"HE THAT IS TAUGHT ONLY BY HIMSELF HAS A FOOL FOR A MASTER."

Many people, who have never spent a day in a medical university, foolishly believe that they can advise their friends how to treat an illness. They mean well, but can cause serious harm.

The proper diagnosis of a disease is an art that a physician acquires only after years of study and internship training in a hospital. It is more important to treat the cause of an illness than to just relieve discomfort, which is usually the most any self-treatment accomplishes. When you are sick be guided by your physician.
