Ruth McCurdy Married In Colorful Ceremony At Universalist Church

At wedding ceremonies Saturday afternoon, August 21, at the Farmington Universalist Church, vows were exchanged between Ruth Gertridde McCurdy, daughter of Mr. and Mrs. R. E. McCurdy of 33740 Macomb, and James H. Lochary of Pomeroy, Ohio.

The bride wore a floor length gown of chantilly lace with a back sweep of nylon net, completed with a Juliet cap of Venetian and illusion net lace. She carried a cascade of spider chrysanthemums.

Her sister-in-law, Mrs. E. W. McCurdy, acted as matron of honor. She wore a Cotillion blue ballerina length taffeta gown and carried a cascade of white gladioli. Bridesmaids were Miss Virginia Cottingham of Athens, Ohio, and Mrs. William Knight of Pomeroy. Both wore blue taffeta ballerina length gowns with matching Juliet caps and carried gladioli bouquets.

Charles Lochary, brother of the groom, was best man, with William Knight and Ray E. McCurdy, Jr., acting as ushers.

The double-ring ceremony was performed at 4 o'clock in the afternoon with Reverend J. B. Guinan of the Trinity Episcopal Church officiating. The altar was adorned with two bouquets of dusty-rose roses with each pew decorated with a sheaf of pink gladioli. The center aisle of the church, covered with a white carpet, was scattered with rose petals.

Following the wedding a reception was held at the home of the bride. Refreshments were served. The wedding cake was topped with a small bouquet of sweetheart roses.

For the wedding the bride's mother chose a ballerina length navy blue lace dress with raspberry gloves and a jeweled hat and wore a corsage of rubrum lillies. Mrs. W. P. Lochary, mother of the groom, wore a ballerina length beige taffeta dress with brown accessories, completed with rubrum lilly corsage.

The newlyweds are now honeymooning on Port Austin, Michigan. For a going away dress the bride selected a grey dress and wore a pink cymbidium orchid corsage.

The former Miss McCurdy attended Farmington High School and completed her prep schooling in London, England. She graduated from Western College for Women in 1953. The groom is a 1952 graduate of Ohio University. He recently returned from a year's duty in Greenland as a First Lieutenant in the United States Air Force.

After September 8, the couple will make their home at Washington Court House, Ohio.

Fishing License Sales Lagging

Sales of resident fishing licenses appear to be lagging behind last year's all-time high, Conservation department officials report.

At this date last year, slightly more than 600,000 had been reported sold. To date this year, 561,000 have been reported sold.

However, A. L. McNeil, in charge of license sales, says a shift this year in the method of reporting sales may account for some of the evident slump.

Sales of both hunting and fishing licenses during the fiscal year of 1953-54 were the highest ever reported in the state; McNeil says he expected some cutback this year from those levels.

CARD OF THANKS

My deepest gratitude and heartfelt appreciation, to all the friends, neighbors, organizations, the police department, and especially the telephone company, the friends from Lansing, and all others who so graciously lent a helping hand in the very severe and critical illness of my mother, for the past six weeks. She remains critically low, in the hospital at Ann Arbor.

Sincerely,
Oreal Habermehl

According to experts, the thermal efficiency -- the ratio of heat output to heat input -- of coal is 3% greater than that of oil, and 6% greater than that of natural gas.

New Surface On Eight Mile Road

General road repairing operations continue in and around Farmington Township with work begun last week on that section of Eight Mile Road making up the southern boundary of the township. Repairing included the complete resurfacing of the road with bituminous concrete and work on side road approaches and shoulders. Pictured above is a crew in operation on a section of the road between Middlebelt and Tuck.

FLUORINE TREATMENT OF WATER NOT NECESSARY IN SOME PARTS OF STATE

Fluoridation seldom adds anything new to a municipal water supply, a recent Michigan study shows.

The study, evaluated by Dr. Fred Wertheimer, showed that fluoridation, to prevent tooth decay, merely adds a little more of an element already there.

Dr. Wertheimer, chief of the Public Health Dentistry section of the Michigan Department of Health, says the fact that fluorine is present in small amounts in most water systems is not generally known.

But actually, Dr. Wertheimer continues, analysis of public water supplies in Michigan for natural fluorine content revealed that most communities have trace amounts of fluorine present in the water supply. But, he emphasizes, not enough to give adequate protection against tooth decay.

Twenty-nine Michigan communities naturally have a fluorine concentration of from 0.5 to 0.7 parts per million. Dr. Wertheimer continues. In these communities, he points out, the fluorine concentration is merely raised to 1 part per million, the optimum or most favorable quantity of fluorine needed for good teeth.

Roughly, adding one part of fluorine to one million parts of water is like filling a bath tub full of water, then with an eye dropper adding three drops of fluorine.

And, the Doctor adds, there are fifteen communities where the fluorine content in the water is from 0.7 to 1.5 parts per million. Since these communities already have the optimum amounts, fluoridation is not needed.

In three other Michigan communities, he continues, the water supplies have more than 1.5 parts per million of fluorine. Here, he says, the fluorine concentration should be reduced.
