Heard About the Electric Weather Predictor?

Squint Smith built up quite a reputation last month by predicting the weather. What he said usually came true.

usually came true.

It got so that folks would sit around his little Antique Shop just to get his opinion.

Last Monday, though, he said he didn't know what the weather was going to be like next day. That surprised us and when we asked what hisppend, Squint said, "Slipped up on my electric bill and was turned off. I'll get to my ratio again tomorrow though." Squint had been getting

the weather over the radio—just like anyone else! From where I sit, that's the way it goes with some "experts." They often don't have any more inside information than you can get for reases! I like these who "know" information than you can get for yourself. Like those who "know" cider is the only thirst-quencher after a day's work, Far as I'm concerned, I'll take a temperate glass of beer. But—I won't try te "predict" your choice for you.
