Coon Hunters Oppose Ruling

The seven-member conservation commission is at least partly in sympathy with southern Michigan coon hunters who state that a change in the present law banning non-residents would damage the sport.

But the commission is anxious to discriminate against non-residents, believing conservation in the long run suffers under such rules.

A group of delegates, representing several southeastern coon hunting clubs, appeared before the commission last week to protest the recent conservation request that the state legislature drop the ban against non-residents.

One possible point of compromise lies in opening dates of the season. In Michigan, coon hunting starts October 29. In Ohio not until November 15. The coon hunters say out-of-staters would thus have an advantage in coming here to hunt before their own season opened.

The commission expressed a belief that some equitable arrangement of dates could be explored as one possible solution to the problem.

A laugh is worth a hundred groans in any market.
