friends or our future enemies. New York, and later Washington, took one look at them, and succumbed to the freshness of youth. They captivated the diplomats, melted the hearts of the hardboiled newsmen, even inspired taxi-drivers to give sight-seeing lectures on the wonders of Manhattan.

Everyone rolled out the red carpet, from the Hotel New Yorker which entertained them in New York, to Moe Lerner of Airport Transport, Inc., who gave them two limousines in which to see the sights of Washington. And they trod the red carpet so surely that you scarcely would have guessed some of them were only 11 years old and never had been on an airplane before.

CATTLE RACE TO SUBWAY

When Margaret Fowler of Burlington, Colorado, got to New York the first thing she did was to ride the subway and eat lamb. Living on a cattle ranch, where sheep and cattle don't mix, this was the first lamb Margaret had ever tasted.

What thrilled Bobby Hightower most was the Lincoln memorial. Bobby is a Negro boy from Orlando, Florida, and the people of Orlando belied the propaganda lies of Moscow by sending Bobby on his long trip. He told the youth behind the iron curtain that he was studying to be a doctor—a future probably denied a great majority of young Communists.

Booker T. Washington of Plainview high school, Kansas, also got a thrill out of the Lincoln memorial, but possibly he had more fun at a game between the New York Yankees and the Boston Red Sox. Back in Kansas, Booker's aged grandmother took a bus trip up from Muskogee, Oklahoma, to see her grandson off on his pilgrimage to Washington, while his classmates gave him two sport shirts, and a friend of his mother's drove 15 miles to give him two dollars to buy soda pop in New York.

Booker told the youth behind the iron curtain how [he, a Negro boy, was vice-president of the Junior Hi-Y and a drummer in the high school band.

Mary Marlin, aged 13, told her iron curtain audience about town, Bellaire, Ohio—its people and its industries. Sharon Ann Adams of McLehen, W. Va., told about the great U.S.-Canadian border, unguarded and unfortified, a symbol of peace and friendship. A bit bashful, she did not tell them how, going up to the 43rd floor and the roof of the Hotel New

Yorker she had looked down at the tiny autos and streetcars on Broadway and felt a little dizzy. It would have been interesting if she had, for, in Moscow, buildings don't go much higher than 10 floors.

LUMBER COMPANY DISPLAYS COLOR GALLERY HERE

The Farmington Lumber Company, 32800 Grand River, is among the first retailers to offer its customers a unique new decorating aid, the "Dutch Boy" Color Gallery, which is winning wide acclaim as a simple and practical method of selecting colors for the home.

Mr. Charles Stuart, manager of Farmington Lumber Company, stated recently that by means of the Color Gallery, recently unveiled in his store, homeowners can quickly obtain paint colors to match or harmonize with colors in fabrics, rugs or other furnishings. Over one hundred complete color schemes, chosen by foremost color experts, are another feature of the service.

The Color Gallery, developed by National Lead Company, pioneers in the paint manufacturing field, contains "take-home" colored swatches. The extremely wide range of colors, according to Stuart, were chosen by recognized decorating authorities and are keyed to present-day color preferences. All colors are offered in flat or semi-gloss finishes.

Stuart stated that response to the device by Farmington homeowners confirms reports of its enthusiastic acceptance wherever it has been shown. Farmington Lumber Company invites homeowners, as well as architects, builders, painters and others interested in decoration to visit their store and view the Color Gallery.

Montana's badlands contain veins of coal 25 to 40 feet thick.

Wm. Alepp Graduate From RCA School

William Walter Alepp, Jr., of the 178 students to receive diplomas from RCA Institutes, Inc., one of the oldest radio technical training schools in America, a company spokesman reports. In the class were students from India, Liberia, France, Cuba and Mexico.

Commencement exercises were held in the auditorium of the Western Union Building at 160 West Broadway, New York City. Students of the class included residents of fourteen different states, the District of Columbia and Hawaii.

IT'S A BOY!

Mr. and Mrs. Jerry Fisher of nine pound nine ounce son, Michael Lee, May 14. The father, a 1948 graduate of Farmington High School, is stationed with Naval Forces in Bermuda. The paternal grandparents are Mr. and Mrs. Richard Fisher of 30808 Astor in Farmington.

Daked beans will stay piping hot on your next picnic if you insulate the dish with plenty of newspaper wrapping.

EVERETT IMPLINT INTRODUCES NEW FARMALL TRACTOR

The Everett Implement Company, International Harvester dealer here, has just received the first McCormick Farmall Super M, the new model which is described as the "world's most powerful all-purpose tractor". The tractor is now on display at the Everett Implement Company showroom.

"The new Farmall Super M has 21 per cent more power and faster field speeds than the famous Farmall M which it replaces," says Mr. Feldman. "It will handle a regular four-bottom moldboard plow easily in practically all conditions and plow more than 20 acres in a 10-hour day."

To illustrate its large work capacity, Mr. Feldman mentioned what the Super M will do on several other field jobs. The Farmall Super M, he says, will cover up to 50 acres a day with a 10-foot tandem disk harrow and have plenty of power to handle a post-tooth harrow or ground rolled at the same time. Field tests indicate that it will drill small grain at the rate of 55 acres a day and cultivate up to 60 acres a day with four-row equipment.

The railroads use 60 million tons of coal a year.

ALWAYS BE CAREFUL DRIVING

The car that wears its own Sun Glasses

2-door, 6-passenger Super Wildcat.

YOU may have to look twice to see it—but a lot of the new Buicks have a soft blue-green tone in all glass areas—plus a slightly darker band which shades down from the top of the windshield.

And you have no idea what comfort all this adds to hot-weather driving.

Its name is "Easy-Eye Glass"—which tells only half the story. While it filters out 18% of the glare (and tones down the dazzle of oncoming headlights at night)—it also cuts down sun-heat as much as 50%.

So it's the best cure we know for hot laps in summer driving, when the sun beats down on the windshield.

Maybe you'd like to try this out before you buy your next car.

And while you're trying it out—you can also discover how it feels to boss around a Fireball 8 Engine, that puts its own exclusive added wallop into a high-compression valve-in-head power plant.

You can sample the sure-footed way a Buick settles into a curve—the way the front wheels seem to seek their course automatically—the smooth surge and falterless ease with which Dynaford Drive* feeds the power—the level confidence of Buick's million dollar ride.

You can get an idea also of the room, the

comfort, the smartness, the thrill that your dollars buy in this brilliant performer.

So why not arrange for a demonstration soon?
