

Bulletin Out On Care Of Deer, Cooking Venison

Advice for deer hunters on the way to care for killed game and the best ways to cook it is contained in a Michigan State University extension bulletin. A single copy is free at the county extension office.

Written by Paul M. Barrett, extension specialist, the booklet tells how to bleed the deer after the fatal shot, how to dress the carcass, how to cut it up and the venison cuts you can expect.

The booklet concludes with 15 recipes on venison game that are prepared for the table so it will be the most tasty.

County Over The Top In Savings Bond Sales

Noble D. Travis, state chairman of the Treasury Department's U. S. Savings Bonds Division, commended workers in Wayne, Oakland and Macomb Counties for the outstanding work they have done to step up savings bonds sales in 1955.

Speaking at the fall meeting of the Michigan Bankers Association, Group Ten, Travis pointed out that 1955 savings bond sales for the three counties represented at the gathering totaled \$160,207,198, equivalent to 100.8 per cent of the area's quota for the first nine months of this year. This is the highest nine-month total chalked up for more than ten years; sales for the January-September 1954 period were \$147,760,718.

COLDS COMMON NOW, HEALTH HEAD URGES UTMOST PRECAUTION

If you have a head cold and are sneezing, you are just one of many. Dr. Joseph G. Molner, Detroit commissioner of health, says the early fall season is one of the best periods for colds. For other two are January and March or April.

Almost everyone has at least one cold a year. There is just one way to catch a cold, that is to come in contact with another person who has one. The common cold is a virus infection and as long as you are today, this virus is not destroyed by any known drug or other remedy. However, infections which follow a cold are responsive to treatment by antibiotics.

It pays off to take every possible precaution to avoid a cold and if you do get one, take care of yourself when it begins, but cause illness only under conditions which are favorable to them. This is the reason a cold often precedes pneumonia, sinus infection or ear infection.

Children younger than five years old are most likely to take colds.

Dr. Molner suggests the following precautions for avoiding colds. Whenever possible, stay away from anyone who has a cold, and be especially careful of young children from anyone who coughs or sneezes carelessly.

Get enough sleep to wake refreshed; get enough rest.

Wash your hands thoroughly with soap and warm water before eating or handling food.

Eat meals that are well balanced.

Avoid over-fatigue, but don't overlook recreation.

Dress according to the weather. Wear light clothing when doing hard work and keep extra clothes ready to put on when you are inactive.

When you catch a cold, it is usually milder and ends more quickly if you take special care of yourself from the beginning. Get as much rest as you can. Keep comfortably warm and dry, and if you must go outdoors, dress suitably for the weather. Eat simple, easily digested foods. Drink plenty of liquids - especially water and citrus fruits.

Consult your doctor if you have chills, fever and aching, or if the cold is more than usually severe. Medicines, including antihistamines, should be taken only under the physician's direction. Even those which relieve discomfort may be harmful if used without the doctor's advice.

Westbrook P.T.A. Meets Recently

Approximately 65 parents and teachers attended a recent meeting of the Westbrook P. T. A. and heard a talk by Yvonne Loftus on the topic "What's Up, Doc, in Modern Education?"

Through her position as an instructor in the College of Education, Wayne University, Mrs. Loftus was able to give both the teachers and the parents a close view of the present trends in educating children. The group question and answer period which followed brought out a great deal of information of importance to parents.

The Westbrook P. T. A. membership committee reported a substantial increase in membership during the past month.

The program at the next meeting will consist of a panel discussion on the topic "Are Our Schools Teaching Our Children to Read?" The time and place of the meeting will be announced at a later date.

Organic Garden Group To Meet On November 5

Wayne County Organic Gardening and Farming Club will hold its monthly meeting at 8 p.m. Saturday, November 5, at Mach's Flower Shop, 7712 South Morrison Road. The meeting date is two weeks earlier than usual.

William C. Kenner of Livonia, a member of the club, will be the principal speaker. His two topics will be on herbs and rezeology.

An invitation is extended to anyone who is interested in the organic movement. An organic lunch will be served.

