiful Keweenaw Peninsula and the one-time center (1859) of the greatest copper producing region in the United States.

The Calumet and Hecla Company financed with \$10 million capital, produced over \$150 million in dividends from the most productive and richest mine in the world.

Drive out the Keweenaw Peninsula to Eagle Harbor, take the Brockway Mountain Scenic Drive to Copper Harbor, visit Fort Wilkins State Park, and return by the central route back to Houghton.

Thence to Ontonagon and Silver City where you can drive to the Porcupine Mountain State Park and climb the easy trail to an escarpment giving a breathtaking view of the Lake of the Clouds.

If time permits, continue west to Iron River, visit the falls along Lake Superior. Otherwise, you can go southward to U. S. 2 and go back eastward to the Iron ranges at Iron River, Crystal Falls, and Iron Mountain.

On your way back be sure to visit the Big Spring, Kitchitippi near Manistique at Indian Lake, Thence eastward over the U. S. 2 Shore Drive to St. Ignace. This stretch of pavement is new and it affords one of the most beautiful views of Lake Michigan in the entire Upper Peninsula.

On your way back be sure to visit the Big Spring, Kitchitippi near Manistique at Indian Lake, Thence eastward over the U. S. 2 Shore Drive to St. Ignace. This stretch of pavement is new and it affords one of the most beautiful views of Lake Michigan in the entire Upper Peninsula.

On your way back be sure to visit the Big Spring, Kitchitippi near Manistique at Indian Lake, Thence eastward over the U. S. 2 Shore Drive to St. Ignace. This stretch of pavement is new and it affords one of the most beautiful views of Lake Michigan in the entire Upper Peninsula.

WASHINGTON MERRY-GO-ROUND

(Continued from Page Two)

To Lustron. Thus, in effect, all the American taxpayers helped to subsidize the senator from Wisconsin.

But not generally known is that McCarthy had done a terrific job for the real estate lobby prior to receipt of the fee. Not only had he engaged in a tenacious, vitriolic battle against the housing bill — a battle just as tenacious as his present row over alleged communism in government — but he also dominated appointment of a house-senate housing committee supposed to investigate the need for public housing.

In the closed-door battle over the appointment of this committee in October, 1947, Senator Tobey of New Hampshire, chairman of the banking and currency committee, turned up with the proxies of four senators in his pockets. All four would have voted against McCarthy.

Whereupon McCarthy moved that the committee refuse to honor proxies. Such a refusal is almost unheard of in congressional committees. However, McCarthy had a scant majority of the committee with him, and got away with it. He then obtained the appointment of New York's Congressman Gamble, a foe of housing, as chairman of the housing committee, with himself as vice-chairman. It was as vice-chairman that McCarthy spent the taxpayers' money to tour the country studying housing, and later cashed in on that trip by getting \$10,000 from the Lustron Corporation.

Though McCarthy now states he sold his article to the highest bidder, actually, according to Lustron officials, McCarthy pleaded for more dough.

His income tax for 1948 may show the reason why. As filed in the state of Wisconsin, McCarthy's tax return shows his total income was \$28,947, including his senate salary of \$12,500 plus \$10,000 from Lustron, plus \$4,955 in dividends from the Milwaukee

Rock. Thence west to Marquette for a few of the huge ore loading docks. Iron deposits were discovered in 1844 near Negaunee by William R. Burt. North of Marquette are the Huron Mountains, undeveloped as a future scenic center, similar to the Porcupine Mountains.

Farmington Represented At Model Plane Meet

The Fourth Annual Michigan Model Plane Meet, sponsored by the Plymouth Dealers of Michigan, ended Sunday, July 9, with a spectacular exhibition of speed and stunt flying.

During the three days of the meet, over three hundred entrants flew a total of 1487 different planes in competition for the 100 permanent, and four perpetual trophies. 42 Michigan communities were represented. Charles Warthman, 22409 Sherwood, was Farmington delegate.

Practically every type of model plane was entered. There were glider events, rubber powered stick and cabin, indoor and outdoor, gas powered free flight, control line speed, flying scale, stunt, and team racing.

and the Central of Georgia railroads. However, McCarthy also lists losses to the tune of \$25,881 which he claimed from the sale of securities of the same railroads.

Choosing the right varieties now can make a big difference in the quality of frozen foods you take out of your locker next winter. Be sure you freeze only the recommended varieties of fruits and vegetables this summer.
