

John Volpel To Receive Engineers Degree May 23

John H. Volpel, son of Mrs. Florence Volpel, 22755 Marfield, will be graduated from the Michigan College of Mining and Technology at commencement exercises Sunday, May 23, the college disclosed.

A mechanical engineering major, Volpel will receive the B.S. degree. While on the campus Volpel served as sports editor of the "Keeweenaw" Tech yearbook and the "Lode" student newspaper. Volpel graduated from Cass Technical and is a member of the student American Society of Mechanical Engineers and Tau Beta Pi honorary fraternity.

The highly mechanized U. S. bituminous coal industry is looked upon as a model of efficiency by mining men in all parts of the world.

Michigan's VACATION LAND

Spend this year's vacation in Michigan! You'll enjoy extra days for sports... extra days for loafing... more time in the fresh air, sunshine and water. And the travel dollars you save will help pay for many extra summertime pleasures! Write today for helpful, free Michigan literature—then make your reservations soon.

THE MICHIGAN MIRROR
By GENE ALLEMAN

(Continued from Page 2A) might not be considered ideal, it represents a trend toward more desirable. And it eliminates to a great extent the low salary as a factor against teaching.

Serious need does exist. Of the 45,000 teachers here in Michigan at present, 10% leave the profession each year. Some marry, retire, die or change vocations. Census figures show that 600 persons will be enrolling each year for at least the next five years. They will require 2,000 more classrooms.

These needs emphasize the opportunity for advancement in teaching. There will be many more openings for teachers and school administrators than there are qualified people to fill them.

Many present teachers do not meet minimum requirements for teaching standards. Some are certified because better qualified instructors are simply not available.

"Acquaint the positive" will be the theme of the campaign to get more and better teachers for Michigan according to Dr. Taylor. "We are putting our faith in public relations methods to solve this and other school problems and stressing the better aspects of education as a life work."

In addition to glamorizing the teaching profession, the sub-committee on Educational Public Relations has some other aims. It intends to find ways to acquaint the public with data about school problems so facts will be available before people make up their minds about an controversial subject. It hopes to make the "average citizen" understand the values of present teaching techniques concerning the "three R's" and other curriculum problems. It seeks to learn why voters in some areas approve plans for new, needed school programs while voters in similar districts will not.

Members of this committee as well as the department of public instruction realize the urgency of providing fine education for the youth of Michigan. Keen thinking is needed to meet national and international problems that the children must face. They hope to provide the best possible training.

Cherry, Bean and Dairy Queens from Michigan in Yankee Stadium. This Michigan trip around New York and Washington.

Perhaps the high spot of their trip was the opportunity to appear at Yankee stadium just before the Sunday game with the Detroit Tigers.

LUELLA G. PARTEE NAMED TO HONORS CONVOCATION AT U-M

Luella Gail Partee, 32418 Northwesterly Highway, Farmington, will be recognized at the University of Michigan's 31st annual Honors Convocation to be held Friday, May 14, at 11 a.m. in Hill Auditorium.

A total of 700 outstanding students at the university will be honored at the convocation. The chairman of the Board of the Student Corporation will talk on "Free Minds for a Free Society".

Miss Partee is a senior honor student in the College of Literature, Science and the Arts and recipient of a Gomburg Scholarship in Chemistry.

Usually large wheat and corn harvests in Michigan last year brought total farm yields above average levels. Wheat set a new record with 44,692,000 bushels valued at \$82,680,000, while corn production of 80,262,000 bushels was valued at \$116,350,000.

STATE TROOPER CANDIDATES ARE INVITED TO POST

Young men in the Farmington area interested in joining the Michigan State Police during the current recruiting program will have an opportunity for an interview with Sgt. Henry Kozowicz, commanding officer of the Detroit post, in his office between 8 a.m. and 5 p.m. May 17 or May 18.

Candidates for enlistment are now being sought for 50 additional trooper positions authorized by the state legislature. Closing date for applications is May 25, with the state civil service examination following June 12.

"Candidates are welcome to call at the post at any time," Sgt. Kozowicz said, "but these hours are being set aside especially to answer questions and help them fill out application forms. Recruits must be between 21 and 30 years of age, inclusive, physically fit and have a high school education or its equivalent. Married as well as single men are accepted."

"Some may not find it possible to visit the post," Sgt. Kozowicz said, "but they can still apply by writing to the State Civil Service Commission for the Michigan State Police at Lansing."