LIVONIA SOLDIER TO LEAVE FOR GERMANY SOON

Pfc. Aronne J. Goldkette, 21, son of Frank L. Goldkette of 28520 Clarita, Livonia, is scheduled to be sent to Europe from Fort Riley, Kansas, in November as part of Operation Gyroscope, the Army's new unit rotation plan.

Private First Class Goldkette is the first division to move under the Gyroscope plan. It will replace the 1st Infantry Division, which is returning to the States.

A fire direction center computer with Battery B of the division's 25th Field Artillery Battalion, he entered the Army last April.

CHRISTIAN SCIENCE

Man's true nature as a child of God will be set forth at Christian Science services this Sunday.

The Lesson-Sermon on the subject of "Adam and Fallen Man" will include the account of Christ Jesus' healing of the man "which had a spirit of an unclean devil" as recorded in Luke (4).

Correlative passages will be read from "Science and Health with Key to the Scriptures."

Looking Ahead

By DR. GEORGE S. BENSON

(Continued from Page 2B)

In recent years, the University of Virginia has conducted a "McGuffey Reading Clinic" on the Charlottesville campus.

The authors of the new McGuffey Readers are: Ullin W. Leavell, professor of Education and Director of the McGuffey Reading Clinic, University of Virginia; Mary Louise Friebele, author of children's books; and Tracie Cushman, former classroom teacher, Grand Rapids public schools. The American Book Company, New York, San Francisco, etc., is the publisher. The books are called, "The Golden Rule Series, the Modern McGuffey Readers."

Sponsors of the series are Mr. and Mrs. C. E. Palmer of Texarkana, Arkansas-Texas, ardent McGuffey disciples. Mr. Palmer is the widely known publisher of metropolitan daily newspapers; and he has other business interests. He is known for his philanthropy and for his special interest in education. The Palmer Foundation was established "to foster and promote through the public schools and otherwise these basic principles of morality which are common to all civilized races and religions, best exemplified in the Golden Rule; and to promote American patriotism."

Next week: The Teachings of the Modern McGuffey Readers.

Here it is for '56 -

Best Buick yet

When better automobiles are built Buick will build them

IT COMES upon the heels of the most successful Buick in history—and beats it on every score.

In shimmering steel and solid sinew, it's Buick for 1956—and there's never been anything like it for pure automobile.

You get a good hint of what we mean when you take in the sweep-ahead styling of it—from the air-splitting prow of its V-front grille to the robust rake of its cantared rear profile.

You get an even better hint when you open the doors and see the dazzle there—in the decorator fabrics and decors—in the jewel-like finish of the fittings—in the precisely shaped steering wheel and controls—in the rich new instrument panel with soft-padded top and glowing dials that detail your progress in changing colors.

But it's when you put this beauty to the city streets and the open highways that you learn the best of it.

Performance Without Parallel

A new advance in Variable Pitch Dynaflow® gears airplanes one better—steps up your get-away in normal driving without switching the pitch. But when you need that extra surge, it's there, instantly—and in extra abundance.

The might of big 322-cubic-inch V8 engines in every Series brings new record high power to all Buicks—ROADMASTER, SUPER, CENTURY, and the bedrock-priced SPECIAL. Yet this is such high-compression power, such dynamic driving power, such completely usable power at the rear wheels—the whole rear end has been endowed with extra brain and heft and solidity to handle it.

We could spread before you an acre of buick-

prints on the engineering gems that spark the spectacular performance and ride and handling and roadability of these great Buicks for 1956.

We could tell you about a new double-Y manifold of the engine for more usable power. And about a brilliant new front-end geometry that adds a whole new "sense of direction" to the car's travel. And about massive new direct-action shock absorbers that move three times more oil to cushion your all-coil-spring ride that much more buoyantly.

But you can get the full story right now, at our showroom, in a face-to-face meeting with the best Buicks yet—now on display, and setting a dazzling new pattern for 1956.

*New Advanced Variable Pitch Dynaflow is the only Dynaflow Buick built today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.

KEEP FROM BETWEEN PARKED CARS

PEDESTRIAN fatalities in urban areas last year were almost 50 per cent of total traffic deaths. Many of the deaths were due to persons suddenly rushing from between parked cars and into the path of an oncoming auto. Therefore, Automobile Club of Michigan urges children and adults alike to "Keep From Between Parked Cars."
