

## Few Changes Made In

Only slight changes will be made in hunting regulations for woodcock, snipe, rails and gallinules this year.

The Department of the Interior recently announced a frame-work of basic regulations on these migratory birds. Now it is up to each state to choose its own season dates within the limits of the framework.

Bag limits this year on woodcock are four per day and eight in possession, same as last year, and a 40-day season total somewhere between October 1 and January 15 is authorized. Michigan will use the same dates as last year.

## Hunting Regulations

use the same dates as last year, namely: October 1 - November 1 in the upper peninsula, October 1 to November 9 in the northern lower peninsula, and October 20 to November 9 in the southern lower peninsula.

A bag limit of 15 per day and 25 in possession on snipe and 25 per day and 25 in possession on gallinules and other rails also was authorized. The season on these birds will coincide with regulations on waterfowl, to be announced later.

Hunting hours will be the same as last year.

tion: Lending, Guarding and Insurance activities, \$200 million; Overseas Economic Operations, \$360 million; Paperwork management, \$288 million; Personnel and Civil Service, \$48 million; Real Property management, \$183 million; Special Personnel Problems (Department of Defense), \$388 million; Subsistence (food and clothing), \$400 million; Transportation, \$151 million; Use and Disposal of Federal Surplus Property, \$2 billion. Seven of the Task Forces did not make estimates of possible savings.

Mr. Hoover emphasized that adding up these sums would produce a misleading figure because some of the estimates are partially overlapping. "If any event," he said, "with all such discounts, there are enough possible savings left to enable the balancing of the budget and reduction of taxes, — without impairing services."

Another source of substantial savings dealt with by the Commission was the Federal enterprises now producing goods and services in competition with private enterprises. "The Task Forces," said Mr. Hoover, "roughly estimate proceeds from the sale of the real estate alone in enterprises which should be closed down at \$10 billion — to be returned over a number of years."

"Altogether," he said, "a strong drive to recover investment, unnecessary liabilities, liquidations, and the realization of property assets should expedite benefits to the Treasury of about \$15 billion." It is the feeling of the Commission that this huge investment of tax money could be recovered and the efficiency and effectiveness of government improved thereby. Fifteen billion dollars in tax money means \$300 to each of our nation's 50 million families. And that's just one item in the Hoover Commission's recommendations. Our pocket books have a big stake in what happens now with these recommendations.

REPUBLICANS HAVE created a party promotional scheme to fight off Democratic inroads in the legislature.

Democrats have always maintained that the entire legislature should be apportioned on the basis of population, a situation that would give urban areas control; Republicans figure districts areas plus people — is the fairest.

The Republican committee will work in marginal districts.

## HANDLING INJURED

Drivers who are involved in or reach (the scene of an accident should keep one consideration in mind above all others. Take no chances with the injured. The proper handling of injured persons can save lives and minimize the injury. The most important step is to send for a doctor. While waiting for medical or police help, do what you can to make the victims comfortable and keep them warm. Move or render first aid only if clearly necessary and if you know exactly what to do and how to do it.
