MICHIGAN BELL

TELEPHONE lines

MANY HOUSEWIVES are taking the "run" out of running their homes. Know how? By putting telephones wherever they need them—in the kitchen, in the bedroom, in the living room, and down in the basement. Well-placed phones save countless steps and lots of time for the home "managers." And, of course, additional telephones bring better service to everyone in the family. The cost? Just a few pennies a day, plus the one-time installation charge. Order your additional phones from our Business Office today.

HOW CAN shut-in boys and girls keep up with their school work? In recent years Michigan Bell's School-to-Home telephone installations have proven to be one successful method. Telephone equipment, using special two-way speaker units, lets the child who must stay home, or even in bed, hear everything that goes on in his regular classroom. He can recite and ask questions just as though he were actually in school. This daily contact with classmates gives the shut-in child a sense of belonging; he is a real part of the class. We'd be glad to tell you more about School-to-Home telephones. Just call our Business Office.

SCIENCE CAN GIVE us great entertainment as the Bell System's television Science programs show. These programs aim to bring you an understanding of scientific work and its importance to modern life. And, of real importance to our country's future, they are helping to interest young people in scientific careers. The second show in this series, televised nationally, is the fascinating story of blood. It's called "Hemo the Magnificent" and will be on the CBS-TV network at 9 P.M., March 20.

Normandy Hills
W. L. COGSWILL
GR. 4-4308

Susan Thorpe of Browne Troop 783 participated in the annual Girl Scout Birthday Party at the Junior High gymnasium on March 8. She also took part in skills and games. Tomorrow, the international theme of the program.

Excitement ran high around noon last Saturday when a brush fire in the subdivision got out of control. It was very efficiently extinguished, however, shortly after the arrival of the Farmington fire department. Residents are cautioned against burning brush and rubbish on dry, windy days.

The Cogswill family and Mrs. Ruby Cogswill enjoyed a dinner party last Saturday evening at the home of Mr. and Mrs. Edward White, former neighbors of Auburn Avenue in Detroit.

The Plan Approval and Restrictions Committee of the subdivision met at the home of Elliot Rogers last Monday evening to consider plans submitted by Mr. and Mrs. Norman for lot number 30 formerly owned by Mr. and Mrs. William Babiarz.

Looking Ahead

arise in the sprawling government bureaucracy who live like kings. And now, reporting in United States was World Research, a Virginia research educator, G. Warren Nutter, makes the same kind of report after a fact-finding tour of Russia for the U. S. National Bureau of Economic Research.

Professor Nutter visited a number of Russian factories and observed "scientific Socialism" at work. One was a factory at Leningrad producing curtains, tablecloths, etc. Before Socialism-Communism took it over, it was operated as a private enterprise. The building almost all the machinery and a great deal of the technology, noted Professor Nutter, "obviously date from the tsarist period."

"Progressive" Socialism.

"Except for one floor of new spinning and winding equipment built in the Soviet Union and East Germany... the machinery is of 19th, 20th, and French design, as installed around 1886. Much of the power is transmitted through overhead belt lines, a relic of the days when steam engines were used as prime movers. The rooms are dark, dirty and crowded with machines. Not even primitive safety equipment is to be seen, and granite is used as a lubricant, and it covers everything with its characteristic black and slippery coatings—stairs, walls, railings and workers."

"On the whole this plant looked like something out of the nineteenth century..." Some of the other plants visited by Professor Nutter were newer and more modern but at the end of all his travels and studies he concluded that the Soviet economy is 50 years behind America's. Close examination of Russia's production record under Government ownership, on 17 important products, shows that in the days when steam engines were used as prime movers, free enterprise (U. S. A. Let's guard against the growth of Government power in its own system. Our prosperity and freedom are at stake.

Guest speaker at the Clarenceville Optimist Club meeting to be held on Wednesday, March 20, at 6:30 p.m. will be Abraham Bricker, executive secretary of the Michigan's Multiple Sclerosis chapter and centers.

Bricker will speak on the topic, "Multiple Sclerosis—A Mysterious Disease."

Louis Schmidt, club program chairman, states that Bricker will outline the Michigan Multiple Sclerosis Center's care and treatment for multiple sclerosis patients, the community responsibilities in relation to employment and the research programs into the cause and cure of the disease.

Colored slides of the treatment given at the Detroit clinic located at 1800 Tuxedo will be used to highlight the talk and the following discussion.

The Michigan Multiple Sclerosis Chapter is a member agency of the Michigan United Fund and is a United Foundation Torch Drive Agency.

**Around The Circle
In Staman Acres**
MRS. WILLIAM SMITH GR. 4-8292

The Civic Association meeting held in the Clarenceville Fire Hall last Thursday was very well attended. President Bob Williams wielded the gavel and the business of the evening was efficiently and quickly taken care of by the officers.

Various committee reports were heard. Under discussion was a street backlogging, street signs, an entrance sign at Orchard Lake Road, and auditing of the books. Mory Callolette and Marlowe Larson were appointed to fulfill the latter job.

