"Whenever I'm down in the dumps," said the matron, "I always buy myself a new hat."

"Oh, I see, Dearie," said the second matron. "I've always wondered where you got them."

If you're a typical husband, you've probably had to fork over an extra five or ten one time or another, just so your wife could go out and buy a new hat and get rid of that "down in the dumps" feeling.

dumps" feeling.

But next time you see signs of another domestic depression,

not substitute with some little doit-yourself job around
house, to make her work easier from then on?

Take a look at your baseboards, for instance. How are they, plain or fancy? If they're modern! they're as plain as possible, simply because housewers over the years have grown gritying to remove the dust from fancy baseboards that had no business being fancy. In earlier times it was some characteristical of how to "dress up" the appearance of a room.

If your baseboards are of an old-fashloned, intricate, dust-catching design, why not rip them out and puttin some smart, simple ones that will make mopping and dusting a far easier chore?

It's quite a simple job and it's one that will pay for itself in the saving of time and energy that your wife has been spend-ing needlessly in the past:

Try it, and just see if it doesn't please her as much as half a dozen new hats would!
