

Fire Station No. 3 To Sponsor Dance

Station No. 3 of the Farmington Township Fire Department will hold its first benefit dance at the fire hall on June 27. The hall, located on Wheeler Street just north of Grand River, was completed around the first of the year and since that time all of the volunteer firemen have been hard at work putting the station in top order. Proceeds from the dance will be used for new fire equipment so that the men will be able to do an even better job of protecting homes and business places. The young lady in the above picture poses with the fire truck from the station. Everyone has been invited to attend the dance and support the young men who devote their spare time to the department.

SCHOOL BOARD TO ELECT NEW OFFICERS

The annual organization meeting of the Farmington School Board is expected to be held some time next week, officials stated Tuesday. The exact date of the meeting has not been set as yet. New officials of the School Board are to be elected for one-year terms beginning July 1, 1953. New Board officers are elected each year at the annual organization meeting.

Predict Return

(Continued from Page One)

intendent of Schools O. E. Dunkel stated that all bonds, as approved, have been issued and will be paid for by 1963, their maturity date. Dunkel added that, with the recently-approved millage increase, the bonds can possibly be paid off by 1960 or 1961.

In response to several suggestions that the Citizens' School Committee be formally organized, two opinions were forthcoming at Monday night's meeting, one from Mr. Edward Moseman and the other from School Board President Wendell Brown.

Mr. Moseman, for his part, could see no purpose in having officers and a constitution.

"There are enough constitutional organizations in existence now," he said.

Board President Wendell Brown said that if the committee wanted to organize, it should be strictly a citizens-inspired organization.

He added that the school board has certainly appreciated the help of the school committee and will continue to welcome suggestions and help from that group.

Another interesting point of the meeting was inspired by Mr. Moseman's question as to whether there will be need for increased public library facilities for school age children with the advent of the new high school and its library facilities.

In answer to Mr. Moseman's question, it was pointed out that the schools are closed during the summer months and that library facilities in the elementary schools are inadequate.

In regards to the high school library, Mr. Dunkel and Mr. Harrison pointed out that present facilities include a trained librarian and some 3,000 volumes. This number is expected to be increased 50% to 60% next year.

Under benefits of the recently voted millage increase, the high school will have \$5,000 with which to purchase new books and the elementary schools will have an additional \$1,000 each, or a total of \$3,000 to spend for new volumes.

Superintendent of Schools Dunkel pointed out that circulation in the school libraries actually was below normal this year due to the uncertain revenue situation and the fact that new books were not coming in on the shelves.

The week end found Mrs. O. B. Ault of Shadyside Avenue quite ill with a severe attack of flu.

COMMUNITY CALENDAR of EVENTS

THURSDAY, JUNE 25

Cubs vs. Cards Ball Park
Oakland Lions Club Rotunda Inn
Community Center Meet. Town Hall

FRIDAY, JUNE 26

Yanks vs. Tigers Ball Park
Dodgers vs. Giants Ball Park

SATURDAY, JUNE 27

Giants vs. Indians Ball Park

SUNDAY, JUNE 28

Farm. vs. Birmingham Little Bigger League Ball Park

FARC Hits New

(Continued from Page One)

will begin at 9:30 a.m. with swimming. At 10:30 the group will dress and at 11:00 they will have lunch. Arts and crafts, games and hikes will begin at 11:30 and continue to 1:30 when instructional and free swimming will be held. The group will leave the park about 3:00 p.m.

Activities at the playgrounds will begin at 9:00 a.m. From 9:15 to 12 noon children in the age group of seven to ten years will participate in supervised activities. Older children will engage in activities requiring less direct supervision. The period 12:00 to 12:45 p.m. will be reserved for lunch. Arts and crafts will be scheduled from 12:45 to 1:15 p.m. Directed activities for children eleven years of age and above will be conducted from 2:15 to 3:45. The playgrounds will close at 4:00 p.m.

The first field trip will be held Friday, June 26, when youngsters visit the Detroit Zoo. Buses will leave the Farmington High School at 9:00 p.m. and will then stop at the William C. Noble and Bond Schools. The bus will return at about 3:00 p.m. This trip is primarily for those children from 8 to 12 years of age.

RAYHAVEN OPENS NEW WAREHOUSE IN FARMINGTON

The Rayhaven Equipment Company has taken over use of the former Blackless Chevrolet agency building in the center of Farmington's business district as a warehouse, according to an announcement by Ray Eichler, president.

With the Farmington building, Rayhaven Equipment now has three warehouses in the Detroit metropolitan area plus their general offices at 25167 Grand River near Seven Mile Road. The new warehouse gives the company an additional 8,000 square feet of floor space. With the other two warehouses, Rayhaven Equipment Company has a total of 19,000 square feet for storage of equipment.

Eichler, who has served on the Farmington School Board and has been prominent in community activities, lives at 31703 Nine Mile Road, Farmington Township.

CITY TO START WORK NEXT WEEK ON REST ROOMS

Work is expected to begin next week on the construction of new rest rooms in the City Park, officials announced Monday.

The rest rooms will be built in conjunction with a new pump house. The concrete floor for the building will be poured early next week. Plans call for concrete block construction on the exterior walls. The building is to be located on the west side of the park about 30 feet south of the main pump control house.

The sewage from the rest rooms will flow into an existing line near the site of the building. The plans have been approved by State sanitary engineers.

Mr. and Mrs. Stanley Morgan, Mrs. Wanda Graham, the boys and girls, returned Saturday from a wedding trip to New England and will soon be keeping house near Farmington.

Children of this neighborhood were registering Friday for activities at the Hubbard Avenue playground which proved so popular last summer. Each child was given a balloon.

Boy Scout Summer Safety Rules Pertain To General Public Welfare

Summer safety for Scouts includes the most common sense practices. Most of us think in terms of water safety only - - - which of course is very important. But for those of us just staying in town or keeping on the job or going to summer school, there are some safety rules which, if carried out, will bring us through to another Thanksgiving and Christmas.

First of all, most of us are riders in, or drivers of, motor vehicles. Let's remind ourselves of our municipal and state motor laws. Are we insured? Is our car in safe condition? Do we ride with good drivers? How well do we obey the laws of the highway?

On those extended camping trips, vacations at the cottage, week end swims - - - do we practice police precautions? Briefly these are - - - personal cleanliness, avoiding fatigue, keeping away from crowds, and avoiding chills.

When traveling in strange territory, especially on camping tours, be sure of your drinking water. If in doubt, boil it or treat it with purification tablets.

"Common sense alert!" means keeping sensible around boats and canoes. People who stick to their turnpikes and canoes are usually discovered and rescued. It's the foolhardy folks who "abandon ship" and strike out for shore that often drown. Of course safe and wise handling of boats or canoes usually avoids their tipping or swamping.

Unfortunately most water deaths come from drowning and, again unfortunately, most drownings are definitely unnecessary. Getting overtired, swimming out too far, diving into unknown waters which may be too shallow, or where may lurk submerged objects, horseplay and many other foolish stunts cause drownings. Rescuers can sometimes be easily made by handing out a fish pole, throwing out a rope or rowing out a boat. If you must enter the water to make a rescue, don't be foolish enough to go in fully clothed. Take time to disrobe and carry a towel or shirt in your teeth. Then you've got something to hand that struggling victim.
