CLARENSVILLE PTA
MEET SCHEDULED
FOR SEPT. 15

The first Clarensville P. T. A. meeting of the school year will be held Tuesday, September 15, at 8:00 p.m. in the Clarensville High School gymnasium.

This first meeting of the year is a reception for the teachers. Parents are invited to come and get acquainted with the teachers and at the same time join in some community singing with other parents.

This is an opportunity for parents to talk to their child's teacher about any questions they may have regarding his or her schooling.

Refreshments will be served at the end of the evening.

Farmington P.T.A.
To Meet Sept. 15

Farmington P. T. A. will hold its first meeting next Tuesday, September 15, at 8:00 p.m. in the high school gymnasium. As essential to opening school itself is this first meeting where teachers and parents can meet each other. All the teachers will be present and introduced at the meeting.

Mr. Carl Wheaton will present the program of the evening. He will show colored pictures which he has prepared of the Farmington Area Recreation Program reviewing the activities of the past summer.

Last June the newly-elected executive board of the Farmington P. T. A. was petitioned to permit a Ten Mile Elementary P. T. A. to be formed.

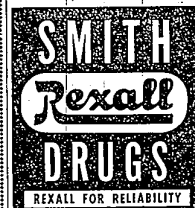

As a result of a two to one poll obtained from notes sent to parents from school, in favor of such a group, the executive board was divided into two groups, an elementary and high school, as determined by the place of attendance of their children. This division of the board necessitates an election for both groups to fill offices vacated.

A state of officers for both groups has been prepared and the election will take place at this meeting. Parents with children in both elementary and Junior and Senior High may vote each ballot.

Mrs. William Allen from Detroit spent Tuesday with Mrs. E. W. Stange on Mayfield Avenue.

Junior Gardeners
Plan Surprises

Mrs. Phillip Henault, Mrs. Richard Lancaster and Mrs. Dossin Hubert, who are working with the Junior Gardeners on their "Jack and Jill" show, state that about twenty-five youngsters have made their own pottery containers for their arrangements.

Those who marveled last year at the excellence of the Juniors' pottery and arrangements exhibit their own "every better" treat in store this year.

The co-chairmen state that the Juniors are also doing an outstanding "Roadside Improvement" by competing for a special "Purple Ribbon" award so the youngsters are working especially hard to follow the same standards as the senior show.

The Flower Show will be open to the public from 2:00 to 9:00 p.m. on Friday, September 11, at the Farmington Methodist Church.

PLAN GIRL SCOUT
GROUP CAMP SOON
AT ISLAND LAKE

A group camp will be held at the Island Lake Recreation Area on September 25 - 27 for Farmington Girl Scouts.

Any Farmington Girl Scout, intermediate and up, who is interested in attending the camp, has been invited to contact her leader for information about the camp and for a permission blank which must be signed by her parents.

The offer has been extended to members of any Farmington troop. Information may be secured by calling Farmington 2945-W.

Use a piece of foil only slightly larger than the pan or dish holding the food. Turn foil edges up and place it on a rack directly under the pan or dish.

Authorities caution against covering the entire bottom of the oven with foil because this cuts off circulation of heat and prevents proper cooking.

Also, the heat given off by electric units or gas burners will be reflected back by the foil. This will overheat electric units, possibly causing them to burn out. With gas burners, it will cause an incomplete combustion of gas which requires air circulation to burn properly.

Another precaution — foil should never touch open heating wires in any electric appliance because it is likely to cause a short circuit.

FOIL SHOULD
BE USED WITH CARE
IN OVEN FOR SAFETY

One of the many ways homemakers are using aluminum foil these days is in the oven under plates or other baked dishes to catch any possible run-over of food.

Olevia Meyer, home management specialist at Michigan State College, gives these directions for proper use of foil for this purpose.

Use a piece of foil only slightly larger than the pan or dish holding the food. Turn foil edges up and place it on a rack directly under the pan or dish.

Authorities caution against covering the entire bottom of the oven with foil because this cuts off circulation of heat and prevents proper cooking.

Also, the heat given off by electric units or gas burners will be reflected back by the foil. This will overheat electric units, possibly causing them to burn out. With gas burners, it will cause an incomplete combustion of gas which requires air circulation to burn properly.
