STOP CATTLE BLOAT

One of the best ways to handle the bloat problem with dairy cows on pasture is to provide a rack of dry hay or straw for the animals. Michigan State College dairymen say that if placed near the water or feeding place the cows will eat the hay, which need not be of the best quality.

Decision to study for the ministry was reached this year. Both Mr. and Mrs. Nicholson have sung in the Christ Church Cranbrook Choir for fourteen years. Recently several men in his age group were ordained. The Henry Ford Trade School, where he has been academic supervisor for six years, was discontinued August 1 and he was offered a substantial post graduate Wayne University. But the inspiration for the ministry was strong and he declined. His wife, Margaret, encouraged him in his decision and feels "good about it".

Education and study has been a prominent part of Mr. Nicholson for many years. He attended night courses at Wayne University, receiving his Bachelor of Arts degree in 1946 and his Master's Degree in 1950. The Nicholsons have lived in Farmington since 1947, continuing here from Detroit. They have two children, a son and a daughter, both married and living in Detroit.

In preparation for their new experience, they are selling their home and plan to live in an apartment in Alexandria. After completing the three years of study, they hope to return to Michigan. Mr. Nicholson has authored two textbooks, "Blue Print Reading" and "Mechanical Drawings", published by D. Van Nostrand Co. of New York, and has been active in organizations. A member of Phi Delta Kappa, honorary national chairman, he is present president of the Psi Sigma Phi. He is a past president of the Ford Industrial Education Association and is a member of the Michigan Training Council.

Vets To Get Compensation Pay

Federal Unemployment Compensation for Korean veterans, similar to the Servicemen's Readjustment Allowances paid World War II veterans, will be paid after October 14, 1952. The program, managed by the Northwest office of the Michigan Employment Security Commission, announced this week. This announcement is made in response to dozens of inquiries to MESCC branch offices throughout the state, Mr. Luke said.

The payments will amount to \$24 a week for not more than 26 weeks. They are paid by the federal government through MESCC's claims division. To be eligible, a veteran must have served in the armed forces after June 26, 1950, and must have been discharged under conditions other than dishonorable.

Unemployment Compensation under their annual program may be paid within 31 days after discharge if the veteran receives \$100 in mustering out pay; not within 61 days if he receives \$200 of such pay; not within 91 days if eligible for \$300. This provision is inserted because \$300 is paid overseas veterans with more than 90 days service; \$200 to veterans with more than 90 days service in the United States, and \$100 to veterans with less than 90 days service.

The veteran's Readjustment Assistance Act, under which this unemployment compensation is payable to veterans of the Korean conflict, provides that a veteran must serve a one-week waiting period after their claim has been filed. They will be eligible for compensation in the second week, if still unemployed. He must be able to work, and available for work. If the veteran has benefited rights under any state unemployment law, or under the Railroad Unemployment Insurance Act, he must first claim such benefits. In Michigan, Korean veterans' wage credits in employment covered by Michigan Employment Security Act are frozen as of the time they entered military service. This entitles them to state benefits if they had previously earned any wage credits. However, Mr. Luke said, many of the Korean veterans have entered the armed forces without having any wage credits. The Federal Act is of particular benefit to these young vets.
