Calls Recent Action "Political Smoke Screen" ---

We follow the news with close scrutiny as to what the Suppressors of the Truth across the water are doing. The old bromide that "we can't see the forest for the trees," well applies to our own Township. If the people would take the time to learn the truths about Township where they live, they would rise up in arms against the Dictatorial Rule existing here at home.

At it is one of all situations where you have something you don't want to come to light, it is good tactics to lay down a Smoke Screen. The Farmington Township smoke screen consists around what seems to be the only problem facing the Township—Water For The Dry Area. This, in and of itself, is an important issue, but it is far from the only issue that must be met by the administration that you vote into office in the coming election. This could be termed as a Smoke Screen.

To divert attention from past failures just before the election, we are told that our Township Board has acquired the services of an expert in the bonding field to secure the money needed to install a water system. For this we are asked to forget what has happened in the past and all pull together to get the job completed. We are given the impression that "speed is of the essence." If the truth was known, next to nothing has been done about relieving this condition. I wonder what the people who are now and have been in office for the last ten years carrying the water needed to exist, have to say about the speedy action they are getting to relieve this situation. I wonder if a serious epidemic could be avoided by asking it to "wait and hope for the future."

BREAD IS THE STAFF OF LIFE, BUT IT CANNOT BE MADE WITHOUT WATER.

If you are one of the fortunate who is not in the dry area, you are probably wondering what your Political Smoke Screen could be. HAVE YOU SEEN AS MANY MEMBERS OF THE OAKLAND COUNTY ROAD COMMISSIONS CARRYING CARE TO OUR ROADS IN THE PAST AS WE HAVE NOW JUST BEFORE ELECTION? This is a good way to get the much needed repair work done, but unfortunately, election time comes only once every two years. After April 1, we will once again be asked to pay taxes on the County problem and the County will not spend our money. I know we should not look "a gift horse" in the mouth, but this is not a gift. We are paying for this service and we only receive action when a POLITICAL SMOKE SCREEN is needed.

There is The Question of Taxes. We must all pay taxes and we know this as necessary as going to work each day. But, did you ever stop to think that the present assessment is like the well known fingerprint theory, "no two people pay the same tax." You might be living next door to one who paid the same price for his house as you did and yet your tax is nothing like his. This is not dishonesty, it is merely lack of ability or failure to do the job properly. There should not be this variance.

Why Is The Governing Of The Township centered entirely in the hands of a select few or their relatives? Most of the positions in the Township that pay any sort of compensation or that has any administrative power, can be traced in the one direction. Does this group have all the "know how" for operating our local government? Could it be that we are hoodwinked, do not care, or do we feel that we can do nothing about it?

Much Ado About Land Development—This is a well discussed topic by a few, passed over by still another few, and not known by many. Zoning and Master Planning is a healthy field of endeavor for consideration, but it seems that nothing can be done until the Old Guard have completed their particular holdings. It is remarkable how fast legislation of this type can be passed when the toes of certain groups are protected. It seems that when some of select group have not completed their particular development with the speed that was expected, it is necessary to revise legislation for passing at a later date. This might be considered for the slow process, but it is selfish when the Township as a whole is considered. No matter what adjectives are used to pretty this type of action, it is not fair. THE END CAN NEVER JUSTIFY THE MEANS.

If You Can't Fight Them, Join Them. — This might be the answer but I would hate to believe that this is a majority opinion. There have been some that raise their voices against these inequities. The answer they receive is "If you do not like things the way they are, you can always go back to where you came from." Is this the answer? Is this America? I like to think that if the people knew the situation, they would do something about it. If all of the complaints were from people of the same political party, you might say that

this too is a "Political Smoke Screen." It has gotten to the point that many who for years loved the political thinking of one party are banding together, casting political segregation aside, and thinking of the Township first. These people have been classified as Rabbie Rousers.

WE CANNOT HOPE OR EXPECT a healthy improvement in our local government until the ranks of the so-called Rabbie Rousers are increased and the ranks of those whose intelligence is being insulted, is depleted. Take time to inform yourself and I know the situation will not be allowed to continue. Good Government Begins At Home. The need for Truth Votes is exactly right here in our own back yard. If you take the passive attitude and do not vote, you have no one to blame but yourself.

Let's put Democracy back into local government.

Not A Procrastinator.

