

The appliance is then placed in a "spray booth" and sprayed with acrylic lacquer, which only takes an hour to dry. At the end of the hour,

she washes any overspray that might have gotten inside and shines up the chrome.

MISS LAESCH WORKS in slacks, a sweat shirt and smock--and finds her job "very challenging, never boring." One of her more unusual requests was to spray a toilet seat. "I might have understood it, if he wanted an odd color," she said, "but it was white and he wanted it white again."

"When I told him he could go out and buy a new one for the price I would have to charge him, or that he could repaint it himself for very little, he still wanted me to do it. "He must have had a lot of memories on that seat."

The company also spray paints office furniture, metal kitchen cabinets and just about any other metal object. "You name it and I've sprayed it," Miss Laesch said.

GLASS-CERAMIC COOKTOP is a smooth one-piece built-in unit with no dirt or grease collecting in cracks or crevices. Easy to clean, spills wipe up with a paper towel.

COOKTOP CONVERTS TO COUNTER SPACE

Remodeling your kitchen is an exciting experience today.

Bright, bold colors are being used. Kitchen carpeting, wood grains, chrome and stainless steel are all popular. And new convenience appliances run the gamut from yogurt makers to Chinese Woks.

LIMITLESS NEW POSSIBILITIES confront the homemaker who sits down to plan "her" new kitchen. Should I replace this appliance? Would the refrigerator fit over here? Is there a more modern oven? How can I squeeze in more counter-space?

Most of these questions require hard thought and careful planning, with one solution often creating another problem. General Electric, however, has recently introduced a product which provides the answer to the ever present need for more counterspace while at the same time updating and modernizing the built-in counter cooktop.

THE NEW "CLEANLINE" smooth surface cooktop has four heating elements located out of sight under attractive "sunburst" patterns. The two sizes of heating elements, which turn yellow when in use, offer full

cooking versatility, and when not in use the entire glass-ceramic cooktop surface becomes additional counterspace.

No special cookware is needed for use on the cooktop as long as the bottoms are reasonably flat to make good contact with the easy clean surface. The smooth one-piece surface makes it easy to wipe up spills with just a damp cloth, and there are no cracks or crevices to collect food or grease.

MEMORIAL WEEKEND SPECIALS

SAT. 8-6 SUN. 10-5
OPEN MEMORIAL DAY 10-5

MICH. PEAT

Reg. \$1.29
50 lb. bag
