PORT HURON, MICH., TIMES HERALD:

"Every year, tons and tons of government documents which have no value as news, public information or in any other way come into newspaper offices all over the Nation—and most of it is thrown into the wastebasket after it has been scanned by the addresser.

"It must cost the Post Office Department millions of dollars to carry this torrent of useless matter over the Nation."

There are more than 56,000 motels in our fair land, California has 7500. Florida is next with 5500.

Pharmaceutical chemists are not only creating new man-made synthetic medicines, but are also perfecting better ways of improving their action.

We now have "delayed action" drugs. Special coatings that dissolve at exactly timed intervals permit part of the medicine to act first and the rest of it at later hours. This gives us divided medication in one dose. Your physician is entirely familiar with the progress being made and knows that as soon as each new discovery is available we stock it in our prescription department.
