WHY DIDN'T THEY PICK OUR TOWN?

When an industry looks at our town then picks another . . . Why?

Perhaps we lost because of reasons beyond our control: the company's problems of markets, transportation, raw materials, etc.

But perhaps it was because we lack advantages which competing towns have and which we need if we are to attract industry. Usually a town can develop most of the advantages it needs if its citizens work hard enough and work together. Do we?

Perhaps the company felt that the community's attitude isn't favorable for new industry. Attitude of the people toward their present industry, toward their town and toward each other. Community attitude is not merely everybody's business. It is everybody's every day contribution — good or bad.

Join hands with your local industrial development organization and the Michigan Economic Development Department to help your community prosper.
