

Teachers To Travel This Summer Education Assn. Survey Shows

On June 15, the day after school is out, a good portion of Farmington's travel conscious teaching staff will be on the move. Some will tour in almost every part of the U.S.A. Others will travel to Europe, Central America, Alaska, the various provinces of Canada and to Mexico.

Some teachers will stay in Farmington to work in other vocations during the summer.

In a recent questionnaire, filled out by the teachers many suggested that they would spend the summer "resting" or "relaxing" or

as one said, "In the old rocking chair." "Last summer I spent the summer staying home to enjoy my three year old" said another, "This year I'll do the same but now she's four."

One teacher said on her questionnaire, "I'm going to Washington, Oregon and Vancouver." A second said, "We're going camping in North Dakota," and a third, "Travel in the Caribbean area."

One teacher will attempt to see all the national parks west of the Mississippi river plus all the parks in the Pacific Northwest, Canada, Alaska, and Mexico. Five teachers will tour in station wagons and camp out most of the summer as they tour western states and Canada.

Another teacher is looking forward to "two weeks on a dude ranch in Montana." Another writes that she will do office work most of the summer and go on a 3 week tour of the New England states, Washington, D.C. and Missouri. A history minded teacher is ambitious "to help celebrate the 350th Anniversary of the Founding of Jamestown." Some teachers will camp out while others will visit the great cities of the east, New York and Washington D.C.

Some teachers will attend summer school in such places as the University of Colorado.

Two elementary principals and four elementary teachers will attend the National Education Association annual convention in Philadelphia. Two are delegates from the Michigan Education Association and the Farmington Education Association and will have some of their expenses paid. The others are traveling at their own expense for the professional information they can obtain for themselves.

The most interesting summer project will be undertaken by one teacher who will "do underwater research with diving equipment in Florida waters and do some oil painting."

Several teacher-travelers will spend time in national parks. One will visit Isle Royal, right here in Michigan but far removed from civilization. Two will go to Michigan's Summer Capitol, Mackinac Island, six will enjoy Glacial National Park and some will visit the Tetons and Yellowstone.

Most travel will be to the west but the New England states and the south will have many visitors from the Farmington teaching staff. Some are spending the entire summer in travel while others feel themselves fortunate to be able to spend a week or two on the road.

Tips On Use Of Insecticide

Knowing how to use an insecticide properly is just as important as knowing which one to use.

J. R. Hoffman, entomology specialist at Michigan State University, points out that it's almost as hard to kill insects with the right spray, poorly applied, as it is with the wrong insecticide entirely.

Hoffman says the first step in doing the job properly is to read the directions supplied by the manufacturer of the insecticide, and follow them closely. Don't use the idea that little extra should be added "for the pot," as if you were brewing tea. And don't get the idea that if a little of the chemical will do a good job, twice as much should do twice as good a job. Unless you follow the directions, you may cause more trouble with your insecticide than the insects would if they were left alone.

Thoroughness is important in insect control. Many pests live on the undersides of the leaves, and you should be careful in applying pesticides to see that you get enough material on the lower sides as well as the upper surfaces.

Don't forget that different plants may require different handling. Plants with glossy foliage may require a spreader-sticker to be added to a spray mixture. Spraying or dusting should be done in the early morning to take advantage of the still air so materials don't drift to areas where they aren't wanted. Also, the morning dew will help dusts to adhere to the leaves more effectively. Another advantage of early-morning or evening spraying and dusting is that many plants are less sensitive to the materials being applied when they are cool and out of the hot sunlight.

A FEATURE attraction on the entertainment program for the Clarenceville Oddfellows Father and Son banquet to be held June 18 will be local dancers from the Betty Johnston Dance Studio. Dancers above who will appear are Darlene Crepton of 20774 Inkster Road, left, and Bonnie Eberly of 23000 Farmington Road. Also on the program will be "Sage Brush Shorty," hockey star Gordie Howe, guitar player and singer Virginia Miller and the "Zaney Scott," George McFar. The banquet, which will start at 6 p.m., will be held at the Oddfellows Hall at 20311 Inkster Road.

Must Find TB Earl Says Health Head

People sick with tuberculosis today have an unequalled chance for recovery, particularly if their disease is found early, according to a report made by Dr. Albert E. Heustis, State Health Commissioner.

Six out of every ten folks suffering from tuberculosis first learn about their disease only after it is advanced, however, the health head pointed out.

Dr. Heustis joined in urging better campaigns to spot tuberculosis in early stages, and also stressed the advantage of newer treatment methods.

