## West Indies Sundae Real Treat for Summer Parties

BY DOROTHY MADDOX

A BIG scoop of vanilla, cream with a tablespoon of molasses over it, and a bright red cherry on top—well, that's a West Indies Sundae. Isn't that the perfect treat for your next warm-weather porch party?

We like to serve old-fashioned soft molasses cookies with it. My grandmother used to make them—they are really wonderful.

Molasses Cookies  
(Yield: 6 to 7 dozen 3 1/2-inch cookies)

Seven cups sifted enriched flour, 4 teaspoons soda, 1 tablespoon salt, 1 tablespoon cinnamon, 1 tablespoon ginger, 1 teaspoon cloves, 1 cup shortening, 1 1/4 cups sugar, 2 cups unsifted molasses, 2 tablespoons vinegar, 2 eggs, 3/4 cup milk.

Sift together first six ingredients. Melt shortening in a saucepan large enough for mixing cookies. Stir in sugar, molasses and vinegar. Coat beat in eggs. Add sifted flour mixture alternately with milk. Chill dough about 30

minutes. Drop from table-spoon onto greased cookie sheets. Bake 12 to 15 minutes in pre-heated moderately hot oven (400 degrees F.).

If you like the rich flavor of molasses as much as we do in our home, you'll welcome this recipe, too.

## Fruity Fudge Bars

(Yield: 24 bars)

Two-thirds cup sifted enriched flour, 3/4 teaspoon soda, 1/4 teaspoon salt, 6 tablespoons cocoa, 1/3 cup shortening, 3/4 cup sugar, 1/2 cup unsifted molasses, 1/2 teaspoon vanilla, 2 eggs, 1/2 cup chopped nuts, 1/3 cup raisins.

Heat oven to 350 degrees F. (moderate). Sift together first four ingredients. Melt shortening in a saucepan large enough for mixing batter. Stir in sugar, molasses and vanilla. Beat in eggs. Add flour mixture; mix well. Stir in nuts and raisins. Spread batter in a well-greased, lightly floured, 9 x 9 x 2-inch pan. Bake 35 minutes or until done. Turn out on wire rack to cool. Cut into 24 bars when cooled. Top with pecans or almonds if desired.

## BULB SELLERS NEED LICENSE AND INSPECTED STOCK

Those citizens of the state who are growing and selling hardy plant bulbs will be vitally interested in an opinion recently received by the Michigan Department of Agriculture from a survey conducted by Frank J. Wilbur, acting to Mr. C. A. Boyer, Chief of the Bureau of Plant Industry. The opinion interprets the legal definition of nursery stock to include all hardy plant bulbs such as those of narcissus, hyacinth, daffodil, tulip, etc., thus all of the provisions of the so-called nursery law, as amended, will apply to the sale and distribution of all hardy plant bulbs.

To sell such bulbs in Michigan they must first be inspected and certified by the state. If they are not given a license, the grower must have a plant grower's license before selling the same. In fact, all persons and firms who buy and sell bulbs and are not licensed to sell perennial plants or nursery stock such as trees, shrubs and woody vines must make application for a plant dealer's license for each sales outlet at the cost of \$2.00 annually. The fiscal year for nursery stock starts September 15 each year and growers of hardy plant bulbs should request inspection early and have the license before the beginning of each fiscal year.

Those dealers or growers employing agents either as door-to-door salesmen or sales clerks must at the same time make application for agent's permits for those persons at the cost of \$1.00 each.

Persons or firms in Michigan receiving hardy plant bulbs from foreign countries must notify Mr. Boyer of the arrival of such shipments so an inspection of the bulbs may be made while in the original shipping containers.

## GOOD, SHARP KNIVES CAN SAVE WIFE'S TEMPER

One of the best temper savers in your kitchen can be a good set of knives. If you back away at a rival with a dull blade, or struggle to cut a big grapefruit with a paring knife, chances are you need to make an investment in cutlery, suggests Mrs. Josephine Law, county home demonstration agent.

Basic, of course, is the paring knife for small cutting jobs such as vegetable or fruit peeling and slicing. The blade of this knife should be three and a half inches long, she said.

Margaret Wallace, Michigan State College foods and nutrition specialist, points out that a utility knife is one of the most versatile kitchen tools. Handy for endless cutting jobs, this knife is five to six inches long and has a blade that can be changed to cutting through cold meats or uncooked bread.

The carving knife is a strong tool designed to carve roasts, fowl or steak. But keep sharp, Mrs. Lawler urged, if you want to carve your meat and not saw it.

The long-handled fork and flexible bread spatula are important in kitchen operations and many homemakers find poultry shears, household cleaver and, scalloped-edged bread knives are big helps. The cleaver saves wear and tear on knives when used for mincing vegetables or chopping or tenderizing meat.

Perhaps most important of all, Mrs. Lawler contended, is the knife-sharpening steel. Take time to keep your knives sharp and you will find your temper isn't, she said.