Political Signs ---

Dear Sir: For the first time in the history of Farmington Township there is an organized effort by the Democratic Party, to bring the two party system of government to the Township. This should be a reason for rejoicing by the residents and I am sure it is, for most, because the position is the basis of our economic as well as our governmental system.

It appears to be causing considerable trouble, however, to a number of some members of the opposition. This is illustrated quite clearly by the swiftness they showed in tearing down and mutilating the political signs in other communities remain untouched for weeks and months.

The Democrats realized the signs would be somewhat of an eyesore and plans were made to remove them all immediately after the election. They also knew that signs posted on trees near the highway were by law, subject to removal by the proper authorities, although political signs in other communities remain untouched for weeks and months.

The Democrats expected the law to be strictly adhered to and some of these signs would be removed. However, the desperation of the opposition was underestimated. It was not the desperation of the opposition was underestimated. It was not the desperation of the opposition was underestimated. It was not the desperation of the opposition was underestimated.

More Determined Democrat

'Heart Beats' To Play For Guys and Dolls

The "Heart Beats" dance band will furnish the music for the Guys and Dolls Teen Club to be held this Friday evening.

Sponsored by the Clarenceville Optimist and Opti-Mrs. Clubs, the teen club dances are held every Friday evening from 8 p.m. until 12 midnight at the V.F.W. Hall on Seven Mile Road near Grand River. All are invited to attend the dances and join the club.

All-purpose flours are those blended from hard and soft wheat flours to give satisfactory results for all general home baking. They are lower in protein than bread flours.

COMPLETING his boot camp training at the Great Lakes Naval Training Station was Donald L. Warner of 21333 Pembroke, Livonia. He is now stationed at the Personnel Men's School at San Diego, California. Warner is a 1936 graduate of Clarenceville High School.

Food Chains Operate On Small Profit, Big Volume

Recently published figures show that food chains use more than 98 cents of each sales dollar to buy merchandise and pay salaries, rent, utilities, service, equipment, taxes and other costs. The small margin of profit remaining is made possible only because of self-service, cash and carry, large volume, fast turnover and ever-increasing efficiency.

To graphically illustrate the small net profit realized by these stores, some of the stores on a recent day gave each customer a penny in a small envelope. Printed on the envelope was a message explaining that the penny approximated the chain's net profit on each dollar of food sales. Actually, the profit averages 1.2 per cent of that dollar.

Modern operating methods followed by the food chains have cut the cost of distribution by one-fourth since 1937—though in those intervening years the cost of practically everything the chains must buy and use have soared. And what is true of chain merchandising in the food field, is true generally of all the other kinds of mass retailing.

Hated is active, and envy passive dislike; there is but one step from envy to hate. —Goethe

Society Stunts Child Creativity

Most children have had their creativity frightened out of them by the time they begin school, contends a well-known psychologist Dr. Harold H. Anderson of Michigan State University.

Anderson states that personality growth is a matter of being free to be inventive.

But, he says, "we spend the first 10 years of our association with children trying to hold them back and the second decade trying to push them forward. Then we wonder what's wrong."

This situation, he describes as an example of the "degrading of human energy" which he said is one of the main psychological ills of civilization. Another is the teacher who merely gives not answers and thereby confuses and deprives a student of thinking for himself.

Most people, Dr. Anderson maintains, do not approach their optimum in creativity or realize how it could change their lives. Psychologists themselves may be partly responsible for the trouble, he suggests, by concentrating on "negative studies" of frustration, aggression and other mechanisms while overlooking opportunities in studies of "positive, creative, harmonious and responsible growth behavior."

Awarded B. A. Degree From Michigan State

Paster D. Aschenbrenner, Farmington, was among a group of 388 students at Michigan State University who received bachelor degrees at winter term commencement exercises held March 15.

He is the son of Mrs. Z. R. Aschenbrenner and the late Doctor Aschenbrenner of 23240 Power Road. Aschenbrenner was awarded a bachelor of arts degree in general business.

Competes In College Art Contest Recently

Named as a participant in the Olive College annual art competition sponsored by the Bookstore and Coffee Lounge at Olive was Douglas Byron of Farmington.

His picture was rated among the best by a group of judges from Olive Village and Olive College. An art student at Olive, Byron is the son of Mr. and Mrs. Harold Byron of 21325 Tulane Street.
