### Announce End Of Bloodmobile

The bloodmobile service of the Michigan Department of Health will be discontinued February 26, which leaves the field for collecting fresh blood entirely to local blood banks and the American National Red Cross regional blood centers. It has been announced by Dr. Albert E. Heustis, state health commissioner.

Source of blood for the manufacture of blood derivatives by the Department's laboratories are now sufficient to supply the needs of Michigan's people without the bloodmobile service. The Commissioner explains that because of the development of processes in the laboratories for recovering gamma globulin and albumin from human plasmas, the Department now has working agreements with 22 hospitals to supply it with approximately 50,000 plasmas a year and plans to enlarge this program in the near future.

This source will provide enough of these products to meet the Michigan demand. Other products - plasma, fibrinogen and antithrombin globulin - will be made from surplus and outdated blood furnished the laboratories by 61 blood banks. The commissioner pointed out, however, that after March 1, the Michigan Department of Health will not be able to provide emergency supplies of whole blood as it has in the past, and urged donors to step up their support of their local blood banks so that an adequate supply of whole blood would be available to them at all times.

### AVOID COLDS DURING JANUARY PEAK MONTH

If you are sneezing and have a head cold, you are just one of the many who are suffering from the "new year's eve party" and other projects worked on jointly with the Amvets.

1. Whenever possible, stay away from people who have colds.
2. Get enough sleep to wake refreshed; get enough rest.
3. Wash your hands before eating or handling food.
4. Eat meals that are well balanced.
5. Avoid over-fatigue.
6. Dress according to the weather. Wear light clothing when doing hard work and keep extra clothes ready to put on when you are inactive.

When you catch a cold, it is usually milder and ends more quickly if you take good care of yourself from the beginning. Get as much rest as you can. Keep comfortably warm and dry, and if you must go outdoors, dress suitably for the weather. Eat simply, easily-digested foods, drink plenty of liquids, especially water and citrus fruits.

You may be whatever you resolve to be - determine to do something in the world, and you will be something.
