

## URGES CARE OVER HOLIDAYS

# Livonia Police Chief Lites Winter Driving Hazards

A follow-up warning about the special hazards of winter driving was issued by Livonia Police Chief James Jordan as the holiday season began building toward its annual climax.

"Informal traffic counts show an impressive increase in motor vehicle and pedestrian traffic in Livonia during the holiday season," Chief Jordan reported.

"This means that in order to prevent accidents and exasperating traffic tie-ups, both pedestrians and drivers are expected to exercise reasonable patience and courtesy, and brush up on their knowledge of special winter traffic hazards."

The chief warned that the following conditions ought to be anticipated: reduced traction on roadways and crosswalks, due to the presence of frost, ice or snow; and reduced visibility, caused by early darkness, falling snow, sleet or freezing rain.

Chief Jordan reported that the International Association of Chiefs of Police has endorsed the recommendations of the National Safety Council's Committee on Winter Driving Hazards as the best known means of overcoming these hazards, whenever they occur, without unnecessary fuss or fear.

The recommendations are as follows:

1. Get the "feel" of the road. This is essential because there is a great variety of winter pavement conditions. Sometimes, especially after dark, a road which appears to be bare may actually be coated with a thin but treacherous layer of frost.

Even when roads are plainly ice or snow-covered, slipperiness can change with temperature and traffic conditions. Road surfaces may be "felt" by carefully testing the brakes, or by accelerating to see if tires grab the roadway, before getting into heavy traffic.

2. Follow a safe distance. The usual rule-of-thumb recommendation is a following distance of one car-length for each 10 miles per hour of speed. On icy roads this must be increased appreciably, because the longer braking distances tend to be in effect.
