**STRAWBERRY ASSURE VITAMIN C IN DAILY DIET**

Cash in on the plentiful supply of lush Michigan strawberries now on the market to add zest to your summer meals and at the same time assure your family of adequate amounts of vitamin C.

Alice Smith, who heads the nutrition section of the state health department, says that fresh strawberries are an excellent source of vitamin C. A vitamin frequently lacking in our diet. Three-quarters of a cup will supply 95 per cent of our daily requirement of this important vitamin.

Eat them plain, or in a bowl with sugar and cream, or heap them on your breakfast cereal, or serve them as dessert in a tempting shortcake or in a fresh strawberry pie topped with whipped cream.

They can be served in dozens of ways - all delicious and all of them good for you. They even travel well to picnics. Leave the cans on and take along powdered sugar for those who must sweeten them.

Plan now to vary your fall and winter menus with nutritious fresh strawberries by quick-freezing a supply while they are plentiful and inexpensive.