"If tuberculosis is found before it has made deep inroads," he said, "the promise for recovery is excellent. On the whole, the outlook for the tuberculosis patient has never been brighter."

The commissioner said that the best hope of gaining community protection from tuberculosis hinges on improving the blend of state and local tuberculosis control ser-

Obituaries

Edwin E. Gildemeister
Edwin E. Gildemeister, 56, passed away in his home at 14324 Archdale Avenue, Detroit, after a long illness.

Gildemeister was a member of the Michigan Bell Telephone Company's Traffic Engineering Department 35 years before he retired six years ago. He was a member of the Michigan Bell Pioneers, the Farmington American Legion Post and the Masonic Lodge of Farmington.

Left to survive are: his wife, Florence; sons, Edwin Jr., Donald and Gerald; a daughter, Mrs. Barbara McElroy; three grandchildren, three sisters and one brother. His oldest brother, Leo, passed away March 19 of this year. Gildemeister was laid to rest in the Grand Lawn Cemetery in Detroit on May 31 with the Reverend Juebb officiating.

David S. Haight
David Haight, 28301 Maitrot, Southfield Township, passed away May 29, from a heart condition at his residence.

He was born July 31, 1887 in Ellsworth, Wisconsin, the son of Albia and Lydia Ann (Burton) Haight. He was married to Miss Edith Matilda Johnson July 26, 1922, and had resided in Southfield twenty-six years.

Mr. Haight had retired in 1952 from General Motors. He was a member and former chaplain of Southfield, Post No. 407, American Legion.

He leaves his wife, Edith Matilda; three daughters, Mrs. Thomas (Eleanor) Burham of Commerce; Mrs. Clayton (Marion) Fenner of Southfield and Mrs. John (Margaret) Teddy of Detroit; one son, Charles Haight of Oxbow Lake; twelve grandchildren and two sisters, Miss Ida and Miss Ada, Gillet of Wisconsin.

Funeral services were held from the Spencer J. Heene Funeral Home at 1 p.m. Saturday with Reverend Carl H. Schultz of Salem Evangelical and Reformed Church, Farmington, officiating.

Graveside services at White Chapel Memorial Cemetery Birmingham, were in charge of Southfield Post No. 407, American Legion.

THANK YOU

Adjutant Arnold wishes to thank the dear friends of Farmington who sent get well cards, little gifts and flowers while in the hospital for 14 weeks suffering many broken bones in a car accident. She left the hospital May 11 and is now at her home getting on real well. She also wants to thank those for their prayers.

Michigan Seal Designed In 1813

The Great Seal of the State of Michigan, which is imprinted on the official state flag as well as all documents of the state, dates back to the days before Michigan was admitted to the union.

The seal was designed by Lewis Cass, who was appointed governor of Michigan territory in 1813 by President Harrison, and served until 1931 when he was named to the cabinet of President Andrew Jackson.

In 1835 the seal was presented to the Michigan constitutional convention and was adopted as the coat-of-arms of the state and the official seal. Several changes appeared in the decorations of the emblem around 1879, but the present seal, which was adopted by the legislature in 1911, is a return to the general pattern of Cass' original of 1835.

The Latin motto, "Si Quæris Peninsulam Amœnam Circumspice," which means "If you seek a pleasant peninsula, look about you," has remained unchanged.

Other translations of the Latin inscriptions are:

"E Pluribus Unum," "From many, one,"
"Tuebor," "I will defend."

Thomas Brown Awarded Degree At Albion College

Thomas F. Brown, son of Mr. and Mrs. Charles F. Brown of 23809 Farmington Road, will receive his bachelor of arts degree at Albion college Monday morning, June 10, in the Kresge gymnasium.

The commencement address will be given by Dr. John A. Hannah, president of Michigan State University, and President W. W. Whitehouse of Albion College will confer the B.A. degree on 197 young men and women, and the master of arts degree on one, Col. Joseph Battersby Duckworth. Two honorary doctorates will be conferred.

Elected To V.F.W. District Office

At the recent V.F.W. Rally in Mt. Clemens, James Rice was elected Jr. Vice Commander for the 5th District.

Jim served as Commander of the Farmington V.F.W. post for the past two years and is now the post Quartermaster.

Since coming to Farmington six years ago he has always been active in V.F.W. and always been interested in the Veterans affairs.

Most wheelbarrows now have ball bearing wheels that are sealed and need no lubrication. Wheelbarrow handles can be painted or varnished with a mixture of 1/2 turpentine and 1/2 raw linseed oil for their protection.