Two men volunteered to serve on the committee under Jim Ellis, the Subcommittee on Public Relations for the Temporary League of Subdivisions Association. They are Adolph Maldonado and Ray Sisty. They will serve in this capacity at least until the June elections.

A motion was passed by the membership to join the League of Subdivisions pending receipt and approval of their by-laws.

A social hour followed the meeting. The group enjoyed cupcakes and coffee provided by Linda Cusack, Mandy Jajick, Mar Esser, Gladys Hart, and Pat Freeze.

The Staman Stitches held their monthly pinning brunch at the Star Circle Drive home of Bea Sisty. There were eleven ladies present to sample the home baked rolls and bread the business ladies of the nine o'clock get-together. There were 100 cancer pads needed for the Stitches to sew.

More white material is needed and an appeal has been sent out by the ladies. The best fabric and that which comes in sufficient yardage is old sheets. Call in donations to Margaret Sisy, GR. 4-1784.

The Ron Taylors of Orchard Lake Road have now joined the enthusiastic newcomers interested in organ music. Ron, Jane, Gail, and Ritchie, with Gail having the apparent talent right now, are all busy on the keyboard of their new Eskey spinette organ. Perhaps in a few years there will be enough organs in Staman Acres to have a five- or eight-organ concert, with Jack Cross providing an example of less esthetic music by conducting a "bottle band," at which he and Zora are quite adept.

Olive and Norman Hennessey are back from a month's vacation in Florida. The Hennesseys motored around the state, "saw the sea" and enjoyed the weather along the coast in the seventies or higher. They returned March 1.

Another family home from Florida are the Vic Waskowskis, who flew down with sons Bob and Hank, and wee daughter, Debbie. They spent eight days in Miami, much to the delight of Charlotte's parents, Mr. and Mrs. Anthony Kaczynski, who reside in Miami.

Charlotte and Vic frequented the dog races and Bob and Hank went deep-sea fishing. They had one stroke of luck and can tell about the 32 inch Kingfish that didn't get away.

A pizza and canasta party was in store for the guests at Chuck and Kay Darapada's home on Star Circle Drive last Saturday night. Mary and Mory Callolette and Hazel and George McKee were the hands-around-the-table, and lucky samplers of Chuck's pizza.

Louise and Mike Sidosky consider their house officially and satisfactorily warmed up, for they did it in so many complexes do when moving in a new house, "got the gang together." Louise states that the party was a real let-up for her and gave and that the guests entered into the spirit of the occasion.

Those present from Detroit were Mr. and Mrs. Richard Wolf, Mr. and Mrs. John Simons, and Mr. and Mrs. Robert Slando. From Livonia came Mr. and Mrs. Brenden McIntyre, The Leo Condons from Allen Park and Mr. and Mrs. Thomas Harrison came from Birmingham. A glazed baked ham served with Louise's special potato salad, traditional baked beans.

How come the new Ford rides so smooth and solid?

It's the new inner Ford that gives you a big-car ride at low Ford prices

- Talks just naturally how Ford's lower, sleeker silhouette. And they love Ford's new Thunderbird V-8's and Milenge Maker Six. But the thing that's really got 'em buzzing is Ford's new ride. In the new kind of Ford, vital riding features team up to give you the smoothest going in the whole ride world. For example:

- New automatic variable-rate rear springs**
Going from a highway to a byway in a Ford, it's like going from a solid to a soft ride. New design allows Ford's rear springs to "soften" or "stiffen" depending on road conditions. You get a smooth ride all the way!

- New swept-back Ball-Joint front suspension**
Ford's new, stronger front suspension is designed to soak up the shock of rough roads. The new swept-back design lets wheels "roll" with the bump and absorb it going away... for far smoother, quieter sailing.

- New lower-pressure tires**
Even Ford's tires are new for a better ride! Although only Ford in its field uses 20 Cushion Quiet rubber body mounts... more than any other low-priced car. It all adds up to a smoother, quieter riding car.

- No metal-to-metal chassis and body contact**
Only Ford in its field uses 20 Cushion Quiet rubber body mounts... more than any other low-priced car. It all adds up to a smoother, quieter riding car.

- More comfortable seating**
There's no sag when you sit in a Ford... even on long trips. Comfort-centered seats, rigidly anchored, have advanced springs for greater comfort and longer life.

- More body insulation**
Ford has more body insulation—protection against weather, dust, and noise—than any car in the low-price field. You ride through city traffic in luxury-like quiet.

Try the new kind of ride in the new kind of

**Library Friends
View Rare Books**

At a meeting on March 5, members of the Farmington Friends of the Library group had an opportunity to examine a variety of rare books and other items displayed by Mrs. Frances J. Brewer, chief of the Rare Books Division of the Detroit Public Library.

Included in Mrs. Brewer's collection displayed besides rare books were rare book bindings, art work in wood cuttings and metal work. Mrs. Brewer also discussed some of her experiences in the Rare Books Division and gave a talk on the topic "What Friends of the Library Group Can Do."

During the business portion of the meeting the membership approved an amendment in the by-laws of the organization to increase the number of directors from nine to twelve. Nominated and elected to these newly established posts were Howard Weist, Arthur Bassett,
