Your Natural Gas Comes A Long Way

The natural gas you get at the turn of a valve has traveled hundreds of miles. Laying pipelines to carry it to you presents many engineering problems. Rivers are only one of the hazards which must be overcome on the pipeline's cross country journey. Since gas is lighter than air, 30 pounds of ballast are used for each foot of 30-inch pipe in a water crossing. Corrosion is another headache engineers have minimized by coating and wrapping the pipe before it goes into the ground. Millions of dollars in equipment join with labor and know-how to keep natural gas flowing to your home or place of business. Natural gas is your dependable low-cost servant.

Only GAS does so much, so well... the modern fuel for automatic cooking... refrigeration... water-heating... house-heating... air conditioning... clothes-drying... incineration.

with them. The bills a committee approves are reported to the full chamber with a recommendation for favorable action.

The committee can report a bill "unfavorably" or with no recommendation, but this seldom happens. No report at all prevents the entire chamber from discussing the bill.

After one chamber of the legislature approves a proposal, it goes to the other chamber for a similar workout.

If it then passes this procedure, it then goes before the governor. If he vetoes it in which case both the house and senate must go through the procedure again. And this time the bill must pass by a two-thirds vote instead of a simple majority.

The governor can also sign the bill which makes it a law. Or he can do nothing, in which case the bill automatically becomes law after 10 days.

In the present session about 600 bills are expected to be introduced. When final votes are counted, about 200 will actually become law if averages of other years hold true.

CAN UNIONS spend funds for political purposes?

This issue originally was placed before the federal courts in Michigan in 1954 when the justice department brought a suit against the United Auto Workers for violation of the corrupt practices act as amended by the Taft-Hartley act.

At that time Judge Frank A. Picard dismissed the case. Now the U. S. Supreme Court says that he was wrong in doing so and has ordered the case to trial.

The case arose over a UAW television program which gave thanks to Democratic candidates. The Republican state chairman turned the information over to the justice department. He charged that many Republican union members were forced to make contributions to campaigns of opponents when the union supported the Democrats.

The corrupt practices act long ago outlawed political contributions from corporations in campaigns involving a federal post. The Taft-Hartley act places unions in the same category.

Changes are it will be several years before a final decision is reached. The case already has been before the courts for more than two years.

Now it must be tried on its merits before the federal courts in Michigan. On a question of such great importance it is almost a forgone conclusion that the losing side will appeal the decision to the Supreme Court once again.

United States shrimping, which now brings in an annual 250 million pounds of shrimp, did not get out to sea until 1917. It was at this time that the small offshore boats were replaced by ocean-going trawlers and the industry began its bigtime career.

Mortgage Loans Over \$1 Million In Area In 1956

The New York Life Insurance Company made mortgage loans totaling \$1,391,445.89 in Farmington during 1956, according to R. Manning Brown, Jr., vice president in charge of the company's real estate and mortgage loan department.

In Michigan mortgage loans in 1956 totaled \$14,259,170.90 he said, while on a nation-wide basis the company's mortgage loans for the year amounted to \$285,511,678 of which \$223,347,263 went into residential loans and \$63,164,409 into business loans.

In year-end New York Life's mortgage loan portfolio was the largest in its history—\$1.8 billion representing 29.2 per cent of the company's total assets of over \$2.2 billion, he said.

ment. Forty percent of Chinese students sent to Red China in 1956; 34 to Free China. 150 Chinese schools heavily infiltrated. Four of five Chinese newspapers pro-Red or neutralist—bought with gifts of newspaper or bribery of editors. Forty new bookstores opened in last few months, all but one Communist-operated. Country flooded with Red Chinese publications. Twenty-two million dollars economic aid offered by Red China and accepted. 120 Red technicians arriving.

NEWSPAPERS PRO-RED
HAILLAND: Communist Party control pro-Nationalist. 300 Chinese students sent to Red China in 1956; 34 to Free China. 150 Chinese schools heavily infiltrated. Four of five Chinese newspapers pro-Red, nearly all 27 newspapers anti-American. Greatly increased flow of Communist publications. Communists using films for propaganda purposes.

HONG KONG: Population swelling to Reds. 600 private Chinese schools, growing Red infiltration. Big circulation newspapers pro-Red. Widespread bribery and gifts of newspaper by the Red Chinese. Numerous bookstores selling Communist publications. Reds have bought control of two motion picture studios, control Hong Kong Chamber of Commerce.

SINGAPORE: Reds are in control of schools. Two or three major newspapers are pro-Red. Publications from Red China smuggled in from Hong Kong. Reds have strangle-hold on labor.

MALAYA: One-fourth of Chinese schools Red controlled with influence, growing 120 students sent to Red China in 1956. Communist publications distributed. Caldwell's testimony is extremely illuminating. He tells how in Bangkok the Communists have set up motion picture studios to produce low movies designed to break down the moral fiber of the people of southeast Asia; and how narcotics are being widely distributed to the population—as easy to get as aspirin in the U.S. We have the intelligence in America to halt the spread of Communism. Will it be mobilized in time?

District 3 of the Women's Committee of the Michigan Farm Bureau held a camp meeting at Hagen Hill near Highland, Michigan, on Tuesday and Wednesday of this week with Miss Henrietta Buch of Wayne County as camp chairman. Speakers were Arthur Maguire of Michigan State University and Don Roach, associate legislative counselor of Michigan Farm Bureau.

Foreign trainee farmers were guests on Wednesday. The 1957 project for the district is to do something for the 4-H Club Fairgrounds. Wayne County will entertain members of the District on April 11.

The Jolly Eight Pedro Club was entertained by Mrs. Lillian Ringham at her home on Wednesday afternoon with a dessert luncheon followed by an afternoon of cards. Honors were won by Mrs. James Vannell, Mrs. Jack Dietrick and Mrs. Alice Bigelow.

Mr. and Mrs. Edward Palack of 12 Mile Road are enjoying a vacation in Florida.

Mrs. James Gaffney returned by plane on Tuesday from a two week tour of Mexico City and Acapulco.

Mrs. Norris Hill returned home Sunday after a week's stay in the Redford Community Hospital where she had been confined for observation and treatment.

Ladies of the health class at the senior high helped Mrs. Lyman Bush celebrate her birthday last Thursday evening. Mrs. Bush served birthday cake and coffee to those in attendance.

Shopper will find canned cherries, pears, peaches, and purple plums to help with meal planning and to add to flavor interest.

None of these fruits talk, but they wear labels to tell their story, says the Consumer Marketing Information Agent, Mrs. Josephine Lawlor. Some are sweet, some are tart, some are small chunks, some are large. Labels help the customer decide which style and pack is best for his family.

If it is kept as busy circulating as it should, the average 31 bill will wear out in about 9 months.

A few centuries ago the kind of bread a baker sold his customers indicated the baker's standing. The degree of freshness was of great import, too. Freshly baked was for royalty, one-day old for nobility, two-day old for the gentry, three-day old for scholars and friars, and four-day old for the peasants.
