

### Franklin Knolls News

EARL TEEPLES MA. 6-6533

A plan for more adequate fire protection in Franklin Knolls is now being worked out between the subdivision and the township. Originated by George Steinberger and being carried through by Township Supervisor Ernest Blanchard, the plan, though still in its infancy, is showing great progress.

If the plan is accepted it is believed that far better protection will be provided and that insurance rates may be lowered as much as \$75 for the first three years and the same amount for each successive three year period.

Carol Ann McLeod, daughter of "Jockey" Don McLeod, had her first real party Sunday in celebra-

tion of her fifth birthday. The kiddies attending enjoyed ice cream and cake for refreshment and a real clown to entertain them. Pony rides were also offered. Adults attending the party along with their children were entertained by Don and Val.

The Joe Stacey's have sold their home on Gilchrist to the Terpacos, who are new owners. The Terpacos moved into their new home August 1 and have set up housekeeping.

Jack McLaughlin and Al Clark are back from another fishing trip to Mullet Lake, displaying the usual burns and loaded with fabulous tales of fish and fishing.

Linda Morrison of Lansing is visiting the Wile family on Queensboro Drive.

It was disclosed last week that one of the new resuscitators purchased by the township recently were kept at the fire hall on Northwestern Highway. Roy Bell, fire chief, stated that all of his volunteer firemen will be thoroughly trained in its use.

Work on fire street signaling is now being worked out by Chief Bell whereby only the resuscitator will be needed.

Tom Griffin, who has sold many residents of Subdivisions 1 and 2 their homes, is now back in the model in Sub. No. 3. He has been working for the same real estate company in other areas for some time.

Street signs to be erected on Gilchrist, Queensboro and Shrewsbury are scheduled for delivery within the next ten days, it was learned this week.

Several in Franklin Knolls are now subscribing to The Farmington Enterprise and finding it interesting and informative reading. All you have to do is call Mr. Earl Teeple, at MA 6-6533, and I'll see that the paper is delivered to you through the mail weekly for only \$3.00 a year.

### KIDDIES' BARN YARD TO BE FEATURED AT STATE FAIR

Michigan's small fry will have a corner of the 1935 Michigan State Fair all to themselves. There will be the Kiddies' Barn Yard and the Kiddies' Playland where the little people can enjoy all the attractions of the gigantic fair in miniature.

The Kiddies' Barn Yard will be constructed on the site of the old Home Arts Building which was razed last summer.

A complete small scale farmyard will be portrayed including a farm house, barn, silo and weather vane. The farm will be completely fenced in, and animal stalls will house farm animals of all types.

Young animals will be shown whenever possible — lambs, colts, calves, goats, pigs, geese and hazyards fowl, all supplied by 4-H Club members in Michigan.

This feature, the original idea of General Manager Donald L. Swanson, will enable parents to show all the farm animals to their children with a minimum of effort.

Right across the street will be the Kiddies' Playland which will feature miniature carousels, rocket ships, a 36-passenger coach pulled by a six palamino hitch, playground equipment and entertainment.

On the program are such things as turtle races, a jumbo jungle with elephants and monkeys, trained dogs and other circus type acts to amuse the youngsters. The playland will be supervised by the Southern Oakland County Girl Scouts at all times.

Both the Barn Yard and Playland are free attractions, offered through the cooperation of the Michigan State Fair, the Department of Parks and Recreation, and a number of Detroit industrial and commercial organizations.

### SUGGEST RULES FOR SAFE FUN IN THE WATER

Safe-guard the conditions under which you enjoy the water, Dr. J. G. Molner, Detroit Health Commissioner, suggests for those who plan to spend some summer days at the lake or beach.

Always have another swimmer with you when you are in the water.

If you swim after dark, use extreme caution and stay near the shore.

Almost anyone can have fun in the water if he knows when to swim and when to stop, Dr. Molner says.

Never swim in a pool or lake that you have never swum in before.

### THE GREEN TURF

### APPLE CROP TO BE SUBSTANTIALLY SMALLER IN STATE, EXPERT PREDICTS

Michigan stands 6th among apple producing states, but the 1935 crop in the 21 commercial counties will be less than last year's yield. Early apples such as the Yellow Transparent and Duchess already are being harvested in southern counties.

The apple harvest in the commercial counties is expected to total 5.9 million bushels, it was announced by Director G. S. McIntyre of the Department of Agriculture, following receipt of the most recent information of the Federal State Crop Reporting Service.

While this year's yield is expected to be only 100,000 bushels less than a year ago, it actually is about 30 per cent less than the five-year average. During the years from 1949 to 1953 the average was 8.39 million bushels.

Lighter production this year is expected because of a freeze May 9 which took a toll of all fruits, some worse than others. Peaches, the harvest of which is now beginning, came through the cold better than some other fruits. Apples and cherries were both reduced substantially.

Nationally the apple crop will be four per cent below last year's production, but only one per cent under the average. The national apple crop is expected to amount to 105.5 million bushels.

Asked for the early varieties, which are highly regarded for pies, sauce and for home canning, there are several popular later kinds that do well in Michigan. Among them are the Westby, McIntosh, Jonathan, Delicious, Northern Spy, Grimes Golden, Winesap, Greening and others.

Ask any woman what she wants most of all, and she always says, give me time to think.
