YOU'RE DREAMIN'

The guy with the whip isn't really there—look again today—he won't be there—doncha wish he'd go away? Well—vacations are about over so we don't have to worry about that fer another year—and school is about to start so we'll all be back to normal. Now the normal thing fer a store to talk about is something to eat—so we'll try and be outside so fer eatin' out there's our fresh ground beef what is 3 lbs for \$1.29. The small fry and even some of the big kids would rather have a hot dog and those are Eckrich skinless ones fer 49c a lb. If its a barbeque yer havin' our spare ribs aren't so spare cause they're the small ones—yuh know the 3 lb and down slabs fer 59c a lb. If yer really livin' it up and want a steak and yer fussy about 'em—stop in and see us. We handle U.S.D.A. choice and prime steaks and we'll cut 'em jest the way you want 'em. Dont need much with steak but tossed green salad and maybe some garlic bread. We have fresh garlic and also Spice Island garlic powder and salt. Course yuh need butter and Land O Lakes is 69c a lb. Fer roastin' we'll have choice graded pot roasts fer 49c a lb and the rib end of a pork loin fer 49c a lb. With pork some fresh green apple sauce and some new sweet potatoes—huh? And wouldn't cha know it—we have whole fresh dressed rock fryin chickens fer 39c a lb? rock fryin chickens fer 39c a lb?

Clay soil need not mean that one cannot have a lawn to be proud of just the same says Professor Harlow O. Whitemore, chairman of the Department of Landscape Michigans at the University of Michigans at the University of Michigans, to work into a good depth, materials which will retain moisture in dry weather but permit drainage in wet weather. A mong these are sand (not too fine), sifted coal ashes, wood ashes, corn cobs, decayed leaves, sawdyst, powdered peat and black swamp muck.

dolomite, it needed, can then be added and harrowed in again.

"Use this set of specifications where top soil is available: 1) Grade the worked over subsoil of the state of the state of the worked over subsoil and blend the form of the ground into existing graded areas; 2) Spread load to a depth of four inches with broken sods intermixed; 3) Spread black swamp muck to a depth of two inches, disk or work the muck, topsiol and subsoil to a depth of mixture to compact it to level of curb, drive or walk; 5) Remove sticks, stones and chunks of sod which interfere with seeding; 6) Add chemical fertilizer 10:10:10 or equivalent at the rate of two pounds for each 100 square feet and mix into the upper three inches.

ches.
"Use seed mixture as follows: 35 per cent Kentucky Blue Grass; 30, Chewings New Zealand Fescue; 13, Red Fescue; 15, Perennial Rye Grass; five, Colonial Bent; and two, White Clover. Slight variations are permissable.

to contact Federal authorities to approval of this proposal.
Remodeling of the west unit of the Ten Mile School to make it more suitable for classroom was reported feasible by Architect John Allen, based on a study pf the state of the School Board. He recommended the replacement of some curied beams, the installation of accoustical ceilings and tile floors, e w lighting fixtures, improvements in the heating system and the redecorating of the building interior. Also recommended was a multi-purpose room addition and the addition of the corridor spittife the kitchen as well as a corridor. The Handymans

by: BAYARD TUPPER HOW TO SAVE ON LUMBER

I don't suppose there's a man on earth who would walk into a clothing store, sak for a suit and then accept the first one that was handed to him off the rack.

And yet that's what some people do, in effect, when they come to us for lumber.

Of course they usually specify the dimensions—or approximate dimensions—but beyond that they don't seem to care whether they get the best quality in the yard—or the poorest.

That's why our first question is usually, "What do you want to use it for?" Whenever I ask that. I'm always afraid that somehody is going to think I'm getting nessy. But the fact is that I hate to see anybody waste good money — at the price of fumber these days—by buying a better quality than they really need.

Naturally, you'd want a No. 1 grade of clear lumber-probably bine-for cabinet work, but there are many other workshop, projects, especially those that will eventually be painted, where a slightly lower quality will do just as well and will save you money.

And further down the scale are grades you would use for rough temporary work, such as scalfolding, concrete forms, and so of:

Don't let the idea that you have to become a lumber expert order to make an intelligent purchase. Just keep in mind i fact that your choice of quality should be determined by nature of the project.

Whenever you think of lumber, think of SMITH-TUPPER, pride ourselves on our large stock of good lumber for

You don't have to wreck that rec room just because you've found a little mildew down there. Next week I'll tell you what to do inkleed