Looking Ahead
By DR. GEORGE S. BENSON

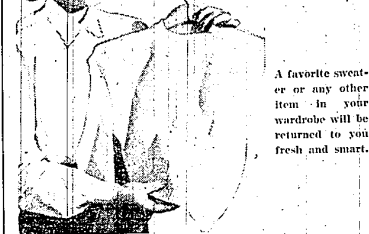

(Continued from Page 2A) At no cost to the Communist Party, and I wanted to know how it was they were able to pull such a trick as slick as that. Somebody knew how to operate in a very clever and a very vicious fashion.

Public advanced until he was one of the most valued comrades. What he learned in nine years about the power and influence of the Red underground network in America, and of America's sympathy to what's going on, leads him to attend to say: "We have not turned the tide against Communism. We are still losing."

In next week's column Philbrick outlines the Communist's amazing power to shape American public opinion through the art of "cybernetics."

Glenn Brown, son of Mr. and Mrs. Archie Brown of Greening Avenue, is home on a ten-day leave from the Navy after completing Quartermaster School at Baltimore, Maryland. He is now being transferred to the U. S. 5. G. Oathorse.

ECLIPSE OF SUN TO TAKE PLACE IN MICHIGAN JUNE 30

A total eclipse of the sun will take place over the Keeweenaw Peninsula and will be almost total over the lower peninsula of Michigan on June 30, according to William Schultz, Jr., astronomer at Cranbrook Institute of Science, Bloomfield Hills.

Shortly after sunrise June 30, the moon will blot out the light of the sun along a path which will include Ontonagon and Keweenaw Counties and all but the southern parts of Houghton and Baraga Counties. The central line will pass through the cities of Ontonagon, Calumet and Eagle River. Lower southern Michigan will see this as a partial eclipse.

The eclipse of the sun at any one location will be total for about a minute and a half, although the partial stages will extend over a period of almost two hours.

It will be the last eclipse to occur over the state until after the year 2000, Mr. Schultz says.

When the moon passes between the sun and the earth, causing the moon's shadow to fall on the earth. The turning of the earth on its axis causes the shadow to move around the world at a rapid pace.

SOFT WATER WILL WORK MIRACLES!

Will Save You Up To \$165.00 a year

ENJOY SOFT WATER THE SERVICE WAY

It's trouble free—No worries on your part—We make the initial investment. We assume the problem of regeneration. We assume all maintenance costs. All this for a small monthly service fee—just like your electricity, gas or telephone facilities—

Compare these advantages with owning your own—
- Consider the initial investment.
- Consider the depreciation.
- Consider the interest and finance charges, even though they are hidden.
- Consider the regeneration problem.
- Consider the cost of salt and trouble to haul it in.
- Consider the cost of repairs and maintenance when "it" doesn't work.
- Consider the cost of replacing mineral.
- Consider the importance of thorough softening.
- Consider water supply and cost of water for regeneration.
- Consider how you will dispose of the salt brine from regeneration. (Dump it on your lawn? In septic tank? Please don't!)

Buick now outsells all other cars in its price class and above

YOU'VE probably noticed it right in your own neighborhood. Bright new Buicks appearing here, there, everywhere. And more and more of them in recent weeks. Know what's happening? Folks in growing numbers—and maybe you'll be joining them soon!—are finding Buick styling, performance and value far too wonderful to pass up. So Buick is selling at a record pace—outselling all other cars in its price class and above. Matter of fact, latest figures for the first quarter of 1954 show that, in total national volume, Buick is outselling every other car in America except two of the so-called "low-price three."

A look and a ride and a peek at the price tag will be all you'll need to know what's back of this best-selling success.

There's styling in Buick that's the greatest beauty advance in years—the very look of tomorrow—and with the spectacular panoramic windshield that's part and parcel of this dream-car look.

There's performance in Buick as never before—with record-high V8 power, with the sensationally smooth whip of Twin-Turbine Dynaflow, with the buoyant ride of full-coil-springing, with a new precision of control and handling.

And there's value in Buick that's hard to match—with prices starting near the "low-price three"—prices that buy more Buick beauty and power and thrill and sheer automobile than smart money ever bought before.

How about you?
Are you ready, willing and waiting to be shown that this best seller called Buick is the buy of the year for you, too? Drop in this week, or give us a call, and we'll arrange a demonstration.
